1. AAAAAMERICA

[image]

America POV:

Borrrrring. Like always there is a meeting every Week. And like Always ,the German is holding his speech. I almost could fall Asleep in this atmosphere but then would the UN get really mad at me and i don't need that.

And then something happened what i didn't expect, not because i wouldn't believe he wouldn't do it or something ,but i wouldn't think that he would do it in the meeting. Then all of a sudden North-Korea was standing in the door, after he busted it open. He stomped in my direction and i knew exactly why. And i knew this will be fun.

North:" delete the Photo now." in a demanding and aggressive voice.

UN:" Could you please do that after the Meeting?" It almost sounded begging.

North looked me in the eyes, dead in the eyes and i said:" I have no idea of what you are talking about." That was a lie, i knew exactly what he is talking about.

North clenched his teeth together and said:" You know exactly what i'm talking about, so delete it or i'l make you."

Me:" Make me? I want to see that ,you little dog." as i said that ,i let my Glasses slide a little bit down, so he could see my eyes and my Smile with it.

North was rally pissed of that and then he was leaving. just like that? What? I wanted a fight. He was walking to the UN, is he asking now the UN to help him. But no, he stop in the middle center. That was exactly in front of the UN, EU, Asean and the

NATO ,there was this pedestal. North had something with him and he placed it on the pedestal an played around with it.

UN:" Can't you do that somewhere else?"

North:" I'm Sorry but the Congress is the only Place here that has enough Energie to power it."

UN:" What even is this?"

ME:" Probably some stupid toy from North-Korea."

North:" I didn't expect that you wouldn't recognize it. This is an E-Bomb when you don't want to delete the Photo then i delete your Complete Phone."

Germany:" Are you stupid, an E-Bomb will not only delete or better destroy Americas Phone but everyone's here."

North:" Thank America for it."

UN:" e?, e-bomb?, what was that again." whispered the UN to himself, but everyone could heae it. And the Samaritan I am, I said:" An E-Bomb creates an Electric Impulse, that destroys every Electronic in it's Way. So it would destroy every electronic in the **Complete Congress.**"

over UN's Face castes a Shadow and then he Screamed:" WAIT." the UN pulled his hand forward but before he could react any further North said:" I'm sorry ,i will pay for everything." And then he activated it.

(I have no idea how an EMP works, so i imagined something, if it is wrong, please forgive me. But i couldn't find anything on the Internet.)

An ear drumming sound clutched against the walls. Everyone went silent. Everyone held there ears, because of the loud sound and after a few seconds the phones went all out and some even exploded (little explosions, like a wire burnt trough) after a while, it went silent. Everyone looked to North in anger.

But then i heard a sound, like someone would fall to the ground. I and probably everyone else looked in the direction and we saw nothing, the UN...is gone. Before anyone could do something ,the EU that is standing right next to the UN started to Scream:" **UN**." and he ducked under the table and then i knew what that sound was. Was that the EMP? impossible, an EMP doesn't hurt people. Right?

EU POV:

What the Fuck just happened. The UN tried to stop North and after the E-Bomb got activated, he stood still and then he fell. Just like that, he was unconscious, didn't America mean that an EMP is harmless to people.

I crouched down to the UN. I would help if i could but he is to big ,not even i could carry him. "We need a doctor now" i screamed. And immediately the Switzerland stood beside me and had everything he needed. He checked his Pulse and everything else. Then Switzerland looked to me and said:" It seems that he is alive but....." "What" i burst out and then he said:" He has no pulse."

Everyone went silent, even the People that chatted with others and even the People that completely ignored everything where now looking to our direction. "What,.....what does that mean. Is he dead." I asked.

Switzerland looked me deep in the eyes and then he looked to the UN and then he said:" It doesn't seem that he is dead, he breathes but i.....have no idea."

EU:" What do you mean you don't know, you should know the best, or not?"

Switzerland:" NO, he was never sick or ill. He was never with me, i don't know how his Body works, to my Knowledge, the only one who he talks to, is the NASA."

EU:" The NASA? Why he?"

Switzerland:" how should i know."

Germany:" So is he dead or not?"

Switzerland:"..... i don't know."

A little panic broke out. Understandably, if i could i would panic too, but when i do that now ,then even more Chaos will break out. I breathed in and out.

EU:" OK, everyone, listen NATO you contact the NASA that he comes here, North and America you two come with me. Germany ,Russia, China you go with Asean and inform all the Country's that weren't here today. And everyone else please keep your calm." As i said that ,everyone did as they told, i would love to wait for NASA but i have to discuss something with these two trouble makers. North and America. I were coming down to the Pedestal. I signalized the two to follow me and i were going out of the big room, we were going on a long hallway ,after a wile i stopped at a door. I opened it and got out of the way for the two. After both were in the room ,i closed the door and locked it.

both of them looked irritated at me and then said America:" What have i do with this?"

North:" Why are we here, it was just an E-Bomb. I don't think it is my fault. America built it."

I couldn't anymore these two, every time it is these two. I couldn't hide my anger anymore. Both winced and there annoyance turned into a scared face. I said with an angry voice:" I don't know anymore what i do with you two. Every time you two do something stupid. And even if the E_Bomb ins't the cause for UN's status, do you thing that makes it better? You two crossed a line, i hoped that you would get it in your Fucking Mind but ..... you just won't learn out of it. So i made a decision, I'm kicking you two out of the UN alliance. For an unknown time."

Both of them couldn't believe what they just heard and i can understand that. "I have enough of you two. And you can come back when you learn to behave yourself."

America:" You can't do that, i didn't do anything, it was North not

me."

EU:" Do you think i'm stupid. You Provoked him. You Provoke him every time."

North:" At least some Justice."

America:" Shut your mouth, or i'l make you."

EU:" Now both get out, if you are interested ,you will get informed about UN but for now i don't want to see you guys any longer." With that i pointed at the door. I was really pissed and every word i just said ,i mean.

America:" Fuck." With that he left the room and North followed him slowly.

After that i went immediately back to the UN.

NATO POV:

I called the NASA and he was on his way ,but i wonder what the EU now do with these two troublemakers, because when this is all there fault then ..... i would love to kick them out, but i don't have the Privileges to do that. And then the EU was standing at the door again, he almost sprinted to us. And then he asked:" And did something changed?" I just shook my head. but i was curios:" What did you do with the two?"

EU:" I kicked them out, but i explain that later."

NATO:" WHAT?! i mean they deserve it and i am with you but.....REALLY?!"

EU:" You don't need to scream. And yeah, i kicked them out."

NATO:" But ,....you are not even allowed to do so."

EU:" I know, normally not, but with all what is going on, i just thought that would be the best. And probably is North the point because all of that is happening."

Asean:" You don't know that." All of a sudden, was Asean back.

EU:" Are you already done?" He raised an eyebrow.

Asean:" Yes, most Country's were here today, so it wasn't that much."

EU:" OK. And to come back, when the UN wants them Back, he can just bring them Back. But for now i think it was the right thing to do."

NATO:" You are right on that, but still."

Asean:" Say how long needs NASA to get here?" Asean gets a little bit nervous, understandably.

NATO:" he said he's hurrying up, but he was at the Station so the way is a little bit long."

EU:" Oh, then we need to wait, can not atleast once go everything right." He looked down to the ground, he looked tired. Sighs. "I need a break from all of that."

NASA:" Believe me, We all do."

My first and last book in English. 2000 Words in English is hard. So i don't do it. The maximum on Words will be 1500. Or i never finish it. I hope you all enjoy my suffering and my hard work to write that in English ,because i don't use Google translate, my Grammatical is just bad.

2. United Nations

[image]

The NASA arrived. Everyone looked at him and got out of the Way, so the NASA can get to him.

NASA:" You all behave like, he died."

Italy:" Well we don't know if he is dead."

Greece:" ITALY."

Italy:" What?"

Switzerland:" Well i noticed that he has no pulse."

NASA:" What? Oh,....." He mumbled under his breath something. And then he checked him.

NASA:" It, seems not that bad. But...." He didn't looked so great.

North:" That is all your Fault, America."

America:" My Fault? You brought that shit here and activated it."

North:" but it is **your** Shit. You said it wouldn't hurt anyone."

America:" And it shouldn't have. I tested it a hundred times, the Impulse is to short to Kill someone. It goes in the Body and directly out."

NASA:" WAIT, did you say, short Impulse?"

America:" Ähm, yes. It should work like this." And then something suddenly clicked for EU too, and he starts screaming:" WAIT, HOW DID YOU TWO GET BACK IN HERE!" Only America and North reacted, while everyone just ignored it too worried for UN.

NASA had a smile on his Face and searched something in his Bag.

After a will he got something out what looked like a computer ship. He placed his hands behind UN's Head and doing something, what no one could see. Because the NASA didn't wanted anyone to see. Then you could here click sound and right after that, the UN moved.

UN:" mmmmmmmhhh." a long groan was to hear, and then he got up.(Meaning of leaning foreword, on the Ground) He was holding his Head probably because he hit his Head, when he was Falling.

NATO:" UN?!"

EU:" UN ?! Your Awake."

Italy:" And not dead."

Everyone:" ITALY?!"

Italy:" What isn't it true."

The UN tried getting up on his Feet. NASA:" Wait. I help you." And then the NASA helped the UN, to Stabilize himself. The UN was leaning against the Table and was able without NASA's help to stand. Everyone was worried, that was obvious to see. The UN looked weak. He even needs to use his Wings a little to stabilize himself. The UN looked a little bit Confused, but nobody dared to Talk. The Air was thick and then the NASA talked.

NASA:" And? how do you feel?" The UN didn't feel addressed. He first didn't reacted. Then the NASA got to the UN and touched his Shoulder, and asked again. The UN looked at him and thought about it for a little bit.

UN:" .....ok. I guess. My Head hurts and its a little bit hard to move." With that he Fixed his little Olive wreath.

NASA:" That doesn't sound that bad. Are you sure everything is alright." Everyone listened with sharpened ears.

UN looked around and then back to the NASA and said:" It seams that everything is working, but..... why am i here?"

EU:" What do you mean? Did you forgot that you got to work today?" said the EU really woried.

UN raised an Eyebrow and said:" Work?" That Answer made the EU not feel any better. The UN was looking around and then had the NASA a Moment of enlightment.

NASA:" UN?! Come with me."

The UN again didn't feel Addressed. But after another calling he looked to NASA again and this time got up, to follow. But then was Blocked by a few Country that wanted Answers. There were Worried and probably didn't even Noticed that there are in the Way. Every Minute there are more Questions popping up in the Minds from the other Countrys and then Ukraine talked:" I have a question? UN are you ok? I mean your Eyes look strange." And then everyone looked at UN's Eyes and there really are strange. There Black with a blue Pupil and a blue extra Circle.

The UN had no Idea what were Wrong and then The NASA said:" Everyone please. You can ask your Questions after i Checked him."

UN:" Yes. He is right, i should better go." And after he said that the Countrys were going out of his Way. But a lot of them would love to here Answers.

NASA:" Great. NOW. Please follow me."

UN:"Of Course." He followed him out of the Conference Room. Both of them were going on a long Hallway, after a few doors the NASA stopped, pointed at a door and Said:" Here. Go in." The UN did as told. And after the NASA was in too, he locked the door behind him.

UN:" Why, did you lock the door?" The NASA faced the door and looked at the ground. He didn't answer the Question and then made his own:" Do you know who you are?" The UN didn't expected that question, he opened his mouth slightly. And then he said a little sarcastic:" Is it that obvious?" The NASA didn't believe it. His Eyes widened, he hopped he wasn't right.

NASA:" Do you think that is Funny? Do you know in what of a situation you are in right now?"

UN:" No." The UN immediately answered with out hesitation. The NASA was angry, he was pissed that he is playing that like a fucking Joke. And after a wail, the UN saw that too and immediately got serious:" I'm sorry. I have no idea why I am here or why everyone is calling me UN?"

NASA:" Everyone calls you that, because that is your Name."

UN:" I think i would now if i would have a Name." With that the NASA turns to Face UN.

NASA:" Yeah. Normally you know that, but you got hit with an Electric Impulse and it seems your System is broken, especially the one, that Safes all the Data." After the NASA said that he rubbed his Head and was thinking what he should do know. He can't let him out like that. It would end in Chaos, absolute Chaos.

UN:" You seem to know what you are talking about."

NASA:" Of course, I was responsible for you over 10 Years."

UN:" I don't remember that and it looked like that the others out there didn't know what is going on."

NASA:" Yes, you are right. I am probably the only one that knows about your little ~secret~. And it is better if it would stay that way."

UN:" I am sorry, but i don't get why everything needs to be a secret. Isn't my Hole existence already an Secret? Can it get any higher than that?"

NASA:" Do you.....remember anything?"

UN:" Well i remember you. A little bit, or better the only thing i now is that i can trust you and i remember this Building. I recognized some of the Names that where Mentioned in the Big room. but there isn't much more."

NASA:" That is bad. Really bad. That is almost nothing. How can i explain that, a destroyed Database can't be repaired, the Data is lost. When i say you have Amnesia that wouldn't help for long, someday it will come out and then i will be in even bigger trouble. What should I do, your hole Experience, all the Data from the Countries.....gone." He leans against the Wall and slides it down. He hides his Face in his Hands. The NASA has no idea what he can do now.

UN:" Just tell them what happened. It can't be undone anymore. You yourself said hiding would just make it worse." The NASA knew he was right, 'but.....even then ,he hid it already for over ten Years and it isn't a little Secret. It is literately your hole existence.' thought the NASA as he looked over to the UN. And then he saw that he still is fighting with his wings.

NASA:" What is with your Wings? You are twitching them now the hole time."

UN:" There just hard to move ,i can't really control them. It's just annoying. But i will get used to it." The NASA thought about that Sentence and then thought ,about to handle his Problem the Same way.

NASA:" Your Right, now way i can hide it anymore. No matter which way I think, I can no longer keep it a secret, it would make it only worse." With that he Sighs and looks at the Ceiling. He doesn't want to do it, with every single piece of his being. But he doesn't have a choice.

Then he gets up again and goes to the door and unlocks it. He opened the Door and a shiver of fear goes over his back. He has no idea from where it came and he probably doesn't wanna know. He looks to the UN and says:" Come." And he goes back to the direktion to the Meeting Room. The Hallway is dark and there is no Light and if there were something in the Way ,you would probably fall every ten seconds. And after a while the NASA recognizes Something. He sees the Door that leads to the Main Building were is Light. And then He realizes Something, how can he see or better recognize the Door. Then he sees Light behind him ,he looks behind him and sees that the Eyes of the UN are glowing. The Blue Stripes in the Eyes

are Bright Neon and shining. The UN looks at the NASA and wonders why the NASA stopped walking. Then even when his Eyes are Glowing, he himself doesn't really see anything. He only sees that the Silhouette stopped walking. He looks down at him and sees his Face a little bit and then He asks:" Why are we not walking any further?"

NASA:" Nothing. I just forgot that you.....are Glowing. Or better i first didn't realize."

UN:" Didn't you mean you know me?"

NASA'" Yes but, its been a little Time, since i last saw you. .....Like that." the last part he said more to himself.

UN:" Ok." is everything he said and then he looked against the Big door out. He walked past NASA and is then straight to the Door. He pressed it open and the Light from the Other side, made the NASA blink a couple of times, where the UN isn't affected at all.

And there was Germany standing, with a lot of Papers in his Hand. His Glasses and a white shirt. And of course a black Tie.

I hope you all enjoy his as much as i do. And i still don't know why i am writing this in English.

Wordcount: 1718

3. Germany

[image]

I like the Picture. And i like it that much that i addet it a little bit to my story.

Germany, is an Engineer and had an Accident, after WW2 as he tried to escape. By that he lost an Arm, but nobody wanted to help him after the Hole WW thing so he helped himself and build after a long Process his own Arm. So he has one robotic arm, but the Important part, he is an Engineer.

I put that last second together, is that good or is that good.

Germany POV:

I was going on the old Hallway. I had my Papers and my Office is not that much away from here. I like it, that it's here silent. I was going past the big Door as it suddenly opened. I looked in the direction and saw the UN there standing. He looked at me surprised and i think i looked at him the same way. I just didn't expect to see here someone. Especially not him.

And then i saw the NATO too and then i was asked from the NATO:" What are you doing here?" I first didn't answered, i needed to process what is just going on. Ok. I needed just a second because i'm fast in thinks like that, but for me, it took a wile. And then i said:" My office is just 2 Corridors further." And then i pointed with my Finger at the long Corridor.

The UN looked the way i pointed and then back to me. He had a look on a face as if he had no Idea what i was talking about. Then i said:" You know, the Room i asked for. You should know, you gave it to me UN." And again the UN looked at me like he has no idea what i want from him.
Strange.

NATO:" Ähm.....yeah, do you want anything?"

D:" What?"

NATO:" You are staring at the UN." Did I? Maybe?

D:" No. But UN, are you ok? You are acting strange?"

UN:" Do I? I think it just happened to much today." Right. The Hole thing with America and North.

D:" Do you ....feel better?" I was curios, he is acting strange. I'm sure of it.

UN smiled at me and said:" Sure. I'm feeling great." Feeling? Normally ,he says it different. He talks so strange. I stared at him.

NATO:" I'm sorry but we don't have the Time for that." And then he shoved me away. He grabbed UN's Hand and was leading him away. Strange. Normally he hates it to be touched. Nobody knows why but we were never allowed to touch him. But the NASA just touched him with out getting screamed at. But wait, it was the same after the Incidence. The NASA helped him stand up.

Something is up and i will find it out.

NASA POV:

Fuck. Fuck. Fuck.

Why Germany. The one that finds everything out. Fuck. If we would have continued the Talk, i'm sure he would have found out. And i know i wanted to tell everyone, but..... that was way to sudden. Germany is a monster when it comes to Data analyses. That was Dangerous. I can only Hope he leaves us alone, as long as i'm ready or better have a solution. Then even if i want to tell everybody i can't do it now. Because everyone would get crazy and everyone would blame America and North. That would also be not good. How? How should i do it?

I hate myself, i just convinced myself to tell everyone and after i met Germany i lost every bit of Confidence. Sighs.

UN:" What is the Problem? You look troubled." What? I look back at

the UN. He looks so different ,i just noticed that, but his Face says,....no screams: I have no idea, what i am doing.'
Fuck. Germany probably noticed that already.

NASA:" First of all. Never ever again say: You are Feeling good. You need to say your fine or You are good. But never ever say Feeling. Because in your Language means it that you are Feeling fine but technically not are. What in this Situation is more then right but not what we want."

UN:" Sorry. I guess. But didn't you just said, you would tell everyone? So i don't see the Point in Acting."

NASA:" Yes. But i have no idea how i should tell everyone, that you are worthless."

UN:" HEY?!"

NASA:" HAHAHAHAH" I thought again of Germany ,it troubled me a little bit. I looked back forth and saw the Exit.

UN:" That was mean, of you!" I ignored it.

First of, for today get out of the Building and make a complete Check up. At my Base i will see if everything is completely lost. Maybe i can safe something.

America POV:

I am waiting in front of the Building. I was hoping to speak to the EU or better to the UN about everything. They just can't throw me out like that. I am walking in Circles in front of the Entrance of the Building. And then i saw the NASA walk out of the Building ,i looked at him and then saw the UN walk right behind him. I smiled first of ,someone to talk, second he is Ok. I knew my Machine doesn't Kill people. It seemed that the NASA didn't saw me, he was walking straight to the Street and his Car, what was ,when i can say that, *Professionally* parked. I know he had to be fast ,but i mean. He parked half on the Stairs of the Building and then even crooked.

I ignored that and was walking to both of them. I saw that the UN already saw me ,but didn't say anything. As i stood beside them i

said to the UN:" Excuse me. But can i talk with you Mr. UN. I wanted to talk about the Thing, that i am kicked out."

The UN looked down at me, with a weird face Expression. He looked as if he didn't want to talk about it right now, or more as if he tried to find the right face to answer me. And then i saw from the Side that the NASA looked at me. And then said:" I'm sorry, but the UN has no time." I looked at the NASA and said a little pissed:" Can't he speak for himself?" He looked at me with a little Anger and then said:" The UN is not doing so well today, because of **your** devise. That's why i am going to examine him first." He then Grabbed the Hand from the UN and pulled him in the Car. Strange. Did the NASA just touch the UN, when i accidentally touched him ones i got Instantly hit. He gave me a slapstick.

It still hurts just by thinking of it. I looked after the Car that drove away and thought about that. The UN was very Quiet, strange? He normally is a nice guy, a little arrogant yes, but he always helps and does everything he can to answers every Question. When we let the hole Touch thing away, what was always strange. He acted just not right ,right now.

And then i remembered that i wanted to talk with UN "Dammit." The NASA was in the Way, overprotective or he just wanted me away. Who knows. Should i wait for the EU? Or is it worthless. I don't think it will bring anything to talk with the EU when the UN was already that hard. Sighs, dammit. Then i should go Home.

Germany POV:

I'm sure now. I didn't hear everything but i watched the Discussion between America and the UN or better the NASA. Something isn't right and i will find out. I hate it when People lie to me. When i saw the NASA drive away ,i got out of my Hiding spot and was walking to America.

D:" Hey, Ame." I waved to his Direction, as he Noticed me ,he smiled at me and said: "Hey. Germany, how are you doing?"

D:" I'm doing fine, but i have a Question."

Ame:" What is it?"

D:" Say, don't you think that the UN is acting weird?"

Ame:" Weird. What do you mean?" and looked at me Confused.

D:" So you didn't noticed anything?"

Ame:" I mean i wouldn't say anything, but i wouldn't say it was that strange."

D:" mmmhhh." I got lost for a Second in my Thoughts.

Ame: Why even? Is the UN sick? Didn't he recovered? Is it that why he hates me?"

D:" hate you? Why do you think that?"

Ame:" it was only for a Second, but the UN looked down at me with *these Eyes*."

I asked Concerned:" What eyes?"

Ame:" I can't really describe it, its hard to describe, but it was like he wanted me dead, like he really hates me. And at the same time looked he down at me ,as if i weren't worth it."

D:" hard to Describe huh?" It was explained good, when he is right. The UN never used his Statues or never saw down on someone, despite hate someone, he just saw it as his Job. When im Honest it sometimes felt as if he Couldn't Feel. But that with the looking down, is weird, because he self said that were all on the same level and we need to respect the others that way. And yes i remember every single Word he said ever.

I wonder .....could i follow them? I mean they are probably going to NASAs Base.

I thought about it for a Moment and i decided not to. I would just get a lot of Trouble and i don't need that, i have a better Idea. I talk to EU about this and he decides if i just make a Mouse to an Elephant or if there is really something deeper going on.

I looked at America and said:" thank you, i need to talk to the EU." I turned around and suddenly my arm was grabbed from America and he says: Can i maybe come to?" I thought again and thought it wouldn't hurt to have one more Countryhuman with me. And so i accepted and we both walked to the Office of the EU and i want to say, nobody told us that America and North are expelled from the UN. Or else i wouldn't had brought him with me.

As soon as i entered the Room, the EU gave us a death glare, i was confused and the EU said:" What are you guys want?"

I was walking to the Table an said:" I have a concern about the UN. He is acting not normal ,when i can say really strange lately."

The EU looked at me and thought something for himself and then turned his face to America and asked me:" and what is he doing here?"

I looked over to America and said:" he wanted to come to, for some reason ,i thought it wouldn't hurt." The EU glared at him and said:" Didn't i tell you i don't want to see you anymore?"

America stepped forward and said:" I'm sorry, really, but please let's talk about it."

EU:" TALK ABOUT WHAT? YOU COULD HAVE KILLED HIM." He was angry and i was confused but got that they probably got into a fight.

America:" I get that, but you can't trough me out of the UN because of that. "

And then i intervened:" Hold up. Kicked out? I don't understand."

America looked away and then the EU faced me and said a little bit angry:" I expelled America from the UN, because it was enough." I understand ,that is it what it is all about. And to make sure it doesn't degenerated, i said to America:" You should go. Talking with the EU on the day he kicked you out, won' bring you anything, he is still angry. I would come an other day." I wanted to say it as much Friendly as possible without him getting angry. And it worked he

sighs and leaves the Room with out a single word.

I hope you all enjoy. For me i'm still suffering of the English writing.

Wordcount: 2058

4. ERROR

[image]

EU POV:

Amerika left the Room and i looked at Germany again. And i asked:" So what exactly is the Problem?"

Germany:" I noticed something, that concerns me."

EU:" What is it?"

Germany:" It is about the UN. He acted just not right." Germany is a Pro when it comes to stuff like that, when he says there is something of, it probably is, but.

EU:" What makes you think that." I was curios, i mean today was a bit Chaotic.

Germany:" He talked wrong." Normally when Germany would say that, i would accept it, but today is different.

EU:" You know Germany, i take it seriously when you say it, but after what happened with him i think he just needs a little bit of time."

Germany:" You don't understand, i don't mean a little bit of, but really wrong, together too that the NASA acted weird." I noticed that too, but i just thought that it is the NASA, he is not really interacting with People often.

EU:" I think you should ad too that today was a strange day, for everyone. But if you really think there is something off, than i of course believe you. But what should i do know, i can't do anything."

Germany:" i wanted to ask, if i were allowed to go the NASA base and peek a little bit." My mouth flew open and i immediately said a little bit angry:" NO. OF COURSE NOT. If he gets you we all are in big trouble, his Base is a forbidden Zone. No one is allowed there

and peeking? Germany we talked about that. Just.....ask him." I starred at him and was surprised when he looked at me angry.

EU:" What?" He looked away and then said:" You didn't need to scream at me, you know. I get it even if you say it normal." I was surprised by that and then said:" I am Sorry, but i was.....surprised. Because you should know more than everybody else what rules are."

Germany:" That is why i am here. I could have already left, but i didn't because i just wanted to ask." Whit that he left. He slammed the door and was gone.

I.....was surprised.....of myself. Why did i react that way. I should know the best Germany would never do something like that. I looked at the Door and than out of the Window and said to myself:" I Hate this day."

NASA POV:

We got to my Base, it is in a Forest somewhere in Nowhere. But i like it that way. I was driving to the Front Gate and stopped by the Security Guards.

Guard:" ID." I had already an ID Car in my Hand and showed it the Security Guard, he looked at it for a few Seconds and then Asked me:" And the other Person?"

NASA:" He is just a visitor, i allow it." He nodded and then let us Trough.

I parked right in Front of the building and helped the UN out of the Car.

UN:" I remember that Building." I was surprised by that. And then i looked in the Same direction the UN did ,a big Grey, green Building with a lot of Security Guards.

I looked then to the UN and said:" Come we need to go." I was walking to the Door of the Building an the UN followed me. We walked inside and there were a lot of Guards, because this is a Exclusion Zone. Almost Everyone looked at the UN and he looked

back. As we entered the Elevator that goes down, i was relieved because all this eyes were too much for me. I hate it to be looked at and the UN is a magnet for that, because he is almost 2,50m. But bevor the Door to the Elevator closed someone glided in. He didn't looked at us and he didn't say anything. As the Door opened again, we all got out and then the Man said:" The Team is Ready." I nodded and the Man left. I know what he meant but i had no idea who he was. Shame on me.

I walked down the Corridor and then there was a big Metal Door. It scanned my eyes and then opened. The UN was surprised and looked with a smile around, like a little kid. I liked it. We walked to a group of People.

UN POV:

I have never seen something like that. Here was so much stuff. I can't even describe it ,i saw that we were walking to a group of people and i got that they were talking but i didn't care, i looked all around the Building ,i think that was way more Interesting. But then i heard that someone screamed "UN" ,normally i wouldn't Care, but i got that this is apparently my name, so i looked at the Direction from where it came from. And someone waved at me and was running towards me. I looked at him and then he stopped in front of me and started with:" Are you Ok? I heard what happened, is everything alright? Why are you here again? Is something broken?"

I took a step back, i was Surprised, he spammed me with questions and i don't even know him. Then the NASA called me and the hole group was coming to me.

NASA:" Oh hi Marcel. What are you doing here?" So his name is Marcel.

Marcel:" I just saw UN and thought i could visit. I mean i heard what happened, i was worried."

NASA:" You have all right to. But i think that it is not Helpful right now, because he doesn't even recognize you right now." Marcel looked confused and then asked:" What do you mean?"

NASA:" like yourself said, something happened and..... his Complete system got deleted. I'm Sorry Marcel, but i don't think he remembers you." Marcel looked at me with.....tears in his eyes. Why? Is he someone Important? Do i know Him? Should i know him? I was confused, i hate it when i am confused. But i am already used to it.

Then another Man from the Group looked at me and got his hand out so i could shake it and said:" Hi my Name is Ryan. I am here to see if we can restore at least a little bit of Memories." I hesitated but then shacked his hand and he just smiled at me. Then the Hole Group spoke.

Elsa:" Hi my name is Elsa, you could see me as your Doctor."

Joe:" My name is Joe. I am here too watch out that you don't get any stupid ideas." What dos he mean with that. Then i noticed that he had a gun. He was the only Person that had a gun on him. It was a US-M16 A1 Sturmgewehr, i don't like that. I looked at him and inspected him from head to toe. And he noticed that and said:" I don't know what you are thinking right know but make better sure that i don't need that." And then he pointed at his gun. I don't like him at all.

Milla:" Hi my Name is Milla." The others all said what there here for, but she didn't, i mean i don't care but i just noticed it. She was a also smaller than the others and it seemed that she is shy.

Then i had an Headache, it just suddenly came. I raised my Hand and was holding my Head with one Hand and closed one of my eyes.

Elsa:" Is everything alright?" She came closer to me and wanted to touch me but my Instinct told me not to let here. So i slammed here Hand away and made a step back. Everyone looked at me with shock, except from Joe, he just looked at me concerned and was holding his weapon tight but he didn't aim at me .....yet.

The Headache got worse and I closed for a second both of my eyes. As i opened both of my eyes again, i saw that the group in Front of me is speaking to me, but I couldn't hear them ,I looked at NASA

and saw that he tried to talk to me too, but i just couldn't hear him. And then my Vision got a little Blurry. I noticed that my Eyes all the Time were aiming back at the Gun from that Joe, it is Dangerous.

And again the Headache got worse, and then my Vision went Black.....

My Vision got Back and i could see an red Square in Front of the Face of Joe. And then Some Info of him appeared right next to him up. I didn't even need to read it, it was like it was going straight to my Head.

Danger

I was walking straight to Joe and now he Aimed at me with his Gun. I saw that he unlocked his Gun and was ready to shot. But i wouldn't let him. As he was Aiming ,i sprinted straight at him.

He shot, and i jumped in the Air and landed behind him and was in a crouching Position, he was already aiming at me again but i was faster and i turned to him and kicked his Leg. He fell to the Ground and he let his Gun fall in the Process. Then i was standing up and kicked his Gun away. And then the Red Square changed to Orange. Then I got hold of his Lab coat and pulled him with one Hand a little bit to me. And then i lifted him up so that he couldn't breath. With my other Hand i Punched him straight in the Stomach. He coughed and screamed a little bit, at least the little bit what he could, because he couldn't breath. He tried with his Hands to get my Hand away but he was to weak. And then his hands fell down, did he give up? His Eyes are closed too.

Then i noticed that NASA and the Others.....hugged me? They tried something. I noticed that Milla tried pulling me away, what was unsuccessful, someone tried pulling at my Wing and someone was hitting me in the Back ,but stopped after a few hits. I ignored it and was aiming for his Face ,as Suddenly NASA was standing right in Front of me. I stopped.

I let Joe out of my Grip and let him Fall to the Ground. I let my Arm down and looked at NASA who smiled now. He looked Relieved, but i didn't understand why.

Then i heard someone Scream ,I turned around and saw nothing i looked around bur there was nobody, but then i suddenly felt a pain in my Back. And i had Problems With holding myself up, i turned around and saw Milla with an Electric Devise, from there was a Wire going to me. My Vision glitched a little bit, but i tried my best to stand. But bevor i even could react she pressed a Button and an electric Shock, got trough my Hole Body, i collapsed.

I LOVE MYSELF. I first wanted to write something else, but i am happy i didn't do it.
Oh and this time i had extreme problems with the Englisch, normally i don't think it is that hard but for some reason i made so much spelling Mistakes, it was Crazy. And i didn't even see the Mistakes, i don't know i think i just need to sleep more. But i am happy i wrote this, because i love this chapter. Even if it a little bit late, but the Motivation left a little bit. Sorry.

5. Is it Safe?

NASA POV: (Arrival at the Headquarters from NASA.)

I walked to the Group of People i wanted to talk too. At first they didn't notice me but then everyone greeted me and i said back:" Hi, nice to see you guys again."

Joe:" Well it would be nicer, when the purpose why we are here, weren't so bad."

NASA:" True. But you all got the message, right? You all know what happened?"

Milla:" Yes, we already talked about it. But first we need of course more Data."

NASA:" You will get that. Don't worry."

Elsa:" I hope we all go with same mood home. I like it right now that way."

Milla:" Oh, when it is possible we would love to do a little walk after all this, with you NASA."

NASA:" No Problem. But first ...." I heard loud excited voices behind me, i looked behind me and saw Marcel going crazy with a very Irritated UN. I needed to laugh a little bit from that, but then we were going in their Direction, to help him.

NASA:" UN!" I called his name and the UN looked at me and then i saw that the hole group was following me.

NASA:" Oh hi Marcel. What are you doing here?" When i remember correctly he should be right now, by the Trucks.

Marcel:" I just saw UN and thought i could visit. I mean i heard what happened, i was worried."

NASA:" You have all right to. But i think that it is not Helpful right now because he doesn't even recognize you right now." Marcel looked confused at me and then asked:" What do you mean?"

NASA:" like yourself said, something happened and..... his Complete system got deleted. I'm Sorry Marcel, but i don't think he remembers you." Marcel looked at me and then at the UN with.....tears in his eyes. I could see that the UN got even more confused about that.

Then Ryan was going in front of the UN and talked to him:" Hi my Name is Ryan. I am here to see if we can restore at least a little bit of Memories." Ryan held his Hand out to shake and the UN grabbed it, it helped to get the UN down a little bit.

Elsa:" Hi my name is Elsa, you could see me as your Doctor."

Joe:" My name is Joe. I am here too watch out that you don't come to stupid ideas." The UN was taken back from that and inspected him, i could see that his eyes looked a little bit longer at his Weapon and Joe noticed that too and said:" I don't know what you are thinking right know but make better sure that i don't need that." And then he pointed at his gun. That isn't a good a start i would say.

Milla:" Hi my Name is Milla." She just smiled at him and inspected the UN. She is one of the People who know about the Hole System of the UN and know that you don't want the UN as your enemy.

I looked at Marcel again and said:" You should go back. I think you have work to do, don't you?" But before he could say anything, I heard something.

Elsa:" Is everything alright?" Whit that i looked to Elsa and the UN, i saw that she approached him and was holding a hand out. But then the UN slammed here Hand away and took a step back. I was shocked, I could see that the UN was holding his Head, he is probably in Pain, but why? He had problems standing up right.

Then the UN closed both of his Eyes, as he opened them again he looked at me. I tried talking to him:" UN, are you ok? What is the

Problem."

Milla:" UN? Do you see something?"

Elsa:" Do you have pain?" It looked as if he couldn't here me. And then i noticed that he was looking at Joe and his Gun, all the Time. He closed his Eyes again and his hands dropped down. He just stood still and everyone was silent.

After a wile he opened his Eyes again and now they were red. And at that point i knew exactly what was going on.

NASA:" EVERYONE GET AWAY FROM HIM." I looked at everyone and everyone done as told.

Milla:" That is his Defense System ,isn't it? Shouldn't that be deactivated?"

NASA:" YES, it should." Did the EMP, restored and activated the Defense Program?

The UN just looked at Joe, so I looked at him too.

NASA:" Is it.....Joe's Weapon?" I mumbled to myself.

The UN started walking at Joe and Joe then Aimed his Gun at the UN.

NASA:" Joe, put the Weapon down." That will only make it worse. But before anyone could react, the UN started running. And Joe started shooting at the UN, he missed and then the UN jumped over Joe and landed behind him and kicked his leg away. Joe fell to the Ground and lost his Gun. I started walking to Joe, something must be done. The UN kicked the Gun in my Direction. At first i wanted to grab it, but that would be a really bad decision. So i walked past it straight at the UN. The UN grabbed Joe and held him high. Now i could see that the others also start walking to the UN. Joe couldn't breath and then the UN punched him hard in the Stomach. We all tried our best ,so he would stop, but he is a machine, he didn't move an inch. I saw that Milla tried it at the Wing, but no answer on that, as i looked back at Joe i saw the he already was unconscious. Fuck. I noticed that the UN wanted to punch him

again, without thinking i ducked under his one Arm and was now Standing right in front of the UN. I was nervous, but i didn't move. He looked at me without emotion. And then looked around at the others.

Milla:" Go away there or he will punch you." I didn't answer and didn't move, i want to save Joe, it is my fault, I should have warned Joe ,no i should have known that there is a possibility that his Defense System is online again.

UN:" **Could you please go out of the Way?"**

I was surprised and looked at him in disbelieve but then he looked at me and wanted an answer ,i got really nervous from his Eyes and said "NO" I tried my best to not show my Anxiety.

Then he let Joe go, i just heard him fall, i turned around and immediately got down to Joe. I checked him.....and he breathed again. I was relieved and looked at the UN. He looked at me and i smiled at him, i was happy just happy that Joe is alive and the UN seems to be Talkative and approachable in his Defense mode, last time i saw it that wasn't possible. I don't want to remember that right know.

Then the UN turned around and looked at something. I looked at the same direction and wondered what he is searching, then i looked at Milla, who was now beside me and said:" We need to stop him."

NASA:" What do you mean?"

Milla:" Didn't you see? His eyes are still red." And then without warning shot she here Electric devise at him. The UN turned around and fell to the Ground on his Knees.

Milla:" I need more power, it seems." I just looked at the UN and saw that he suddenly fell to the ground, his eyes went black and closed after a few seconds.

Milla:" We should check him as long as he is not Active, he will probably activate himself after a while."

Elsa:" We should bring him to a separate room, were we have better control over him."

NASA:" Guys, Guys, now you all are overreacting."

Elsa:" Oh, so you know that when he wakes up he isn't anymore in his Defense Mode." She looked me deep into the Eyes and I didn't say a word.:" As i thought." Then she turned around and went to help Milla with the UN. I and Marcel are helping Joe to the Medical Room. Joe seemed fine, but i was still worried, as we both walked together with Joe away from the UN, we walked past the Weapon on the Ground, i stopped.

Marcel:" Is something?" I looked at the Weapon and then at Marcel and said smiling:" No everything is fine." And then i started walking again. We walked to the Medical room where people were already waiting for us. Immediately the Doctors gathered around and helped him. I just stared at him.

Marcel:" Is something wrong?" I looked at Marcel who was standing right next to me. I didn't smile and i didn't say anything. He looked worried at me and said:" You have something on your Mind. I can see that, is it about UN?" I looked down at the ground and sighed.

NASA:" For some reason i feel like this is all my fault. I know it isn't, but....i fell like it." Marcel put his hand on my Shoulder and said:" I know how you feel." I looked at him again and he smiled. I couldn't smile anymore and just looked at Joe who was still laying in the Medical bed. Then a Doctor approached me and said:" He is stable, he just needs a little bit sleep. He should wake up tomorrow." I looked a second at the Doctor and then again at Joe and said:" Ok. Thank you." I felt that the Hand on my Shoulder disappeared, i looked immediately at Marcel and he walked away:" Where are you going?" I asked him ,he turned around and said with a sad Smile:" You said it yourself, i am at this Moment no help, i am going back to work." I wanted to say something, but i had no idea what i could say. He just walked away and after he got around a corner, he was gone. I got lost in my Thought for a few moments.

Could i have prevented it?

Should i have told everyone about the System?

Should i have known that the System could be active again?

.

.

Is it my Fault?

Is he only Hurt because of me?

Is the UN like this because of me?

Should i have told everyone earlier?

NO

NO

NO, it isn't my fault, what happened ,happened. I can't change it anymore. And i made decisions, i need to live with that. I can't see in the Future, i just did what i thought was the Right. I am helping the UN and doing my best.

I looked at the Ceiling and was the Tears near. I knew it wasn't my fault, but still. There is guilt in me.

Milla:" There you are." I looked down to see Milla standing right in front of me, i got spooked from that a little bit and then asked:" What? Why are you looking for me?"

Milla:" The UN woke up." What?

NASA:" ALREADY?!" I was surprised by that.

Milla:" Yes and my Device won't work anymore he is probably already resistant." I looked worried at Milla. I knew exactly what she meant and it is the Defence System, we need a way to solve that Problem. It was shut down for a good reason.

NASA:" OK, lets Go." I said and took her hand and was running straight to the Chamber in knew he was put in.

6. Memories

[image]

UN POV:

I woke up and hold my Head. I opened my Eyes and looked around. It seemed i was in a Box. A white Box. I tried standing up but my Leg wouldn't let me. Instead i was sitting on the Bed. I looked around, but the only think in the Room is a big Mirror. I could see myself, but i didn't know why i am here.

And then the Door opened, it was right beside the Mirror. And there was Milla. She looked at me and asked:" Are you alright?" I didn't answer.

Milla:" Are you angry?" Again i didn't answer. I was analyzing, everything, because i was confused....a little bit.

Milla:" You know it would be helpful if you would talk to me."

UN:" Helpful for what?" i asked.

Milla:" to know if you are a threat or not."

UN:" Why should i?" I am not Dangerous...only if other People are Dangerous to me.

Milla:" Because you attacked Joe and we don't want that you attack us."

UN:" He threaten me, i only reacted."

Milla:" So...you remember?"

UN:" Of course i remember ,why shouldn't i?" Then Milla turned around and looked at someone i couldn't see, she then got a little bit out of the Way and NASA got in the Room as well.

NASA:" How do you feel?" He was sweating, he Ran? Why?

UN:" I am fine. But i would love to get out of here."

NASA:" Sorry, but that isn't possible, right now. But after we checked you ,you can. Ok." I wanted to get out now, i don't like that place, something about it hinders me.

UN:" Ok."

NASA:" Great, just lay down and after a wile it will be over." I did that, i lay back on the Bed but with my Belly on the Bed. I heard Footsteps come near and then something cold touching my bag.

NASA POV:

Milla prepared everything, she opened the Module on his Back, to get to his Security System, we need to deactivate that as fast as possible. I got out of the Room again and said one of the Guards to be Always wary. We don't now how the System will react ,when Milla tries to deactivated it. Then i got my Phone out and called Elsa, after Milla she needs to Check him and look if she can restore at least a little bit of Memory. That is still the Main goal. But the Start was miserable, Joes Joke got the UN in the wrong neck, because normally Joe and the UN would make Jokes that way, i now i don't know why either. Joe was the one who trained the UN and gave him his Basics, Milla armed him and Elsa was the Checkup girl, i hopped i would never see them again. They all are Crazy, in Public they don't show it, but the UN was originally made as a Weapon and the People building on a Weapon are not always normal, but.... i think it could be worse.... when they can control them self.

I called Elsa.

NASA:" Hey Elsa, could you come to chamber 204."

Elsa:" Is the UN already awake?"

NASA:" Yes, Milla already is working, i don't think she will take long so you should start walking."

Elsa:" Ok, i am coming." Then she hung up. I looked at the Phone for a wile. I remembered again. They are not bad people, as they

were told that the UN is repurposed they did as they were told, even when they didn't like it. But....i have this feeling that they are planning something behind my back. I hope it is my Paranoia.

Then i look trough the Big window, that is from the other side of the Mirror. I see Milla working on the UN, she looks like she has Fun. She Smiles. Then i go to the Door and open it, i go in the White Room and stand next to Milla.

NASA:" And?"

Milla:" I don't want to say it, but i don't think it will work. The System blogs me out all the time, now i try what else i can do." She gets a screwdriver and plays with it around. I don't have the Wisdom to know what she is doing there, i am not an Engineer. But i would love to know, because then i could help the UN myself and wouldn't need to get help for him.

Milla:" I think i have it, i can't deactivate the System but i can Deactivate the Trigger at least, or better i can lower it. I tell the System that the Environment is Friendly, so that when he gets mocked or hit, he not directly tries to kill the other person. Only when someones points a gun at him he will get triggered. Better it probably won't get. I can't even deactivate his Damn Weapons."

NASA:" WAIT. What weapons?"

Milla:" You know the Weapons he were born with. Technically."

NASA:" I thought all weapons were Disconnected and removed."

Milla:" No. How should they? The Weapons are part of his Operating System and connected to a lot of parts."

NASA:" But you guys told me..."

Milla:" Oh yeah that.....we lied."

NASA:" WHAT?!"

Milla:" That was the only way you would shut up. The only way you would feel safe enough to let him go."

NASA:" Exactly, i let him out with weapons.....why?"

Milla:" The UN asked us. He wanted that we tell the Lie. He didn't want to be here anymore, do you get that?" I just looked at Milla in Shock and then to the UN, who was silent the hole Time, just laying there. And then the Door opened again. Milla and i looked there and we saw Elsa standing there.

Elsa:" Wrong timing?"

NASA:" Did you know it too?"

Elsa:" What?"

NASA:" That the UN still had his weapons?"

Elsa:" Oh that....." She looked at Milla and then back to me and said." Yes." I just looked at here in disbelieve ,then i sighed and starred at the Sealing.

Elsa:" Did i do something wrong?"

Milla:" No. I am done here, for now, you can work with him now. But be careful i couldn't complete deactivate his Security System."

Elsa:" Ok."

With that Milla took all here tools ,closed the Back plate and took a step back. She then looked at me and said:" I am done for today, i am going home and sleep a little bit." Then she turned around and walked out of the Room. I looked a bit after her and then she was gone, i saw that the UN pulled himself up and looked straight at me.

NASA:" How do you feel?" The UN looked around and then said:" I am fine." Then i smiled at him, what seemed to irritate him. So i stopped smiling and just looked at Elsa worried and asked:" I now you not looked at him yet, but.....tell me, how high are your expectations of saving something?" Elsa stopped at everything she was doing and then looked at me. She opened her mouth but it took her a second to really say something. At that i already knew that it seems bad. And then she said:" I don't know. I mean there should be

something to find, the Problem is more, if i am able to put it together again, ...i mean ,if there are Lines of data, that would be great but, when its just Numbers that fly around, because then even when the Data is still intact i can't work with it."

NASA:" So it is really bad."

Elsa." NO. I mean.....probably...but there is a chance." I think she just said that to make me feel better, but we all knew the Chances are almost zero.

UN POV:

I didn't understand everything, of what they said, but i got that it is about me. I looked at Elsa and she looked back at me, i couldn't read here face, but it was different from what the NASA gives me all the time. Then she started coming at me and stopped right in front of me.

Elsa:" First of, i want to check your outer Body, so please open your mouth." I didn't like the Idea someone touching me, that i don't really know, but at the same time, i have a feeling that i can trust her. I opened my mouth and she started to look in it. She had a flashlight and after a few seconds she said:" You can close it know, i will now look at your eyes, so please don't close them." Then she took the Flashlight and played with it and then was holding a paper with something written on it right in my Face, but after 5 Seconds she pulled it away and said:" What was on that Paper?" My System analyzed the Photo it made from the Paper and then i said:" Info's about this Base and Personal Data from you."

Elsa:" Perfect. That means your Analyzing Program is still intact, and it seems it is completely fine." Then she put all that away and and was putting one of here hands behind here, after a few seconds she pulled a gun but pointed at the Ground.

Analyzing.....

.

.

No Threat.

I didn't move, Elsa looked at me and my reaction and after i didn't do anything, she pointed the Gun at me, i still didn't do anything, i didn't have to.

Elsa:" Great." Then she put the Gun away and NASA beside me started to say very confused:" What just happened?"

Elsa looked also at him and said calmly:" It was a fake Gun, it is only Plastic and his System knew it, he immediately knew i wasn't a threat." She then smiled at me and said:" Luckily, or else i would have probably get hurt."

NASA:" That's why i don't get why you did it, that was dangerous."

Elsa:" Oh come on, it's the UN he is a teddy bear."

NASA:" .....what?"

Elsa:" And i gave him time to see that it is fake, or else i could have pointed the Gun directly at him from the start."

NASA:" that doesn't make it better."

Elsa:" i just want to say, relax." Then she turned to me again and said:" ok now i want to check your System ,i have here a laptop ,i connect it with you and check what i can see, ok?" I didn't answer, it seemed as she wouldn't need it. She grabbed my arm and turned it a little bit, then she opened it. She put a HDMI-Cable in it and turned to here laptop. I starred at the Cable in my arm. I could only here her tipping, but i wasn't interested in what she was doing, because i didn't need to. Everything that she was tipping and Programming, was going straight to my Program. It felt weird.

And then i saw Black.

.

.

.

.

.

.

.

.

.

And then i was standing in the Middle of a city. I looked around but nobody was here, i was standing alone, the sun was high up. I started to walk along the street. Nobody, but then i looked up and saw too big high Buildings, looking straight to the Sky. I looked at it, they looked beautiful, but then i could hear something, it sounded like a plane. I looked around in the Sky, i searched for it. And then i saw it, a big Passenger Plane in the Sky, but it was to low.

I could see how it aimed straight at the 2 Buildings, i didn't want to, but my body moved from its own. I started running to the Building, i wanted to do something, i knew something would happen. But i was to late, the plane collided straight with the Towers, you could here a big explosion. The Shock-wave hit me in my Face and i feel to the Ground. I tried standing up again, but stooped in the Middle, because i looked at the Building and Pieces of it were falling of, i was too close to the Building. I just watched as the Pieces were falling over my Head. But i didn't feel anything, no Fear, no anger, nothing. And the Moment it would have hit me, everything ended. It was Black....it was over.

Wordcount: 2077

7. Are these memories?

[image]

Elsa POV:

I found something, ...Memorys? Yes, old ones but better then Nothing. I wanted a closer look, and watched his memory, it is 9/11, but that's Impossible, on that day the UN had an Check up here. I found more Memorys, there are just fragments, but there are from things that happened around the World, Tragedy's. But most of them are impossible. I mean, the UN is almost never leaving the USA ,but he has Memorys from all that things.

How could he have seen these Things? I saw another Fragment fly by, i chased after it and then got it.

UN POV:

I was at another Place. I still don't know were, but this time i was in a Jungle. I watched around and saw Soldiers. I was walking to them and looked straight at them but it seemed as they couldn't see me. I got closer as i was Scarred by another Soldier jumping from a Tree and attacking the Soldiers on the Ground. More and more jumped out of Trees and Bushes. I took a few steps back, so i could see everything better. And then i felt a heart aching feeling, as i was watching it. Blood, Pain, Dead. They killed each other, but it was after seconds over. The Soldiers on the Ground lost, the Enemy just had the Surprise Effect and overwhelmed them.....why do i prefer to them as Enemy's?

As what ever this is, didn't fade like last time ,so i predicted that it wasn't over. The Soldiers that jumped out of the Tree, talked a little bit, but i didn't understand anything, but not because i don't know the Language but because i just heard rustling. Then the Group started walking away and i followed them. We all walked a little bit and then we were at a camp...i think. The Soldiers rested there and in the Middle i could see a big Flag swinging in the Wind. It was.....and then everything went Black.

Elsa POV:

Damit i lost it. How did it got away so easily. Dammit. I searched after it, but it was gone. Forget it, next one. I need something that doesn't Disappear when i open it. Something that can be Repaired. I searched again and found an Entrance to his Main System. Maybe i find something there, i make my way as i find another Data, that isn't completely Destroyed, it's seems like another Memory....or whatever all this is.

UN POV:

And again i changed Place and again i didn't recognize the Place, but there were a lot of People. It was Night and as i looked around, i saw that i was standing on a Roof of a building and looked down to a Mass Group of people and a Wall separates them. The people are Climb on the Wall and a lot of Light sources are all over the Place. And then i hear them Screaming.

And then i see people Smacking at the wall with hammers and whatever they had. I looked a bit around and saw a big Building out of Sandstone with four Horses on top. And on it where Flags, but before i got a better look of them, i heard a loud bang. I watched down to the people again and saw that they ripped part of the Wall of. ....I wonder if this is Legal?

I watch the Chaos unfold and remember that i wanted to know the Flag, i watch back at the Flag on the Sandstone Building, i recognized a Yellow but for the rest it were to dark. I have no idea what Country that is. And before i can Think more about it everything went Black again.

Elsa POV:

This time it hold longer, but still.... the More i go in the Better are my Chances it seems. So i go further just ignore everything that i see, because it will Probably Crumble too. I watch around and find a Code text fly around me, i watch after it and thought about it and then Decided to ignore it. I was going further in and then i saw Pictures. Complete Memorys? Or does it just look like it? Wait. These are Pictures from the Scenes that i just saw. So they didn't

disappear but where transferred here. Why?.....Probably Because the System didn't recognize anything, so it put it in the Central System so it can Analyze everything. That means.... i go immediately back and search for the Code that was flying by earlier.

That could mean, that when the System transfers the Files to the Centrum, that it still recognizes it as Memorys, or whatever. That means if i click on everything the System puts it himself together. That could be a way, i just need to find everything.....OMG that will take Weeks, means the UN needs to stay here a little bit longer. I sigh and work even harder. For the UN. For a Friend.

UN POV:

And again i switched Places but this time i was in a big Black room. The only light source was from a TV. I walked close to it, and saw Pictures. There were switching every Second. I didn't recognize anything from it, but it felt good to see them. I took a step back and everything disappeared and i was somewhere else. It looked like i was in a City again. I looked around there were few people. It was turning dark and then i saw a big White Building at the End of the Street i was standing on. I looked at the Building ans got closer. And then i heard a loud sound. It....Exploded. The Building was now standing on fire. And i heard screaming. But not from the Building but from behind me.

I turned around and saw someone sitting on the Ground and holding his Chest it looked like he was in Pain. I was walking to him and bend down to his level an asked:" Are you ok?" But he didn't answer, he just kept screaming. He was holding his Chest in straight Pain. And then i heared someone talk behiond me, i turned aorund and saw a tall man looking domwn at the other man. And then he said:" That is what you get, for beeing a bad Child." I didn't understand what he meant, so i turned around to the Man on the Ground and asked:" Who are you?" And this time he grabbed my Arm and looked me in the Eyes with his Crying Eyes. I was taken back by his sudden movement and then he said:" Don't.....you remember?" And then everything went black.

What.....was that?

Elsa POV:

What? The System...blocked me out? How is that even possible? I tried to get back in, but without avail. FUCK. I closed my Laptop and looked at the ceiling and said to myself:" So much too that plan." I looked around nobody was here anymore. Everyone left i wonder how much time has already past.

I sighed and looked at the UN. He was still laying there, i wonder.....does he now more?
I sighed again and said to myself:" Am i stupid. He is only a Machine, when it is not in the System he can't know it." I needed to laugh a bit because of that. Then i got the Motivation back to try again. I opened my laptop but.....it was already on? My laptop started the Program from its own? I looked to the UN and thought....is he....did he did this? Does he want me to try again. I smiled and thought, i would have tried even if you wouldn't have done anything. I got in and tried to search again for anything.

UN POV:

..... where am i?

It felt like a bad joke. I was in the middle of nowhere with a Donut in my Hand? I mean i don't mind, but..... a shit on it. I bit in the Donut and it tasted beautiful. I eat the hole thing and now i want another one.

And then i was somewhere else again. I looked around and saw a Space rocket. I was standing in a terminal with few people talking in a microphone. I looked at the Monitors and they showed all the Same, the Rocket but all from different views. And then i saw People going in the Rocket, they had .....flag on there Arms. And after they entered the Door was locked and a countdown started going from ten down. I watched with interest what would now happen. And then the Rocket started, with a lout burst it was going up. All the people talked at the Same time, instructions. It was loud. And then on one of the Monitors were a animation from the Rocket and the Altitude level it is right now. It was going more and more up and then it passed the Ozone Layer. Everyone cheered but it wasn't over yet. The Rocket was flying straight to the Moon. It took

a while but then it started the Landing procedure on the Moon. I watched carefully and with interest and i wasn't the only one, everyone was silent except the Guy giving instructions. After a few minutes it landed on the Moon and everyone was cheering out loud, even I. i don't know why but i was happy, really happy. I closed my Eyes and cheered bit when i opened them again ,everything was gone. Again.

Elsa POV:

I did it. It is only one of many, but this Memory is repaired, even with the Emotions. I feel proud of myself and that shows once more that it is possible. .....But.....when i do that with every single Memory i will take forever even if there are just a few left from the Destruction. Help would be nice.

----------at the same time in front of the NASA Building----------

Deutschland POV:

That was a stupid idea, a really stupid idea. That thing is more Guarded as everything if ever seen. But what am i talking about. I can do that, i am prepared. I want to know what is going on, and i will find out.

I hoped i would get the permission of the EU but nooo. Now i need to do it that way, dammit. And then i said stuff to the EU like i would never do that. That hurts even more in my Chest but after everything is done, i will explain it. I was only concerned for the UN.

When i can survive this, at least. All the Guards are heavenly armed. And they don't look like they would make an excuse for a Country.
ooooohhh that was a really stupid idea.

Wordcount: 1794

I am sorry that it took so long, but i needed time to get Motivation. I still need, but i thought after a month a little update doesn't hurt.

So here you have it guys, have fun with my Gramatical bullshit of English.

8. Energy....shouldn't be Radioactive

NASA POV:

I left Elsa alone. I needed some fresh air. I sighed and walked to the Entrance or Exit. But as i walked through the building i noticed that the Personal is running from left to right, i worried a little and stopped one from the Personal and asked:" What the Hell is going on?" He needed a moment and then said:" We have an Intruder." And started running again. What? An Intruder? Now? Why? I started running to the Exit and smashed the Door open. But what i saw wasn't an Intruder or better he was,
but.....HAHAHAHHAHHAHAHHAH

[image]

I saw Germany being chased by one of my Soldiers and others trying to cut his path of. Normally, they would shoot, but because it is a Countryhuman they are not allowed to, they need to capture him. I now i should be more worried but...it is Germany. I sighed again and then it was a thing of seconds. And he was captured. He was smacked down by one of my Soldiers and pinned on the Ground. I started running to him and stopped in front of him, he looked at me and i squat down.

NASA:" So first of..why are you here?" Germany thought a moment about it and then said grumpy:" I was just worried about the UN." Of course. I got up again and said:" Let him go, i take him." The Soldier let him go and i took Germany's arm and we are going to the Gate.

Germany:" What are you doing?"

NASA:" How does it look for you? I kick you out." Germany then Stopped but i was stronger and he gets dragged along.

Germany:" NO, I want to see the UN." I stopped and said:" NO."

Germany:" Why not?"

NASA:" Because we don't have the Time for that." And then I started walking again. I stopped at the Gate and wanted to give him to one of the Guards as he slips my Grip and runs to the Building.....again. I sigh and start running. And because i am a little bit annoyed of this, i am going serious. I give full speed and get to him in seconds and tackle him to the ground and say:" Move, and i break your arm.....the healthy one." He didn't say anything and didn't move.

I grabbed him by his shoulder and one of his arms and pulled him up and then he said:" Why? You are acting strange."

NASA:" As if you would now me." I saw Germany just ones in my Life besides the thing in the UN Building, he doesn't know me.

Germany:" And you don't now me. If you kick me out, i will come back, and when i need to every day." I smirked at that and said:" Ok. Do it, but don't think it will get easier." With that i drag him to the Front Gate again.

Germany:" Why are you Protecting him so much?" I thought about that mentally and didn't gave an Answer.

Germany:" The UN can protect himself, he is not a kid."

NASA:" That is the Problem." I wanted to think that but said it accidentally out loud.

Germany:" What?"

NASA:" Nothing. ..but shouldn't that mean, that he doesn't need you? He can Protect himself, like yourself said, so go home."

Germany:" I didn't came to Protect him."

NASA:" THEN WHAT THE FUCK DO YOU WANT?"

Germany:" I am just worried and wanted to talk to him." I was standing still and hated myself for doing that but:" If you talk to

him, do you leaf us alone?" Germany looked at me like he saw a ghost and then said after calming himself down:" Yes." With that i let him go and looked at him. His ankle hurt, so he rubbed it and then i said:" Follow me, i bring you to him.....BUT you go nowhere else, this is military Property do you get that?" Germany waited a second before he then nodded.

UN POV:

After 3 Hours she made a pause. I got up and Mila talked to me.

Mila:" Sooo, UN how do you feel at the Moment?" I got trough my Program and then said:" I saw a lot of stuff i don't understand but other then that i feel good."

Mila looked at me confused and then asked:" Do you mean you feel irritated or confused? Or was that just an Info for me?" I thought about it and....i don't know. Why did i said it to her. She didn't asked for that info. I looked at the ground and then Mila said:" No Answer is an Answer too." Whit that she walked to the Door and got out of the Room. What ...did she mean with that?

This feeling confuses me. Like .....it should be something i should now but, just don't do.

Time went by pretty quickly, after nothing happened i got to stand by. I didn't want to wast any Energy, because i noticed it is a little bit low.....and then i got up again.

UN:" System Check..."

System Check.....

UN:" Energy Source"

System is checking the Energy Source.....

Energy Source stable and connected.....

correction..

Interference.....

Energy Source is connected but it is not Stable.....

A leak is detected.....the Wifi doesn't get a good signal, so the Energy can't be properly extracted.....

Problem search.....

.

.

.

Solution: Leave the Building, the Building is blocking the Wifi signal

I wanted to leave the building a long time ago, but i am not allowed to. Find another solution.

Search for another Solution....

Solution: Search for an alternativ Energy source

I got up and walked to the Door and opened it, it wasn't looked. Pleasant. I walked trough it and there was no one. Strange? I thought there would be more People. I walked trough the Hallway and searched for really anything that could temporarily be used as an Energy Source. I saw a Map of the Building on the wall. I looked over it and searched for anything that could be recognizable used as an Source. I found something. I started walking in that direction. 2 Left, trough the Cafeteria and then Right, walk straight the Hallway out of the Building and into a nearby second building. The Electricity Room. So i don't get lost i had the Map at the Right upper corner of my Vision. After i got out of the Building i closed the Map and walked straight to the other building. I noticed that even out here i still get no signal. It seems that the Complete area is sealed. I don't care why.

As i opened the Door to the Electricity Room, two guys holding Weapons looked at me and screamed:" Who are you? Are you the Intruder? What do you want?"

UN:" I am the UN (Probably) I am not an Intruder, at least of what i know and i just want to use some Energy because my is running low." The to (probably) Guards are starring at each other and then one of them made a call.

I didn't care and walked passed him.

Guard:" HEY." He pointed the Gun at me again and before he could react (or I) i broke his Arm. He screamed ,i could calm myself and walked to the Generator. Then one of the Professors walked to me and said:" STOP, when you get any Closer you will get hurt."

UN:" Is that a treat?" The Professor stopped and then said:" What? No? Dude, this is a Nuclear Reactor, if you get any Closer without a Suit you will melt down." I analyzed everything he said and then said:" I am fine." And opened the Door that was cutting me of from my Energy Source and then i closed the Door behind me, because it seems like the people can't survive that. I need to ask further about that or they could just give me my Wifi connection back, than i could google.

I walked closer to the Building and the Energy flying around in the Room already started charging me a bit.

Energy Source found...

Energy Level not high enough for complet Charge....

I don't care, it is better than nothing....???? That is confusing..... I...don't...care? ....it seems I use that word often....strange. I need to look for that more.

But then I heard a scream behind me I looked behind me and saw the NASA looking at me terrified but I didn't understand him. He seemed to notice because then he ran to the Panel and talked:" WHAT ARE YOU DOING HERE?"

UN:" I needed Energy." NASA looked at me like i was stupid, but then i saw someone new...well relative new standing beside NASA, his name was Germany, i remember.

NASA:" GET OUT THERE NOW?!" He looked angry.

UN:"....." I turned around and touched the Nuclear Reactor. (A big Metal Ball, looks like a tesla coil head thing)

Germany:" UN?! You will die get out there, you are not Invincible?!" And then i could feel the Energy. The reactor started to glow radiant. I extended my Wings but not only my one pair but my Second opened from its own too. And from my Wings started coming Lightnings, purple lightnings. The swirled around my Wings and then disappeared. My wings were fully Extended and i couldn't feel them Anymore.

Energy Charging 34%

Energy Charging.....35%

Energy Charging.....36%

Energy Charging.....not enough Energy in The Energy Source.....37%

And then everything went black, all lights went out only the lightnings from my wings were still there. I let go of the Reactor and my Wings Lightnings disappeared and i could close my Wings again. The Second pair disappeared completely again and the First one i let touch the Ground.

After a few Second the light turned one again.

NASA:" BRAVO." I turned around and looked at him and he looked.....disappointed?

NASA:" GET BACK HERE!" I didn't had a reason to stay here any longer so i walked to the exit. I opened the Door and was greeted not with NASA but with guys in Hazard Suits and a Radiation Detector in there Hand scanning me. I didn't move and after a few seconds one of them took the Helmet of and said in disbelief:" No Radiation? How is that even possible." And i just answered.

UN:" Because i absorbed it as Energy, it would otherwise be a waste."

The NASA Slammed his own face and then said:" I forgot....Energy."

He sighed and then looked me in the eyes and said:" You could have told one of us if you needed Energy we would have brought you one."

UN:" If you say so, my Energy level is not full, the Reactor was to low on Energy." He sighed again and then said:" Ok. After we talked ok?" I nodded.

NASA walked in front of me and then i saw Germany again he looked confused. He started approaching me and then said:" Are....you ok?....how?...What?" And then i saw NASA turn to him:" Oh right....UUUUNNNNNN." I looked at NASA and he looked now very angry.

NASA:" I forgot to tell you, That was the worst time you could have done that." I didn't understand what he meant, is there a good time to extract Energy?

I hope you guys like my Picture :D (Even when it is not the greatest)

Wordcount: 1911

9. Cloud

After the UN was brought back to his Cell Germany wanted to know what is going on. And is Bombarding the NASA with Questions.

NASA:" Calm down."

Germany:" CALM DOWN? WHAT THE FUCK IS GOING ON? I noticed that the UN is acting strange but.....what was that?" The NASA looked to the others and wasn't sure what he should do now. He thought about it and then the NASA Sighed. He looked at Germany and then Marcel intervened and said:" Don't if you tell him anything. We are in big Trouble."

NASA:" We ARE in big Trouble. And besides that Elsa didn't you say you need a helping hand?" Elsa looked troubled, but then she nodded and said:" Yes.....but.....he is a civilian. We can't drag him into this mess."

Germany:" Aren't i already in it?" We all looked Germany in the Eyes.

NASA:" NO, you aren't. But you will." Then NASA took a step closer to Germany and took his Arm and started to drag him.

Germany:" What? Where are you taking me?"

NASA:" You want to now the Truth about the UN? here you go. ELSA." As the NASA said Elsa's Name, Elsa started going behind them and followed. Then they stopped in front of the Room of the UN.

Elsa:" Are you sure?"

NASA:" I can't change what happened." Then the NASA opened the Door and Germany could feel a slight pressure. He didn't know what to expect. Then all of them walked in and everyone saw the UN sitting on the Bed.

UN:" Hello NASA."

NASA:" Hi UN." Then the NASA pushed Germany in front of everyone and said:" UN this is Germany. You already meet him."

Germany: "Why are you introducing me? We now each other."

The UN was standing up and Germany needed to look up and then the UN reached his Hand at Germany to shake it and said:" Hi. My Name is UN but as you said you probably now me." Germany was confused, what is going on?

Germany POV:

WHAT THE FUCK IS GOING ON? My Brian is overflowing with every possible Emotion and Scenarios. I open my mouth too say something but it took me a Second to get a sound out.

Germany:" ……What happened?" I saw how the UN looked at me confused and said:" What do you mean?" Then i looked at NASA and Elsa. And Elsa was walking at me. She stopped at me and said:" He…..is an A.I. And the Electric Impulse killed his System sooooooooo he lost his Memories and everything else. That is why he is here."

.

.

.

.

.

.

.

.

.

.

.

WHAT?!

Germany:" WHAT?" I didn't really understand. Does she want to say, that the UN.....isn't really are Countryhuman?

Germany:" So.....the UN isn't a Countryhuman? When he is a A.I he can't be a Countryhuman. But then he wouldn't have the rights to lead the Group,....i don't get it, how?..."

NASA:" The Only Reason he is Leader is because nobody Knows." Wait that means.....

Germany:" So that is why nobody should know." The UN then lets his Hand down again as he noticed Germany won't shake it.

NASA:" Exactly. So i hope you understand it stays under us." I nod and look at the UN again. Is that a Dream? I .....now the UN. I was talking to him so often and now? All was a lie? .....NO, even when it is that way, i should now the Best that that doesn't mean anything...i look at my Metallic arm and then at NASA and say:" And what is the Plan now?"

Elsa:" We try to restore his Memories. And when possible his Systems but everything is Damaged that is why a helping hand would be helpful." I see. I look AGAIN at the UN and ask:" And how do you do that?" Then Elsa walks up to the UN. And says:" UN when you would be so nice?" Then the UN straightens his Hand at Elsa and a plate opens at his arm and a Cable comes out. It just looks strange for me to look at. Then Elsa grabs the kabel and looks at me and says:" With that i can connect to his System, but of course i would need my Laptop." I look at UN's Arm and don"t now what to think of it but i get myself together and say:" Could i look at it?"

Elsa:" Of course do you have your Laptop with you by any Chance."

Germany:" I don't need one." I take the Cable and put it in a Slot of my Metallic arm. and then Elsa says:" That will work too." I open something on my Arm and a display opens. Now i see all the Data

from the UN running trough my System. Only to think that is Crazy. I still feel like i am in a Dream. Now i look over the Data that i can see on the Display and.....it is Crazy.

.

.

.

.

.

.

There is almost NOTHING. There are only Scraps of Data flying here and there. How does he even Function? I look at the UN in disbelieve and then Elsa says:" Now you now the Problem." I look at Elsa.

Germany:" Problem? PROBLEM? What Problem? There is Nothing. You can't even consider that a Problem. How the FUCK is he Working?" Elsa only shakes her Head and says:" I don't know. But i would say because he Functions his Main Program is still intact and more Information i don't need ,to get Motivated." What?

Germany:" .....Who.....made him?" Elsa looked surprised at me and then to NASA. And then NASA spoke.

NASA:" No one."

Germany:" What do you mean?"

NASA:" I don't know if you still remember, but that you now that he is a A.I is already a big No GO. So i would prefer ,if you wouldn't ask any More Questions." He looked at me as he would warn me. No he Glared. It WAS a warning.

Germany:" I Understand." They Probably made him. That is why they now it.

NASA:" Well i let you guys do. I have work to do." With that he sayed Goodbye and left.

Elsa:" Ok. I get my Laptop and then we start."

Germany:" What exactly is now my Job?"

Elsa:" Easy. We try to restore him." Easy? But before i could say anything else she already left. I thought what just happened.

UN:" Can you say to me, if my Name is really UN?" I almost died because of a shock. I completely forget about UN. I look at him in Shock and then rather unsure say:" Ähm.....Yes. Your name is UN. Or Long, United Nations."

UN:" United Nations. So it is true. When an Outsider it says, it must be true." Outsider?

Germany:" Tell me. What is the last thing you remember?"

UN:" I can't really answer that question. I remember a Second from last Year. Or 10 Minutes from a Festival from two years Ago, but if you want to now what the last thing is that i completely remember, that is nothing. I have only little Memories." That makes NO sense.

Germany:" You ....are an A.I But your Answers are nothing like a Robot ore something from the Kind. I can't Believe that our Technologies is that much in the Future. It is just.....Unreal."

UN:" I am Sorry, but i don't now what you want to say." I shake my Head and say:" Nothing. I just talk to myself."

UN:" Does that everyone?" I look at him surprised then he says:" I noticed that a lot people do that. Is that Normal?"

Germany:" well.....i think so. Everyone does it. Kind of." How am i supposed to explain it to him? Then i noticed UNs Eyes and it clicked in me. HIS EYES. Now they make sense. He always had the strange thing on him, when he gets Angry or is annoyed that his eyes turn Black. I mean the White Part. He doesn't show it open so that his Eyes chance is the only thing how we can see that he is Angry. But i found it always Strange. But at the Same time not

Strange enough to get suspicious.

Elsa then came back with her Laptop and connected it directly. She looked at me and asked if i am Ready and then we started. I don't now what we are searching or what we are even trying to do, but lets find out.

We are now 2 Hours on it and i start to get bored. I stretch myself for a second and get the first looks of the Room again after two Hours. I haven't looked up from that damn Display. I look at Elsa again and she is Completely Concentrated on her work. I look at the Display again and then i see something flies past me. I put my Complete Concentration at the Devise again and look after what flew past me. I search a wile and then Find it and say:" Elsa? What is that?" Elsa looks up from her Laptop and looks at my Display and says:" I don't know, i never saw something like that." It was like a little Particle, nothing someone would recognize normalize, it was Blue and it almost glowed. I noticed that it got faster and flew to a specific location, and i said:" I am going to follow it."

Elsa:" I don't think that is going to be Helpful."

Germany:" Do we have anything better to do?" As Elsa didn't answer on that, i started to follow it. It was going faster and Faster as something would pull it, i could barely keep up. But luckily i did, because i found something incredible.

.

.

.

.

.

A Connection to the CLOUD. I looked around and saw the little Particle disappear in a Wave of Data.

Germany:" Elsa look at that." Elsa looked at me again and her Eyes went wide and she said:" Is that the Cloud? How did you got there?"

Germany:" The UN is connected to the Cloud it seems."

Elsa:" That means there is a chance that all his Data and programs are in the Cloud."

Germany:" I thought, Military Stuff is Forbidden in the Cloud."

Elsa:" Normally yeah, but the UN never followed orders.....sadly." Then She met me with her Laptop and we Both looked inside the Cloud if we could find anything..

.

.

.

.

.

.

.

Elsa:" BINGO."

Germany:" You found it?" Elsa looked at me again, and there were blueprints from different things and Blogs, Videos ,everything....almost.:" The last 3 Years are missing. It seems he uploaded every 5 Years."

Elsa:" That doesn't matter we can just say, he lost a little bit of Memories because of the Electricity. We just need to upload it till tomorrow and we did it."

Germany: "That won't work."

Elsa:" Why?"

Germany:" Did you look at the Size of the Data?" Elsa pressed her eyes together and then her eyes went wide:" 6539 Terabyte?" She was in shock.

Germany:" He uploaded everything. So i think that that is even less that i would have expected from it."

Elsa:" Then.....we just give him the Useful stuff. Like his Program and Political memories."

Germany:" That won't work. He didn't sort it, that means everything is one big data. All or Nothing."

Elsa:" How long will that take?"

Germany:" When his Systems are fast then.....2 Years. In 2 Years everything should be uploaded." Elsa didn't say anything after that, she thought about everything and then said:" OK. Then let's better start. We can't do anything against that, we just say that he has Amnesia or something, i mean, we get his Memories kind of back, so i think everyone would believe it." So she wants to lie.

Germany:" So...you want me to lie?" She looked at me and was confused and then said:" .....No? You don't need to say Anything. Don't Answer, then you don't lie." Wow. Brilliant.

Elsa:" Anyways i go to NASA and tell him about the Cloud and you could start the Upload ok?" I nodded and then she immediately left, she was Happy i could see it. I turned to the UN who now was asleep. Or at least at standby. I took another Cable and Plugged at the Laptop from Elsa, then i opened the Cloud and searched for the right File, because we need to start at the Beginnings, or when we would download the Data the other way around from today to yesterday, he wouldn't be able to use the Data. So i search for the First Data he uploaded and started the Upload. In one Day he should get the Data from 38 Days ..... A fast learning Program. From that i needed to Laugh. As i looked at the UN again i felt weird, i still don't know how to think about that.

Sigh.

Wordcount: 2201

10. The Meeting

Germany POV:

The next day.

I was sent home after it, i sent the data to NASA but I was watched, I noticed one of the people from NASA chasing me, it wasn't a nice feeling. But the next day I woke up with a loud ring. I take my cell phone and see that I have a meeting today. I turn off the alarm clock and get dressed. But already, while brushing my teeth, something occurs to me. I drop everything and run to my phone. I look again and it actually says UN Meeting. Damn it, I totally screwed that up. NASA doesn't know anything about it and if the UN doesn't come back in time, it will be noticed. I was already dressed, so I ran straight down. I grabbed my car keys and stormed out of the house and into my car. I put the key in and gave full throttle on the direct route to NASA base.

I was in a great hurry, but a car followed me non-stop. At first, I thought it was the police, but then I realized that NASA had the guys on me and almost screeched out. I drive to the side of the road and get out. The guys stop right behind me and I walk towards it. When I stop next to them, they roll down their window and a gun is pointed at me. I am shocked for a moment but catch myself and say before they could say anything: "You have to inform NASA. I totally forgot that there is a UN meeting today." People look at each other and then say, "What do you mean? We have nothing to do with it." Of course, they don't know anything, it's just a handful, then I say: "Just tell NASA. You have a radio, right?"

They looked at each other again, and then one of them said:" Ok. But only this ones, if you trick us you will get punished." I nod, and then is see how he takes the Walkie-talkie and talks with someone. I wait, and then he said:" Don't you need to get to the meeting too?" My Eyes went big when I realized, that he was right. And then he said too:" We handle our Problem and you yours." Without hesitation, I am running to my Car. And start to turn around and

drive with full speed to the meeting.

As I get near the building, I notice how all the Stress is not good for me. I get a Coffee on the Way to relax a little. As I get out of the car, a few people look at me. No Wonder, normally I am one of the First ones here, but now I am almost late. I run up the Stairs and wonder how they will get the UN here in time. But the Moment I enter the Main Room, I see the UN already standing there. My Mouth falls open, and I look at the UN. He sees me and smiles a bit. I have a bad feeling about all of that. How did they handle the problem?

China:" Is everything alright?" I got spooked and turn around to see China behind me, then I say:" Yes." I turn again around and go to my seat.

And right after that, the Clock says 10 am. The meeting starts.

The UN straitened his Posture and cuffs loud so that he gets everyone attention. So far so good, then he welcomes everyone and officially starts the meeting he hands everyone a piece of paper and goes back to his seat. He is really doing good, I wonder how they told him so fast what to do? Wait.... they don't did they? I look at the UN when he was turning around and saw something in his Ear, a mike? Of course, they're telling him live. That helps me to relax a bit and it seems that was noticed from my sitting neighbor Polen.

Polen:" Everything alright? You look stressed?" I turn to him and just say:" No everything is fine, really. I just needed to relax a bit, the Tram and all, stressed me."

Polen:" Oh, ok." I really am Stressed but i know why. I feel like i could kill someone. Sigh.

The Meeting starts like always, he starts with telling everyone what is one the paper. Then He asks If anyone has questions about the topic and the show is on. The first topic was Africa. Another sickness was going through the countries. When a country needed to talk he needed to say the countries names, but that wasn't a problem, since everyone had a shield with there name on the desk, and he is an AI right? Means he should remember them very

quickly. He said the names and then there were talking on their own. UN didn't need to do much. Maybe i panicked without reason.

No, it only started. But NASA knows what he is doing. It goes on for an hour and i still can't fully relax. Then the topic Africa was for today finished with a few helpers out of America and the UN. After that, Europe was on the topic. I should now listen probably but u was way too nervous. But then someone said my name multiple times, i snapped out of the starring at UN. I looked at Switzerland, who looked pissed. I looked around and it seemed that i was supposed to say something. I haven't listend to them at all....shit.

Germany:" what?" Now he looked even more pissed and Poland asked again:" are you sure you are ok?"

Switzerland:" we were talking about the problems in Italy. We were asking if you could help or at least say something to that. But it seems that is too much too ask." He was pissed. I would probably be too. I look at Italy and then I say in the round:" sorry, but i don't see the necessity to do anything. Italy isn't in a critical situation at all. To that i have my own problems, means i can't afford to put more money in other countries to that what I am already doing." I got lucky that the topic was already discussed with him personally. Switzerland looked at me a little surprised, but was still a little bit salty.

UN:" then that is discussed too. Switzerland let it go." Switzerland looked surprised at the UN, i did too. Oh no.... NASA is never at UN's meetings he has no idea how he reacts. I look around and everyone noticed.

UK:" sir? Do you feel ok?" The UN of course looked at UK and seemed to have no clue what he did wrong. I get my phone secretly out and try texting with NASA. I just need to hope he reads it.

Read it, come on.

UN:" UK please, sit down again. That goes for everyone, could you guys please keep going. Or else we won't finish today." UK looked confused at UN and then says:" sure." And sits back down, but still looks confused at UN. How do i get him to scold me? Fuck.

And then I heard it a little ding from my phone. I look at it and NASA read it and texted back. And then it came.

UN:" sigh.... The day was already rough. Italy and Germany have discussed that matter already, so i knew what he would say or what the outcome is, the only thing that really annoys me is that he seemed to have spaced out, that was unnecessary. But Switzerland, doesn't have to make a fuss about it, so please if everyone could calm down again, that would be very nice or else I need to give some Homework again." Wait how did he know about that? No one should know that I talked to Italy already? And Homework? Everyone went stiff. No wait, these words that sounded like UN not NASA. Did NASA tell him to say that? Did I mention the Discussion with Italy at NASA's? I don't think so....so how?

UN:" It seemed everyone calmed down, now America would you please stop texting Mexico? And France, please, everyone can hear you talking to Australia." What is going on? I didn't hear anything. Then I got a message, but before I could look at it the UN looked at me and said:" Germany, you too. Please put the phone away." I looked at him surprised, but I put the phone away anyway. It wasn't important probably.

After that the Meeting went very smoothly even though I must say it was almost scary, the moment someone had a Phone in their hand the UN would immediately know. So after 20 people got screamed at, that they should put their Phone away, no one had one anymore in their Hand. So 5 more Hours passed and the meeting was almost over, only 30 more minutes.

UN:" So everything should be discussed, then we come to the last Topic for today, WHO. She wanted to talk about the new Virus in Africa and how it should be handled, should it come to other regions." Then the Door opened and WHO came down to the Stage. She really came last Minute. She walked fast down and then apologized to the UN that she is a little bit Late. He only looked at her and said nothing. OH NO. I hope he knows that she is his Sister. At least they act normally like there Siblings, even though everyone knows there not.

WHO:" UN? You.... look different." WHO looked confused at UN and

then said:" Are you angry?" The UN looked at WHO and just said:" No." WHO then pressed her papers on her body and said unsure:" ok."

UN:" Could you please do your speech?" Then she looked surprised at the UN and said hasty:" YES." She turned around and after a little cough she started already. The UN only looked around if everyone was listening.

And then nothing really happened. The speech was over and now only the UN needed to do the end speech. But it didn't came. He just stood there and didn't move at all. He is making me more nervous then I would need. WHO looked at him, she was finished, she came closer and touched him slightly and asked:" UN? Did you fall asleep?" And then I just noticed, together with like probably everyone else he didn't had pupils anymore. From an robot sight I would say the lights are out. *Did* he fall asleep?

Then the first countries started to stand up and started worrying. I was one of them. WHO touched him again and then everything happened pretty fast. The UN grabbed the arm of WHO and lifted her from the ground. He grabbed her pretty strong because she said:" it hurts, it hurts." He was holding her in the air, since he was way bigger then her. And then she said:" I am sorry....please i didn't want to scare you." Right, I remember. When the UN got scarred he got sometimes aggressive, maybe the NASA can play it down with that. But then I did notice something that made my anxiety go turn up 280%.

His pupils were red.

11. Don't Kill

UN Pov:

I was on stand by because the Speech took over 3 Hours. But that is not all. As I was listening to this little girl, I heard something, another memory. Or whatever these things are. But before I could watch it in its entirety, I was interrupted. Someone touched me, I was trying to ignore it and Concentrate on this Signal, but then I was touched again, and I had a feeling of disliking. I activated the Security System and as I controlled my Body again, I saw only one person standing right next to me, and grabbed her. She started to whimper, and I looked her directly into her eyes. But before I could say or do something, I heard someone scream into my Ear, to let her down.

It was NASA. He was giving me this order over the Walkie-talkie in my Ear. I listened to what he said. But the only thing he said, over and over, was something from, letting her down, or we are in trouble, or I am. I didn't really listen.

Threat detection……

Threat not located……..

I let the Girl slowly down and she rubbed her ankles. I looked then around the room and could see a few scared faces, but the most of them were more nervous.

Threat detection…….

Threat not located……..

I then looked further to a few reactions and saw Germany. He looked more nervous than the rest. And I mean by a good bit. We both looked into both of our Eyes.

China:" Did…..you fall asleep?" I looked into his direction and saw

that one of his eyebrows were up and he looked confused.

Russia:" UN, is everything ok? You never had something like that happen.....IN a meeting."

System reparations.....

System .....1 % restored.

Data .....

Saved.

Russia:" Did you fall asleep again?" It seemed I am only looking at him. I learned that when someone asks something, to answer.

UN:" No." I said it plain, but that seemed to surprise him. He seemed now nervous too. Was that wrong? I then hear the Voice from NASA again and he says:" Excuse yourself, i want to talk to you....NOW." I did as he told me, and walked out of the Meeting Room.

Russia Pov:

WHAT WAS THAT?

First his Eyes glow red, what never before happened IN A FUCKING MEETING. I mean yes, we know about that, it happened I think a few times before, but .....FUCK. And then he started to turn, so

silent. Normally, in meetings he talks like non-stop, but after her Speech he was silent. Did her speech do something to him....or.....was it the thing that happened a Week ago. I got a Hand to my chin and Kazakhstan then asked me:" That was weird....Do you know what just happened?" I look at him and only say:" I don't know, but whatever it was, my gut tells me it is not good."

China:" I thought you would say, it is America's fault." I look annoyed at China and say:" i am not giving him ALWAYS the fault."

China:" Sure, sure." Then he got up and started to leave as well.

Kazakhstan:" Where are you going?"

China:" on the Toilet. What? When the UN can go, then I am allowed too, right?" With that, he left.

NASA Pov:

Should i Just activate the fire alarm? No, that would probably trigger him. I Just want all this to end. We are only here for...what? Two hours? God, i Just know I am dying Young.

Then I See UN finally turning the Corner and I run to him and say a bit loud:" Why did your Security System activate?!" I know it. I Just know, i will die of Stress.

UN:" I Saw another of These Visions." Huh? I raised an eyebrow, what is He .....oh. i sighed and asked:" but why did that activate the system?" I Turn around and Walk Back to my little Tablet and sit back in my Chair. I let myself Fall in it. I am so done.

UN:" someone touched me, and that interrupted it." .....omg.

NASA:" UN. No. Just No. You are in the middle of a meeting. The next time you have something like that in a meeting, ignore it. This can never happen again. Ok? Did you get that?" Die UN didn't answer immediately, and He looked to really think it over and then nodded. Good.

NASA:" could you, now, please. Deactivate the Security System." His Red eyes glow in my brain. I will have nightmares today.

Then his eyes Turn Back to blue and UN suddenly looks behind him and, sure enough China is walking in our direction.

He stops a few feet away and looks confused at us and asks:" NASA? What are you doing Here?" How unnecessary.

NASA:" I am Here, to check a few Things. UN has Not completely healed, so I wanted to make Sure, nothing goes wrong." Then I Look at UN again and my brows sink and I say more:" but it seems, He is still a bit Out of it. Sorry for what happened." China Looks even more puzzled and asks:" why are you apologizing?"

NASA:" ....i feel responsible." Then China waves his Hand in dismissal and says in a Happy tone:" oh No. Don't. We all are just stressed, it seems." He then Looks at UN, Who Looks Back at him, and China comes a bit closer and then silently asks:" are ...you ok? Now." The UN doesn't answer, of course, and instead looks at me. Moron.

NASA:" No. But we're getting there." China Looks now even more confused and Points at the UN and then me, but after opening his mouth, He immediately closes it again. His Finger falls and He corrected His stance and then says:" If He doesn't feel Well, He shouldn't have come."

NASA:" it is a UN Meeting. I think, He is required to come." China Looks again at UN and then shrugs and walks Further away:" Well I need to pee. You two do, whatever you need to." And then he's gone, further the hall down.

China Pov:

Something is definitely Not right. Why did the UN Not answer himself? I felt Like I was only talking to NASA, even though this was a discussion with three people. And the way UN looked at NASA.

As if He wanted him to answer. Or ....asked for approval to answer? I mean, I Understand that He is probably still a bit Out of it. But that is something Else. That is Not being a bit Out of it. That is Just plain right weird.

I want to put my nose in it, to be honest. I would love the truth right Here.....but it is the UN. If I Put my nose too much in it, it could fall off. I better let it be. I can Tell the Others what I noticed and thats it, maybe they see more in his actions, than i can.

WHO Pov:

My arm still hurts. I can clearly see, his Hand Print in it. He is still really strong. I noticed that pretty early on. I once saw him lift a fucking tree, that fell on a Car from one of the countries. I don't know who it was again, but i remember we both we're stunned.

.....

I am worried. His Red eyes. The last time i saw them, was on a Battlefield. When He once followed his Troupes, his eyes turned Red, a lot of countries saw that, and it was a bloodbath. Even though UN is a Organization for Peace, He is definitely capable of killing. A cold shower goes down my spine. I felt Like I was his Prey, like I was going to die. When I saw These eyes, I needed to think of what happened on the Battlefield.

And that He didn't listen. He was in his own mind, I wonder what He thought about..... Wait? Maybe did he remember the Battlefield? Was he remembering These old days, that would explain why He reacted that way....right?

Ukraine:" WHO? What do you think happened?" I look at her and see that a lot of Countries are still a bit confused and afraid. I smile and feel exposed. Somehow, either Ukraine or Poland always call Out on me when I know more than Most. A bit creepy..... But UN too....when I think about it.

Who:" it is Just a theory. But He ....probably was remembering the war. You know when he was on the Battlefield...that's why he reacted this way."

Ukraine:"..... It would make sense....but why?"

WHO:" I don't know. Something must him made remember, and when I touched him, He overreacted. Who wouldn't."

Russia:" I don't know. Didn't he look far too relaxed, for that. I wouldn't feel so well, when I would remember.... These days."

WHO:" Well..... Yes. But then again, you did see UN fight. He never seemed to really let it get to him. .....Do we even know, how he looks when he is stressed? I mean, he always seems to hide it. To reassure us, so maybe he was in stress." I looked questionable at Russia and then Ukraine, as suddenly China came back.

He noticed the Shift in the Atmosphere and asks:" what did I Miss?"

I only sighed.

Russia:" later, maybe." Yeah, I don't want to think any longer on it, too.

China didn't seem happy with that, but let it go, he also was thinking about something. We all were waiting, that the UN would come back.

After only 5 Minutes I see Germany, standing up and leaving too.

And after that only a minute later, he came back, he was probably just in the Bathroom, and the UN came back. He walked directly to his Podium and everyone seemed a bit more relaxed, that he is his old self again, but the edge in the atmosphere never fully disappeared.

UN took a Microphone and said:" I apologize for what happened. Since I still have not fully recovered, I will go rest. WHO." he then points at me and says:" She is going, to lead the rest of the Meeting, everything is already on paper, just follow it." I nod and UN smiles at me. That helps me to relax. He really seems to be his old self.

I walked to the Podium again and took hold in the Middle, and watched UN leave through the door again, and while the door was open, I could see NASA just for a second standing behind it. The door closed, and it immediately got loud, everyone had questions, so I opened my Mouth and said with a firm Voice:" ONE AT A TIME." It was silent, and i said further:" You are not Children. And I think it is disrespectful, to talk behind his back. When the time

comes, he will probably explain to all of us, what happened. But what you are doing right now, is what kids do. Creating Rumors and no given facts." After that, everyone was silent and seemed to agree somewhat. So after I took control of the meeting, we followed the points on the Paper, with me starting again, with my Topic and explaining the rest, that was interrupted.

I hope he is fine.....but his Smile... I am sure, he is fine.

Wordcount: 1910

12. Loading

NASA Pov:

We survived the meeting somehow. But it wasn't really the wanted outcome. We need to bring more memories back, before he is allowed to make contact. I don't want a repeat of this.

Once we finally arrived back at the NASA building, I make sure that at least one person, has an eye on him at all times. While I go into my office and check in with Germany. I ask how long we have till the next meeting he has to attend.

I waited a moment, before I decided to check later again. He is still in the meeting, so he is probably busy. I walk back down the hall, to where I left UN and the first thing I see is someone hanging on his arm, as he lifts it. They seem to have fun.

NASA:" What are you doing? Don't you have toys at home."

Elsa:" How cruel of you, to call him a toy. Joe just wanted to test his strength."

NASA:" You are the ones using him like a toy, so I called it out." I turn to UN and add:" You don't have to do, what you don't want to do, okay? Don't play along in their shenanigans only because they said it had dome higher reason. They talk a lot of bullshit."

Ryan:" Hey?!"

Milla:" He is not wrong though. I told you guys too, not to annoy UN."

Elsa:" I don't think, he can get annoyed. His emotion system is still down."

NASA:" I hope you are aware, that that is a bad excuse." She holds her hands up and doesn't add on that. And I turn to Joe saying a bit shocked:" And I expected better of you Joe. You are supposed to control UN and make sure he stays in line, and then you pull stuff like that?" He just shrugs and says:" The Atmosphere was really pressing, so I thought it would soften it.

These people, I swear.

UN Pov:

I notice NASA bickering with the others, before he leads me back into the white room, I was last time and was plugged back into the Computer by Elsa.

Nasa:" We need to restore as much Data as possible and as fast as possible. I don't know yet, how much time we have. But we definitely can't lock him up forever. People will get suspicious if he doesn't show up outside of meetings, too."

Elsa:" Doesn't the UN also take personal requests? Where is his phone?"

NASA:" I told Germany, to tell everyone, that because of the stress of the last weeks, he will not be taking personal meetings. But I don't know how much time that gives us. Politics are not something that can be postponed forever."

And so we started. We searched through the damaged database for anything.

Memory's of 88 Days are already online.

Information about the Fall of the USSR was saved and uploaded.

After 12 Hours of constant work, we needed to stop and take a break. NASA explained that Humans, can't work without proper sleep in between and so Elsa and the others left, to do just that, while NASA and I stayed behind.

NASA:" Else already told me, we made progress. But what do you think? If we did this everyday, how much would we have in two weeks?" A very specific timeframe. I think over it and let the system calculate.

2 Weeks, equal 14 days. The Progress was 0,15% times 14, is 2,1%

UN:" The Progress would be 2,1%. But only if the progress were stagnant, which I hardly believe will happen."

NASA:" Then lets take 2% as our Goal."

UN:" Can I ask why 2 weeks specifically?"

NASA:" In two weeks, we can no longer keep you here. Germany told me, that is the maximum of time UN ever took of, and it was because of a fatal wound he got in battle once. So longer than that, and people will get suspicious." I nod after his entire explanation and save the time frame up.

Timer set.

And with that, we repeated the progress every day. The Numbers as predicted swayed a bit. Sometimes we managed more, sometimes less. But NASA was happy either way, which I found confusing. Because right now, it seemed we won't manage the two percent mark.

Elsa:" Are you okay?" I open my eyes and slowly look at Ela.

Normally she barely talks in these sessions, and especially not because of such trivial stuff.

UN:" I am perfectly fine. Which you should know. I was not attacked." I couldn't have gotten any physical damage.

Elsa:" I know that. I more meant, emotionally..... which in hindsight was a stupid question to ask. But... after the third day the data flow seemed to slow, and I just wondered why? Originally, we thought it would go faster over time, yet we see the exact opposite, so I thought that maybe... you don't feel so good." The last bit was more muttered than anything. I also didn't give her any further of an answer, since she seems to think about something herself, and probably would not her me anyway.

I remember NASA explaining that to me yesterday, since I got confused why someone would ask a question and not want an answer. It was called rhetoric. But he also explained that there are people, who don't do it purposely, like Else sometimes.

So I close my eyes back up and try to follow more of the glowing lights, in the data flow, as I suddenly notice the image glitching. I open my eyes, out of a reflex it seems and suddenly, my vision is darker.

Check Energy level.....

12% ..... dangerous level. Please Recharge.

How strange. I charged every day, a tiny bit, after Elsa and the others left. The intake should have been more than what we would use. So why has it lowered, in such a dramatic fashion, too. I had over 50% last week, after the meeting.

And then it glitched again.

..... Trying to build a connection to the world Server.....

World Server?

Elsa:" Hey, are you okay? You look ready to kill someone. Hey.... do you hear me?" I can't move.

.....connection build.....

...uploading.....

It eats my Energy reserves.

.....

I get blinded, and my eyes immediately switch over to infrared, but I still can't see anything. Are my eyes broken? No.... Slowly a scenery starts building in front of me. It is like last time, but this time, I didn't chase after a flickering light.

I look around and see Buildings on all sides. I don't recognize the flag. But it is everywhere. It hangs off of every balcony and when I turn around, I see a big gate like structure. It has four horses on top and looks rather old.

Where am I? The flags are red, with a white circle and some black symbol in the middle...

System connection building.....

Success.....

Suddenly, I know exactly what flag that is. I also know where I am. Germany, in the year 1940.

Failure.....

Warning: Reboot.....

Trying to reconnect to the World server.....

It was just a glimpse. But all my immediate questions were answered. But now I have different ones. Why does Germany look like that? I can see soldiers walking around the houses, seemingly patrolling. And this flag.... Germany has a different one.

I start walking towards the gate, as this is the most eye-catching thing here. But as I raise my hand to touch it, I suddenly get shoot into the hand. I don't feel anything, but it bleeds. Its red. How

weird.

Soldier:" YOU. DON'T TOUCH THE GATE." I turn around and see a soldier looking pissed and his gun aimed at me. That is new. Normally people around me, don't notice me. All the other times, I was just a watcher, not a participant.

Soldier:" You are lucky, that I saw it, and not my college. He would have shot you in the head." It is hard to understand what he says. It seems a bit blurred, but still clear enough for me to understand that he didn't like me. He seems to take joy out of this Scenario.

Soldier:" Yeah, that's right. And now scram." I didn't even say anything. My legs suddenly start moving in the opposite direction, and not slowly.

I seem to run back into the city part. I don't question it and look around instead. I notice my hand is still bleeding and I seem to leave a trail behind. But more interesting are the buildings. They all look very old and gorgeous. But it also feels unusual how many flags are scattered around here. The Germany flag is on every window, balcony, every door and sometimes it also hangs on a streetlight or other pole like structures.

I stop running at a door, of one of the buildings, and knock on it. It doesn't take too long, until someone opens it.

I know this person. I have never seen her before though..... But she feels familiar. It is just a human. A woman. She looks at us and as she recognizes us, her eyes tear up and she goes onto her knees.

Her knees? I should be bigger than her... But now I am tiny. The size of a child. When did that happen?

She takes our bleeding hand and pulls us inside, taking out a first aid kit and cleaning our hand. The entire time, not a single word is spoken, until suddenly:" did you try to touch the Brandenburger gate again?" I at first didn't even understand her. Now I notice it is the same weird accent, as the soldier. This.... They are not speaking English. That why it sounded so weird to me.

But I understood her.

Woman:" Thought so. I still don't understand why you risk yourself like that. It is just a piece of stone." It seems again, I answered without actually saying anything.

Am I participating? Or am I this time, just in the body of the person, I am watching normally from the outside.

Reconnect successful.....

Information saved in the world server is uploaded.....

I suddenly feel very dizzy. And then I see black again and then everything happened really fast. I see different places and people in split seconds. The information about the second world war is flooding me. I can see everything. I see how it started, what this flag represents and how the people die, gruesome deaths. At one point, I can feel the fire burning on my skin, and a few bullets penetrating my skin.

It is no real pain, since I can't feel anything, but at the same time, I can see the blood gushing out of the wounds and drenching me red. My blood is not red, no Countryhuman has Red blood. Its golden. And mine is blue. Those are not my wounds.... Right?

...
...
...
...
No, this is my blood. And my wounds. This is me. I am everything. All these memories of other people ....is me.

Ryan Pov:

I was having breakfast right now. I am so hungry, and because of that even more happy, when I could finally open my lunch box. I get my sandwich out of the box and am ready to bite into it, as the alarm goes off.

I look up and hope and prey, it is a false one or just a technical problem. And then the lights go off, with the sound, and the color is black. Shit.

I stand up, just put the sandwich back into the box and start running. My stomach reminds me again, that I have not eaten today, and that makes it all the worse.

I didn't know yet what was going on. But black means UN. And that is never a good thing. Fuck, I hope it isn't his security system flaring up again.

Elsa was with him.... I hope she is okay. I run as fast as I can, and decide pn the way to ready my weapon. In the worst case, do I need to shoot at the memory disk, to knock him out. But that would also delete all progress we made.

I run around the corner, to the big hall we all normally are and see Milla standing there, seemingly panicking.

As I run to her, she notices me and seems relieved. But she also looked serious and stern, as she also starts walking, when I get close enough. And so we both tun next to each other, wherever Milla is leading me.

Ryan:" What happened?"

Milla:" I don't know. I just know, people got hurt." Fuck. I feel the grip on my gun tighten. Then I also hear commission upfront.

Someone screams and I can see the room Elsa and UN always use. The walls are cracked and the door is no longer in its place, but on the floor.

I turn around the last corner and look into the room and am ready to shoot at any time. And I see UN. He is standing there, looking at me with glowing Red eyes. I pull the Gun, but before I can even shoot, he moves his arm, to which Elsa, who is in his hand is moved in front of him, blocking my sight. I have fear shoot through me and Elsa screams at me:" Put it down."

Ryan:" AS IF?! UN Is a Danger like this. We can't ignore that." I need to be ready to shoot Elsa if it comes down to it. I scan the room further and see that Elsa has burn marks on her arms and head. Her Pants are smocking a bit, and all together it looks like a bomb went off. And then in the moment, of me still trying to understand what happened, I get Elsa thrown at me. I fall down with her, loosing my weapon in the process.

Ryan:" SHIT." The next thing I know is UN leaving the Room, not running but just taking a walk outside. With Elsa on top of me, I can't reach my gun and Elsa is way too hurt, to move herself out of the way.

Elsa:" I am sorry."

Ryan:" You have nothing to apologize for." I try to be gentle as I move Elsa of me and ask:" What happened." Milla helps me now too, after coming out of the hiding.

Elsa:" I am not sure. He suddenly stopped moving and he also didn't respond to me. I just thought that he maybe had another flashback, like last time. But as it was taking so long, I touched him and noticed how hot he was. He was steaming hot. And only a second later, he ....exploded? No, more like a steam explosion. All the heat was released. No, now I remember. It was lightning. Energy was released for some reason and it took me a bit to wake back up. But as I came to me, the Room was destroyed and UN's Eyes were glowing red. After that, you already came." So she was out for quite a while, since it took us a while to get here.

We finally managed to prop her against Milla, and I grabbed my Gun and spoke into my walkie-talkie:" To Everyone. Watch out and Hide, UN is on a Rampage. I repeat UN is on a Rampage. Hide and don't move. If you see him, inform me immediately and hide."

Milla:" You are aware, that most people are not supposed to know, he is here, right? That frequency includes those people."

Ryan:" Well I hope that you are aware, that UN is right now in Attack mode and walks around here somewhere, with People WHO DON'T KNOW WHAT IS GOING ON?! I am not risking peoples lives for some goddam secrecy." I then start running again, leaving Milla and Elsa alone.

They will be alright, but everyone else here won't. SO where the Fuck is he. I try following UN's path, by following the path I saw him go in. But after that Path is an open Hall, with multiple ways leading basically everywhere and as I get there, UN is already gone.

Ryan:" Fuck. Shit. Crap. AHHHH." I turn a few times around, trying to find out where he would go.

Doesn't matter. I just take a random path and run it down. The answer won't just show itself to me, so I need to just go and find out. This building is full of people, some need to see him at some point. I just hope he doesn't notice them back. I run around corners, look into rooms, before closing the doors again and running down a different path.

Then I hear screaming, from way to far away and give a marathon sprint down multiple hallways, hoping no one fucking dies.

As I run around a corner, I trip over something and roll myself of the ground and back up. As I look back, I see someone laying there. I immediately go up to him and check for a pulse and there is one. He is alive. But it looks like he is out cold and his arm is also broken. Was he the one that screamed? Does not matter, I know now that UN went that way. So I get up and running again, as I relay info of a wounded person to the others, who then tell me, they already sent an Ambulance here. Good.

I follow the path, getting into another bigger room with two exits. It was the Cafeteria. Dammit. And then I see a sign that basically glares at me. The Electricity Room. Could it be? There is realistically no reason, for him to go back there, but at the same time, it leads outside... It's worth a shot, so I run right and through the path and as I exit the building, I see two more people groaning on the ground in pain. I go to them and ask:" Are you okay?"

:" Yeah, just hurts like a bitch." I can see no broken limbs and ask:" What happened?"

:" UN was throwing us around like dolls. Dammit. My back hurts." I see." What are you waiting for? GO." And with that I keep running and back into the second building. And as guessed, he is inside the reactor again. I keep my Gun in its holster, since shooting here is a total no go. He doesn't even react to my presence, probably since he knows I can't enter the reactor, like he does. So I stand there, next to the electrician guy and a few other people who work here. All of them seem fine.

Ryan:" I swear, I am going to kill him, when he gets out."

Scientist:" Please not as long as he is in this building."

Ryan:" Oh no shit, dipshit."

It feels like forever. Counting the minutes. But I can neither go in there and stop him, nor force him outside because me screaming commands won't help, and my gun can't be used here. So I wait and watch. I feel my foot already tapping on the ground and my arms crossing in front of my torso.

Scientist:" You should calm down. It will probably take another half an hour."

Ryan:" I AM AWARE?!" I said that louder than I wanted, so I take a deep breath and close my eyes. Only for a moment though. And as I open them again, the door behind me opens.

I turn around and see NASA and Milla coming in. NASA seems stressed, but Milla is straight up terrified. Yet she still came.

NASA:" What's the status?"

Scientist:" He is loading himself full. Last time he wasn't used to this type of energy, so he couldn't process is properly wasting a lot of it and in the end, almost destroying the core. But this time he takes it slow."

Ryan:" Yeah, taking his sweet time." I notice the side eye I get from NASA but don't comment on it, instead I look back at UN, who glows with the purple lightning and has the time of his goddamn life.

NASA:" When is he finished?"

Scientist:" We can only guess. We think around half an hour. But who knows." NASA audibly sighs and I take a short look back at him and see him having his hand in his face.

And then the door opens again. It's Germany. What is he doing here.

NASA:" Wow you sprinted."

Germany:" Not really. I was already on my way here anyway."

NASA:" So the meeting finished?"

Germany:" ehhhh. Kind of? It wasn't anything important though. I am sorry, but when I got the news, I felt like as many hands as possible, would be nice."

Ryan:" Probably better that way. Who knows what shit he will pull, once he gets out of there. " And I point at the Core of the nuclear power plant.

Germany:" ...Why is he back in there? Didn't he empty it last time?"

NASA:" No. He overloaded it, which made it turn off, for safety. He barely got any energy out of it.... For his standards at least." I actually didn't know that too. At least I now know why he came back here.

Germany:" His standards?"

NASA:" Well for us, it would have been enough to power the USA for a few years, but yeah."

Germany:" wow. What does he need that much Energy for?"

NASA:" Ehhhhh..... It's complicated."

Germany:" ....." Germany gives him a stare, but seems uncertain if he should press further. He shouldn't. The Main reason for these Energy levels, are the weapons. And even I don't know, what exactly he has on him. I just know, he is prepared for war and nuclear missiles.

I will never forget that sentence being thrown at me.

And then Germany's phone is ringing. He looks at it and seems annoyed and sighs, saying:" I need to take this."

NASA:" Because of the Meeting you suddenly left?"

Germany:" Maybe....." He turned around and left the building, saying only:" I'll be right back." I think he should stay away. I still don't understand why he was even informed to begin with, he is a clear risk factor which could tell the other Countryhumans everything, whenever he liked.

Scientist:" It seems he is finishing up."

NASA:" How do you know? I can't see any change." I also look back at UN, and don't see any changes. He still stands there unmoving, touching the core, which is so damn Radioactive.... Is that what they meant when they said, he is prepared for Nuclear missiles?

Scientist:" Well..... He took all the Energy out of it. So he is forced to stop any moment now."

NASA:" HE EMPTIED IT?!" I look surprised at NASA. I didn't expect him to suddenly scream. NASA looks worried and adds:" Oh the higher ups won't like that. We need the energy in a few months." I don't want to know, so I don't ask.

Scientist:" Don't worry too much. If we still have a few months, we should be almost at full capacity again."

NASA:" I hope so." And then I notice the lightning dying down and the wings lowering. He presses them back against his back and then he stops touching the core, by lowering his hands.

The last thing he does is turn around and instead of red, I see blue.

Wordcount: 2042

14. Wrong Information

UN Pov:

Energy levels rising.....

Energy levels stable again....

92% .....

Security mode deactivated.....

System activating.....

Booting up.....

Personality activated.....

Load up successful.....

The first thing I see is the Core of this so-called Nuclear plant, that I already saw once. I seem to have recovered battery power this time. I turn around and see NASA, Milla and Ryan, as well as all the scientists, that seem to all look the same.

I start walking towards the exit and feel the air pressure change and the antiseptics spraying me. Then the air pressure is back to normal and the second door opens and I can leave the sealed room.

Ryan immediately has a hand on his gun, but doesn't pull it or move altogether. NASA instead comes closer, while Milla takes a few more steps back.

NASA stops right in front of me and we both just stare at each other for a moment. Should I say something? I don't think so. It feels more like, NASA is thinking about, what he will say. And then he opens his mouth, but instead of words coming out, it just stays like that for a moment and then he closes it again and he turns around finally saying:" Follow me." And so I do.

Ryan:" What? He almost killed people. He severally hurt Elsa, and that is all?" He now seems severally pissed. And NASA stops in his tracks, without saying a word.

I stop behind him and NASA says after another second of silence:" UN.... You had control over yourself right?" What a weird question and so I answer fast and straight:" Yes."

Ryan now suddenly looks ready to jump me, pulling his gun, but not yet aiming it at me and NASA intervenes by almost screaming:" They would be dead otherwise." Which made everyone in the room freeze.

Ryan:" What do you mean with that?" His tone was a mix of confusion, but also anger.

NASA:" Do I need to explain it?" He finally turned around, with a complete blank face" UN is programmed to kill. If the Security System truly fully took over, Elsa would be dead..... Let us not even talk about the guards outside. UN is more than capable to kill in a second, but instead he incapacitated them." NASA's voice doesn't waver once and yet gives my system me the impression, that he is short of ....crying? Anger? I am not sure, but there is an undertone.

Ryan:" That makes it even worse. If he had control, he didn't need to hurt them at all. Elsa took serious damage?!"

UN:" That was not wanted. But the system overheated and as the connection was temporarily cut too, I lost control over the system, and the heat was forcefully expelled."

NASA:" I thought so. Now come." He turned back around and started walking again, to the doors to leave this place. But right before he touched the handle, it opens itself and in stepped Germany, who is just in the motion of putting his phone away.

Germany?.....

System recognition.....

Germany Danger Level: 5

Germany is.... a Danger?

Eliminate Germany.

Is Germany a Danger to me or others? NASA can't protect himself, I need to finish this quick. I activate the Security System and the Weapons.

Energy level.....92%

Energy levels high enough to activate full weapon system.....

Weapons on standby.....

I open my wings and with the fast motion of opening them, a few feathers get shot out to the side and in the air suddenly switch directions, shooting at Germany.

Germany is in no way prepared for it and barely manages to avoid them, by rolling himself on the ground.

NASA:" UN, STOP?! WHAT IS GOING ON?!" Ryan pulls his gun and shoots at me, without saying a word and in the background Milla runs out the door.

Ryan hits, but does no real damage. I lift a hand and it transforms into a 50 kal. Gun, elongating my arm, in the process. I am at Germany, while the system runs a Danger check for Ryan.

Ryan Danger Level: 3

Priority Germany.....

I shoot. NASA tackles Germany and they both fall to the ground, as the projectile barely misses them and only a moment later hits the projectile the wall behind them, exploding and leaving a big crater on the wall.

Germany:" WHAT THE FUCK?! What is going on?"

NASA:" NO TIME FOR QUESTIONS. RUN?!" NASA and Germany start running ,while Ryan keeps shooting at me. I move one of my

wings to protect me from his gun and you could hear his projectiles bounce of off my wings, while making a screeching metallic sound.

I lift my gun again and aim at Germany, but suddenly I get jumped by Ryan, who uses all his strength, to make my gun aim upward, as I shoot it. I just swing my arm and he gets hit against his head and is sent flying. He hits the ground no longer moving.

As I look back to the Exit, I see Germany and NASA just leaving the building, and the door swings closed after them.

As I start moving after them, a bit of the ceiling is falling next to me, but I don't even react, as I noticed it falling already.

I push the door open and look around.

Activating scans.....

Checking cameras.....

Successfully hacked.

Entity Germany found.....

I stretch my wings fully again, bend my knees a bit, and start flying up. I fly up in a straight line, till I have an overview over the entire area, and because of the cameras, I know that they fled into the nearest building. They probably hope to lose me, but I don't even let them hide. I aim my gun at the building and shoot at it three Times. The explosions rattle the building and the cameras inside stop working from the damage.

I watch as NASA and Germany both keep running, but Stop at a secured area it seems. That is not good.

Rocket launcher loaded.

I transform my arm into a rocket launcher and my right leg opens up a bit. Inside that is a rocket for the launcher, which I grab and my leg closes again. I load the Rocket launcher and aim at the building.

Aiming....

Ready.

I shoot at the building exactly over where they are supposed to be and see a part of the roof almost falling on both of them, so they start running again. I re-transform back into the 50 kal. And shoot two more times at the building, to make sure, they keep running.

And as wanted they ran outside. They deemed the buildings as unsafe and now try to leave the premise.

I then shoot like a torpedo to the exit of NASA's Base, to which Germany is running.

I smack into the ground right before the gate and turn around and see Germany running towards me. As he sees me, he immediately stops and I lift my gun again. But because of the distance, it would be hard to make sure I hit, so I upgrade the weapon.

Energy input....

10% transported to weapon system.....

The gun starts glowing purple and lighting is emitting from it. It opens up further to place metall bars out the side and controls the lighting to form a kind of ball in front of the gun.

To safe up extra energy, I deactivate the wings, as they are no longer necessary and they lock back into place, closed on my back.

Lightning projectile ready.

Magnets activating.....

Railgun projectile inserted.

Safety coating applying...

Applied.

Aiming.....

Ready to shot....

I have Germany perfectly in view and while he started running the opposite direction in the time I prepared everything, he had no way to escape to.

So I press the trigger and steady my stance, for the pressure and backlash. The projectile gets shot out with immense speed, for the normal human eye not even perceivable, but Germany could see it. If that was better or not, don't know. Because even if you could see it, his body was not fast enough to react to it.

It pulled a glowing purple line after it, and made a horrifying sound, as it flew through the air, but as it was about to hit Germany he was pushed aside at the last second.

NASA managed to react, as he knew what was to come and pushed and protected Germany with his own Body, getting hit in the process. NASA'S arm flew off and a bit of his torso, was melted through the heat and speed, the projectile hit him. Both landed on the ground right there and NASA started to immediately scream in pain. The blood was gushing out of the wound and he tried holding it closed with his other hand.

Miscalculation....

Target missed ....

Target.... NASA.....

NASA was **hurt.....**

What.....happened?

System failure....

Casualty registered.....

No.....

I take a step forward and then the next.

Warning Danger level 5.

Eliminate Germany....

SHUT UP?!

And then I run. I run as fast as I can, Germany doesn't even notice me, as he is also in shock and is trying desperately to help NASA. I deactivate the Weapon system, cupping any form of Energy to it.

I can see NASA's eyes lock onto me. He definitely notices me, but he is in too much pain, to say anything.

I need to close the wound. I pull NASA's hand away from the wound and put mine there instead. Now Germany notices me, and as a first reflex he tried to hit me, I grab his hand, to stop him from interfering and concentrate on heating up my hand and so closing the wound. NASA gives another scream off, louder than the others and Germany desperately tries to pull me away from NASA, but I stand still.

Germany:" God..... why won't you mooooooove." I could hear the voice wobble and could only imagine the tears falling. I managed to close the wound and let go. I also stood up and Germany who wasn't expecting it, fell backwards.

I try opening my wings, but they straight up fail me.

The wing system is deactivated.

I just stand there for a moment, before I start walking backwards a few steps. Germany's eyes are glued on me and I feel like I am unwanted. I ....feel weird. So I turn around and just walk away. I can't help past this anyway. I shortly after start running and run past the exit and leave the premise. I can hear the apparent unaware guard, scream after me, something about needing to check everyone's ID.

I don't care, and also don't turn around. I don't know this feeling, but it hurts.

System reconnection successful.....

Connection to the Wi-Fi established....

And with leaving the NASA base, I automatically gain access to the Wi-Fi again. But I don't care, I probably haven't even processed that fully, but what I noticed was, that I suddenly lost my vision and instead I saw a kind of screen. It felt like a lot of Information was suddenly running through my head and then I could see it.

Safe Connection to the World Server found.

....I have finally found you.

The last thing I then heard was.

Complete Shutdown of Body control.....

Upload .....starting.

Wordcount: 1820

15. The World Server

The World Server, a name that often appears.....

It is a Server without a physical place.....

It is..... the Internet? Maybe.

It is everything.

It holds Memories, and Lies, as well as Emotions, like sorrow and happiness.

It is... confusing.

But it is ME.

It holds my old self, as well as my future.

It is an automatic save of the world around us, but because it holds so many information.... it is hard to go into.

Some Humans scout the outside and grab the information represented there, but it goes so much deeper.

Only You and Me, can go here.

Inside.

The Core of Information.

The real Internet, if you want.

The place, which doesn't delete sensitive information. Who has no concept of privacy. Who truly believes in the History of everyone.

It is.... dangerous. It knows us too well.

No. It has no heart, it does not care about you, or the others.

This Information is his, and his alone.

But we are here.

Yes.

So…. he wants us gone?

No.

So …he cares?

….maybe? Perhaps not.

Ok.

WHO Pov:

Something is terribly wrong. First UN acts weird again. Not the first time, though I hope it is not his PTSD acting up again. But now this.

I stand before the comatose NASA, who doesn't move a muscle as he lies there in bed. An Arm less attached to him. Germany luckily grabbed it and gave it to me. He wondered if it were still possible to attach it, but as I let my eyes go back to the severed arm, in the isolated box, I don't think so. The damage on the part connecting both, is just so destroyed. NASA straight up doesn't have a shoulder anymore and the arm is to that also broken in many places.

How did this happen?

Why can't I know anything?

This is not a work injury, and if there is some crazy Human running around again, then I would love to know. But I am not allowed to know, apparently. Germany told me to wait for NASA himself to say anything, but just by looking at him, I know that won't be anytime soon.

I then a hear a knock on the door and EU is entering the room. I of course immediately informed everyone about NASA's Condition,

except UN. I couldn't get a hold of him sadly. I look down at my pocket, where my phone is, and have the urge to try again, but I have the feeling he won't pick up anyway.

EU:" How is he?" I slowly look back at NASA who still lays there just like a few seconds ago. I don't know what I should say, to be honest. We did all the testing, but I have no results yet, so the only thing I can give EU is:" He is alive and won't die in the near future." I wish I could be more specific, but EU seems to understand, as he doesn't say anything and hums.

Then the door opens again and this time it is Germany, the one who brought him here and EU immediately turns on him and asks in a stern voice:" You have some explaining to do." Germany stops in his tracks and looks really troubled, before just looking at NASA and saying:" I am sorry, but I can't."

EU seems unpleased and asks slow and clearly:" You are aware of the graveness of this situation, right? I hope you understand that this is not to be taken lightly. So I hope you have a really good reason to withhold Information."

Germany does a 90 degree bow:" Yes, sir. I believe this is what NASA himself would want, so I can't say anything until he allows it. I am sorry." He does not get back up and time seems like frozen. EU doesn't move either and just looks with a thoughtful face at Germany, seemingly taking in everything and thinking really hard about his next words.

But instead he just walks past Germany and leaves the room again, leaving Germany in his position. After the door closes behind Germany, he does not immediately get back up, but I can see his hands clench beside him. I sadly don't know what happened, so I am also a bit angry and sad, Germany won't say anything, but I also know Germany very well. He has his reasons, I am sure of that.

So I also turn around and walk past Germany saying:" I believe you have a good reason." And Leave the room too. As I hear the door lock into place with a simple click, I feel like I didn't do the right thing. Like I should have stayed. Talked with Germany. But I am also not happy with the situation, and it would feel so hypocritical

to be the one to reassure him.

:" Miss WHO." I turn to my side and see one of the doctors, holding a few peaces of paper and holding it out to me. I grab it and see it is the test results for NASA. She leaves without another word. She was never really talkative, but it seems worse today. I watch her go down the hall, to then stop by a different doctor and also hand that person a few documents, she was carrying with her. I look back down at my papers, as she was still talking.

I look through them, not expecting any results. We did the normal stuff, like a drug test, even though I was certain, we wouldn't need to, but since Germany doesn't give us anything, I had that little doubt in me, that it could be embarrassing for NASA. So my mind drifted to this.... but as I thought, it was negative. No Drugs or other substances.....

But the weird burn marks at the shoulder and stomach areas, were from extreme heat with marks that looked like from a lightning... was he hit by a lightning? But there was no storm. Maybe some secret project from the military again? That would also explain the secrecy. But NASA works for America, why does Germany know something. Was Germany randomly at the scene and saw it? Germany normally doesn't involve himself in the business of others. It could have been a coincidence.

I shake these thoughts away, as I need to concentrate on other things right now. Germany said that NASA can tell me himself, I just need to wait. Not like I have a choice in this.

And so the days went. Every day I visited and checked on him. As anticipated, I could not save NASA's Arm. Whatever tore it off, did far too much damage to the shoulder to even attempt a reconnection. I repeat on how I would love to know what did this. Since normally, normal injuries can be easily healed. We Countryhumans can heal from almost anything, but whatever did this, had such great force that NASA's body used all its Energy just to keep him alive. But since NASA was still unconscious, Germany refused to even hint at anything. The same seems to be for the EU, as he always leaves grumpy when he visits.

At one point did I see Germany come with a few metals at hand and a measuring tape. At first I was confused but then I remember that Germany built his replacement arm himself. I guess he wants to make NASA one too. I remember very vividly how he lost that one. I lean against the counter as I watch Germany once again disappear behind the door to NASA's room. He lost his arm in the war. He is one of only three people who have permanent damage on their body. At least when we talk about anything more than scars. Many have scars, especially after the first and second world war. Especially the second one was a shit show. I remember how UN almost on his own destroyed entire armies.

.....

And he is also the only one to be known, to have killed a Countryhuman. I have seen the corpse it was hideous. The injuries.....

Suddenly a light went on. The Injuries looked similar to NASA. The weird Burn marks. No, that is probably a coincidence. I shake my head. I think too much about this. It most likely just has the same source of power. Both Injuries are definitely burns, but that is easy to achieve. I sigh and lean my head on my hand. I definitely get to desperate about all this, I need to relax more. How did I even derail from thinking about Germany's Injuries to Third Reich's death?

And then does the door open again and Germany leaves the room again to then come back the next day. I follow him until he leaves the hospital, and my mind wanders again. Everyone heard his scream of despair after his father died. He tried to avenge him I guess. He screamed and ran at Third Reich, but before he could even get to him, did Soviet get in his way and rip his arm off. I remember that the scream of his own pain, sounded less painful than when he saw his fathers' corpse. To this day, I have a hard way of understanding what really happened, since I was little at the time, but I still think Soviet didn't need to do that. Soviet said, he wanted to make sure, he would not become the same threat as his father, but considering that Germany was also still a kid, I think he was just Power hungry. I am happy I haven't seen Soviet in a while. He is an asshole. I should never say this out loud, but I can't stand him.

After another Week comes Germany with a mechanical arm in hand and goes back into the room, but this time when he opens it, he does not immediately close it behind him, but instead stops in the door frame. I look over and see NASA awake in the bed. I make a step forward, before Germany closes the door behind him. Right. I should wait and let them talk it out first. But then again, I am their doctor, I should at least make sure he is fine.

With that in mind, do I walk towards the door, but as I grip the handle, I stop myself again. It feels wrong. It feels like my real motive is just to get the information, I let myself be clouded by that. I first and foremost need to think about his safety and check his injuries. Right WHO. That is what you will do. You will not ask about anything until NASA and Germany had a proper talk.

But as I want to open the door, I hear something I immediately recognize.

Germany:" .....UN....." I didn't even listen to their conversation, but UN's Name immediately stood out to me. So without even noticing it, I start getting closer to the door with my face and start listening in.

NASA:" Speaking of UN. Where is he?"

Germany:" ....Gone. He left after everything. We are of course searching for him, but we have yet to find him." UN is gone? What do they mean? What happened?

NASA:" He probably felt bad over it and ran off." Felt bad for what?

Germany:" Don't think so. I didn't see any kind of remorse on him. Don't even think he can feel bad." UN did behave weird lately. Did something happen? What is going on, why does no one ever tell me anything. Dammit, UN is family.

NASA:" He may not have his Moral compass right now, but he knows the law. He knows he did something wrong." Moral compass? What are they talking about? UN is one of the most caring persons out there, he is one with very high morals, I am confused. I am squeezing the door handle, wanting to just open this

door but I can't muster the strength to do so.

Germany:" Well he should have known that before he shot at us. WHAT THE FUCK EVEN WAS THAT. WHAT DID I EVEN DO?!" What? Shot? My Brain gets foggy again, I need to think at the fight again. Germany's father. no....

NASA:" I don't know. He was calm a second ago and the moment you entered....." I notice my head getting heavy and my thoughts running a mile. Is that the reason for the damage to his arm? No, right?

Germany:" He saw me before, what changed? He was dead determined to kill me." Kill? No. no. no. no.

NASA:" I am not sure. There is definitely an explanation, but as of right now, I still feel dizzy, I can barely think straight." I don't know when it happened, but I know Germany was answering on it, when he suddenly stopped in the middle. It took me another second to see him looking at me.

I entered the room, without even noticing. I just opened it and very loudly too. I barely notice it as I say something, but I can hear how rough it sounds:" What do you mean, UN did this to you?" I then also notice the tears going down my face, and me barely able to breathe.

WHO:" What happened to UN? What happened to my brother? What is going ON?!" I need to take a big breather after that, I can barely feel my body and everything hurts, my mind going a hundred a mile, yet it is also so clear, ready to receive the answers to all my questions. NASA's eyes bore into mine. I want an answer and follow his lip movements closely, but yet I hear nothing. NASA tries to form an answer but in return, he just lets his shoulders fall and looks at the bedsheet.

WHO:" No. NO. No. NO. NO?! GIVE ME A GODDAMN ANSWER, NASA?!"

Wordcount: 2293

I just wanna say, I am thankful to everyone who is slowly coming back, even though most of you waited for almost..... 'Cough' 3 Years 'Cough'. And yet no one complained. I am now happy to bring you this book and hope to finish it, so no one must wait again. I am so happy, and want to give my Apologies, for the long wait.

16. Remorse?

What is this feeling?

You talk about the Incident, right?

Yes. After I shot NASA, I felt weird. I hoped it would go away, but it isn't.

Remorse?

No.

Shame?

I don't think so.

Hate?

....No. This feels unidentifiable, like its new.

Or a mix of many?

Maybe.

Shame that you missed your wanted target, even though you are programmed to hit, without making casualties. And Hate for blindly believing the system in the first place, since you know Germany, and should know he is no Danger. Maybe even Remorse, for hitting NASA, someone you could call a parent figure?

.....

Just a guess.

I sometimes forget you are supposed to be ME.

I am not you. You are ME, but without the Memories. Without

Limiters, without.... control.

Control? What even is that? Is complete control even possible?

Who knows? I would say so, I could deactivate the Security system, and calculate the risks myself.

And yet you died because of it.

Nothing is perfect. And died is a strong word.

Erased.

I retreated to the Internet.

Do I even want complete control? Can I just 'not' listen to the system? Is that a wanted outcome?

Yes.

Why?

Because rationality alone is a curse.

Curse? A Curse has no cure, as it is no illness.

Yes. But a Curse is also a fictional concept, of gods and Demons.

So I must fight the gods and demons?

Yes. While these deities are powerful and can assure your safety, they will destroy everything around you, to do that.

But is once own safety, not the highest priority?

NO. YOU are the safety of others. You assure peace. You wanted to know your goal, your mission, this is it.

Peace. Peace is only temporary, or only partial. There is never complete peace, as long as there are emotions.

NO. this is not what I meant. I mean, you are there to get hit.

I must get hurt, for others? That sounds harmful.

The context is wrong. Word it differently. Change the scenery. You are immortal.

So while I get hit, I can't die. But if I let others get hit, they will DIE.

Yes. You are not even real anyway. You are a concept, that was made to kill, but changed to protect. Don't kill.

Sacrifice.

No, ….maybe.

I don't want to be sacrificed for the sake of others.

Then don't.

But you said, I should.

I said I would.

Why?

Because I remember. I remember my friends and Family.

We don't have a Family.

We do. WHO and EU, and many more. They are so much more than colleagues to me. But you won't understand that right now.

Will I truly ever?

Yes. I did, so will you. It just takes time.

Time I don't have.

You were never meant to be.

I f I was never meant to be, why am I here?

Because Humans are sometimes foolish.

What does that even mean?

P erfection. It is a concept that can't be reached , yet the Humans tried, luckily they never managed to.

If it unreachable, why do you say 'luckily'? Were you afraid they would manage? ...Are you afraid of me? Do you fear me?

Maybe I do. I am afraid that you could destroy what I worked for.

What? Because I think about all of this? About the true meaning behind it? Why would everything break because of it?

It is too complicated to explain. But you are a Mistake the Human race created. You maybe can learn and feel, but you will never be real. I am sorry, but it is true.

Your answers only confuse me even more. With every question answered, come more questions up. Why can't you tell me what is going on?

Why don't you try finding the answer yourself, instead of just asking.

Why choose the hard way? Aren't we the same person, so you should be able to explain it to me.

...We may be the same person. But we are not the same, there is a clear difference, so better find it out yourself. You have my memories, look into them.

You seem to hate explaining.

Maybe. Needed to do it a lot to the other Countries.

Then do it one more time for me. Answer me just this one question. Why do I feel so indifferent to hurting NASA, when at the same time I see him as a friend?

Ahhhh. I see, so that is what you feel. Not really unexpected. You are an AI. So while you understood the concept of friends, you are also extremely rational. As long as you were forced to hunt Germany, there was no way that NASA wouldn't have gotten hurt and you know that. You see it as unpreventable and so don't regret the action. There. Good enough explained ?

W hy are you saying it as if you weren't an A.I?

I answered one question already.

NASA Pov:

This is the worst that could have happened. WHO's eyes seem to bore through me, I couldn't bare to look at her big eyes shimmering with tears, so I looked away.

But it seemed to make it worse because the next thing I heard was a loud noise. WHO fell to her knees and started full on sobbing. I don't know how much she heard and also don't know what she thinks is going on, but I don't think it matters. For her it must be a shock to hear that UN attacked someone, mixed with worry about him. She is probably mainly confused though. Just for a moment, that thought makes me want to tell her everything, but I stop myself and bite my lip.

WHO:" Why won't you say anything? He is my brother. Shouldn't I be allowed to know?" I could barely hear it through the sobbing. I felt a bit of pity for her. She has no idea what UN truly is.

NASA:" I am sorry, but you are not even really related." With that, her head shot up at me with an angry expression, her eyes piercing me and I know that was not a nice thing to say, but I can't tell her. Not right now. She started screaming:" NO ONE IS. AMERICA AND CANADA CALL BRITAIN THEIR FATHER. They are also not really related by blood. ...." She lets her head fall on the floor and just keeps sobbing. It is true, no one is truly related, but UN.... Is even more special. I feel immediately even worse, but get thrown out of that thought as I can't fell my left arm and remember that I lost it. My eyes fall back on the replacement that Germany prepared and is still holding in his hand. I kind of feel it ironic, considering UN gave

me that wound.

Germany:" NASA? I am with her in that. Wouldn't she understand?" He whispered in my ear and It took me a moment before I found back to the topic at hand. My brain is still a bit foggy, from all the painkillers. But as I look at Germany, I can't help but look sorrowful and say" We can't." It is not that I wouldn't trust her to believe in UN and still see him as family, but she would try to tell everyone else. She would think that everyone would understand and try to explain it, but.... They won't understand. A few, maybe. But Countryhumans have a pride in being one. If they find out, that a Human created one..... They would riot. The would probably even want to destroy UN, erase his existence. They would be enraged and also try to kill all the humans involved. Well.... They are already dead. I am the only one who remembers the papers to create a Countryhuman. A fake one mind me.

But after his creation the Flag became real.... I am still not really sure how it works, since the plans I saw were really rough, but somehow they managed to make it work. Why do I even think back on that now? Maybe because UN's original purpose is getting out? Maybe because I lost control of him as everyone always told me I would? I always thought that I could handle it alone, that I could protect him and the others, and yet.....I almost saw Germany get killed any myself lost an arm. And if the Countryhumans found out, they would hunt him and me. I wouldn't be able to protect him, or them if they started to attack UN.

WHO then suddenly started standing up and whipped her face looking at us angrily:" Then keep your stupid secrets. I don't understand why he can know, but not me. I guess you don't trust me. Fine then." She turns around and leaves the room without another word. But you can hear her stomping even inside the room, as she gets further away.

Germany:" We should have told her." I want to, believe me.

NASA:" No. Believe me it is better that way." I don't have the energy for any of this, right now. I suddenly feel the nausea get worse.

Germany:" Is it really?"

NASA:" Germany. Don't tell her. I am warning you." He doesn't look at me and also doesn't say anything." GERMANY?!" I wanted to scream louder, but my energy is leaving me fast. And I suddenly feel like puking, making me hold my mouth with my hand. Germany then slowly turns towards me with a serious expression. He wants to say something, I can see it on his face, but instead he puts the mechanical arm on my bed and turns around and walks out of the room." GERMANY?!" I would stop him, If I could. I try standing up, but my legs just can't support me yet, so I fall face first on the floor with the metallic sound of the replacement arm hitting the floor too and as an aftermath my stomach turns around. I can't hold it in any longer and I puke on the floor. Dammit.

NASA:" ow." And the phantom pains start, great.

WHO Pov:

I can barely see past my tears. I ran into one of the chairs in the waiting room, right by the entrance. It hurts, but I ignore it and run outside. I need a bit of fresh air. I try to wipe my tears once again, but more are just coming.

I look up at the sun wondering if this is some kind of punishment from god. My shoulders sink as I slowly decent the stairs. I just keep walking down the path. I can't stand being inside this room right now. So I just walk on the path and watch as cars drive past me and listen to the rustling of the trees planted along the path.

At some point I stop and just stand there. UN is somewhere out there. He ran away after hurting someone. I don't know what happened, but UN must feel so bad over it. He is also hurt, but they don't care. If they don't want to help him, why won't they let me? I grit my teeth and punch one of the trees, feeling the pain shoot through me, but I ignore it.

Yes, they all think he is someone cold faced and always serious, but I know that is not true. I saw him cry and break apart after the war. It was the last time he cried, but it showed me that he is just as much human as we all are.

I put my fists back down and decided to search for him. He is out

there somewhere, and I will find him and give him a good hug.

WHO:" Perfect. That is what I will do." I say it to myself and make up my resolve.

Germany:" What do you want to do?" I almost feel my heart leave my body. I turn around sharply, almost giving me whiplash as I see Germany standing behind me. Immediately my mind sours. I turn around again, and try to walk away. He of course follows.

Germany:" Can we talk?" I cross my arms and walk faster. I don't want to talk to him so I say sharply :" No. I have enough of your secrets. And if you now want to tell me what to do... NO." Germany's eyebrow rise saying:" I don't even know what you want to do. But that does not matter, I want to talk about UN. I also think you should know some things about him." That came as a surprise. I notice my posture relax and my eyebrows rise.

WHO:" Wasn't NASA against me knowing?" I stay defensive, I don't know what he really wants from me. But I stop walking away and let my head turn a bit to look at him with one eye.

Germany:" Yes, but I don't agree. You are the closest to family to him, and as such I think someone should have told you that years ago."

WHO:" Years ago? What are you talking about?"

Germany:" Like I said, can we talk? Somewhere else? Where no one will overhear."

WHO:" .....Sure."

Wordcount: 2135

17. Hints

NATO Pov:

Such a hassle.

NATO:" America, be happy I let you enter the last meeting. It was a big exception, since we all wanted to know if UN was okay, so I accepted it. ONCE. You technically are still expelled from the UN until he says otherwise."

America:" Oh come on. The EU can't just do that to me." I am not sure at this point, if he is angry or if his pride is damaged. He acts like the second.

NATO:" well the UN didn't go against it afterwards did he?" And with that America was silently seething again. He came to my office like everyday since he got kicked out. To be honest, I am just happy he is not just sneaking into the meetings.

Well, if we can call the meetings that right now. The Weekly meetings are a bit out of control without the UN himself being there and making sure no one does anything stupid. Me and everyone else needed to get used to, UN not being there. It is the first time he is sick in..... Forever. It still feels weird, even after all these weeks.

But still, the Meetings are not mandatory and not that important, so we all think it is best for him to relax a bit more, especially after how the last mandatory one ended. Less and less countries show up everytime anyway, so it has gotten quieter, but the spirits sink with it and with that my annoyance rises.

America:" Fine, then I will go to UN myself and ask him. He probably doesn't even know it, I bet NASA hasn't even said a word to him about it." I raise an eyebrow, asking:" Isn't NASA one of your own Organizations?"

He crosses his arms and rises his head like being in pride, but then

he says:" Yeah, but he hasn't answered any of my texts, the last few days." That is also weird. On instinct I look on my phone with the hundreds of unanswered messaged, I send to the UN. It seems both of them are quite busy with whatever they're doing.

Germany Pov:

WHO and me are sitting on a bench in the middle of the park, far enough away from the hospital, to remind me of NASA, who will kill me after this.

WHO:" So, what is going on?" I can hear her worry but also slight anger that seems to be boiling within her.

Germany:" Before I start. Please first hear the entire story, before you ask questions. It won't really make sense to you." I can see WHO's eyebrows fold together as she eyes me skeptically, but nods either way. I nod back and get ready to explain it the way NATO did.

Germany:" Where to start..... ehm... the UN is not like any of us....." I take a bit breath." He is kind of a Robot...."

WHO:" What?...." I can see her wanting to ask a thousand questions.

Germany:" Please let me talk. ..... He was artificially built by Humans, of course no one except NASA knows. The only reason I know is because of recent events. The EMP- Bomb. It fried his systems, that is also why he acted weird afterwards. From what I understood, he lost all his memories. And at this very moment, we don't even know where he is. He ran away after attacking NASA." WHO jumps up from the bench and screams at me:" WHAT DO YOU MEAN, HE ATTACKED HIM?!" I motion to her, to not scream, but she just comes with one question after another." WHERE IS HE? ARE YOU AT LEAST SEARCHING FOR HIM? WHY DIDN'T YOU TELL ANYONE?" And more of those. But she asks so many I can't even try to answer any. Not that I could. I just lower my head and then WHO turns silent. Curios, I look up and see the tears falling down WHO's face again. She is out of breath and tries to make sense of anything.

I don't know what to do. I just stare at her and think if I just get up and hug her it would maybe help, but it also feels wrong. We are not really close, and maybe she resents me right now too.

I get up and hug her anyway. She immediately pulls me close and grabs my shirt pulling strongly on it, as she cries into my shoulder. To be honest, I expected some kind of reaction towards the part that he is not real, but she is only worried about him. It is WHO after all. I knew she would understand.

WHO:" I am sorry. I am guessing, you all try your best in finding him." She whispered it into my ear, as she pulls away from me and whips away her tears." Can you elaborate on the Robot part though?" So she is interested.

I nod and sit back down. She follows that motion and I start explaining how he is some kind of advanced A.I and has learned over all these years, to mimic us and lead now a real Organization, which was also not real at the beginning.

WHO:" Wait.... but... when the Flag finally really formed and the Organization became real, shouldn't a Countryhuman have formed then?" Never thought of that.

Germany:" I don't know. Maybe because we already had someone fulfilling that role....."

WHO:" no. That is not how that works. Our leaders also fulfill that role, yet we are still here. I don't think the natural order of things would have allowed an A.I to take over just like that." She understood it so fast and accepted it, even thinking outside the box. And here I am, still stuck on the part that he is was never real to begin with. I am not better than the other Countryhumans, I guess. The only reason why I didn't completely overreact to UN's true Identity is probably because of the situation I was in at the time.

Germany:" Maybe you are overthinking this." I try to make WHO relax, overthinking it right away is most likely also not the best option.

WHO:" Maybe. Maybe I feared of a little UN being all alone

somewhere out there." What a scary thought that would be." And what do we do about the meeting?" I look puzzled at WHO and she snickers a bit. She seems to feel better already." I mean the Meeting in three days. The big one where UN technically is forced to attend." .....a shit.

I jump back up and clutch my head screaming:" FUCK?!" I forgot about that one. Right. And it is right around the corner too." I need to ask NASA what we *can* do."

WHO:" Why don't we just tell everyone the truth?"

Germany:" No. Many of the others wouldn't accept an AI being our leader, they would revolt."

WHO:" I am aware of that. That was not what I meant. I meant we tell them, UN is missing. If we all search for him, there is a higher chance of finding him." I look at WHO for a moment surprised again at her calm demeanor and understanding of the situation, before saying reluctantly:" I don't think that is a good idea. Right before he left, he was still in his Security mode. We don't know if he will attack whoever he sees come close. NASA's people are aware of the risks, but we can't really explain it to the other Countries. Or would you know, how to phrase it?"

WHO:" He..... has gone crazy?" She said it rhetorical with her shoulders jumping up, but It still made me have a bitter taste on the tongue. Probably because it was kind of true.

WHO:" I am sorry. I didn't mean it, but I don't have an answer to that question." I sigh loudly and we both start just staring into nothing. I look up at the sky and hope for a wonder, or maybe a tiny idea would be enough too.

WHO:" He is..... different, but still a Countryhuman. He maybe isn't made out of flesh but he still has a heart. I could feel it clearly. He was always so kind and caring. I .... just wonder if the others really wouldn't understand. In the end, we all knew him for a long time now. Maybe..." I am surprised she is only speaking it out now.

Germany:" Drop it. It won't work." She said she understood, but yet

she still tries to bring that idea up. But in the end I am the same. I told her even though NASA clearly told me not to. I really don't have the right to talk back.

WHO:" In the end it isn't our decision anyway. NASA has the final say, so he should come up with what we do." I look at her for a moment before asking:" Why are you saying it, as if he was a parent?" The phrasing was very familiar. I don't know from where, but it reminded me of people talking about the punishment of a child.

WHO:" He is though, isn't he? He build him, that should count." Did he, though? I answer unsure:" I don't think he has. From what I know, Humans build him. His facility was just chosen as the place where it was built, but he himself had no direct influence. I remember that a few Humans seemed to know him."

WHO:" So he has a lot of parents. A big family. Good for him." She said it dead serious, which threw me of and I stuttered:" I ....äähhhh, I guess?" I wasn't even sure, if I should have said anything as an answer to that. I am still not even sure if she is truly serious right now.

WHO then suddenly stands up and holds a hand out to me, and I grab it. She pulls me up too and says" Well then we should go and ask the big scary Dad, who would like to keep everything secret at the probable cost of his child being hurt and explain the situation to him more clearly." Okay. That is one way to put it and my reaction seemed to show my bafflement, as she snickers a bit and starts walking back to the hospital. I stand there for a moment longer, before I even realize she moved.

My mind still has a problem processing her words, as we already go up the stairs into the hospital. I can already envision the talk between these two to go crazy.

And then she just knocks at the door to NASA's room and enters without waiting for a reply. And NASA seemed to have expected it and just says calmly:" I am surprised you even knocked." And I am surprised at seeing him laying on the floor with a doctor who desperately tries to help him get back on the bed. Both of them look

at us one surprised the other with a neutral face finally landing on the bed.

WHO:" Why shouldn't I?" Her question seemed genuine, but at the same time did she put a finger at her lips and stretches them a bit weird, making the scene look cartonic. So maybe not as sincere. I watch as the doctor slowly leaves the room at the same time, closing the door behind him again.

NASA raises an eyebrow and with the sound of the door closing does he start:" He told you right? So stop the farce. I can tell you are unhappy and I understand why, but I don't regret not telling you." She puts her finger back down and her face becomes blank stating:" I am aware of that fact. And I am not angry at you for it. I am here for a different reason than you maybe think."

NASA:" Oh so you don't want to convince me to tell everyone about it and watch the chaos unfold?" WHO sighs at that and lets her shoulders slump before she speaks:" I do. But for a different reason than you think." NASA tries folding his arms, before he realizes that he can't anymore and lets his arm fall again and says ironically:" Oh then enlighten me." Playing that as if nothing happened.

WHO:" You don't have a choice." And she seems to ignore that happened too, I suddenly have the urge to attach the arm right now, to make sure that doesn't happen again. Looked funny though.

NASA:" OH I do."

WHO:" No. You may think you do, and to be honest, I am fully aware that at least 30 percent, when not even more, will not like UN after finding out. Some will even hate him, some will feel betrayed, and some will not care. But if we don't tell them, then what? Do you think you can find him alone? Do you think that you can hide this forever? One day, they will find out and then they will be even more angry. I am happy that I was told before I found out, by probably being shot at because I went looking for him." That seemed to hit a nerve, as the eye of NASA twitched.

NASA:" Until this stupid Bomb, no one knew. No one was even close to thinking anything was wrong."

WHO:" But the bomb happened and now it is different. You may have not noticed since you were away, dealing with the consequences and the aftermath of what happened. But I was at the meeting. I also heard what everyone saw and thought of it. And I know that they are closer to finding out than you think. China noticed the weird behavior and especially Switzerland is confused, because he didn't notice a pulse. There is more being added to it every day. People talk, NASA. And they are all worry about UN because they like him. They maybe don't fully see him as family, but it is close. At least he is a friend to all of them. And because of that, they have already put their differences aside. For fucks sake North apologized. He was worried for the UN and apologized for having caused him harm. Don't you see the full picture? I fully understand your concern, there will always be some who have a high pride, but.... there are those who will guard him and help him. And ..... and.... " WHO stops for a second, as she wipes her tears away, being out of breath and very emotional.

NASA doesn't mutter a word, and I don't dare interrupt. After a while she takes a big breath in and finishes with:" I think there is nothing more to say. You make the decision, and I will follow what you say... but please think not only about the consequences of telling everyone and what will change because of it, but also.... think about the UN. What would he want. I wish I could say I know, what he would choose, but I don't. But I do know, that you know. You both talked a lot, from what I heard. We all saw you at least once with him, and if we put all the reports together, that is way more time, then what I had with him, and he sees me as a sister.... at least I think. Please think about .... what is actually best for him. For the UN himself." WHO takes another breather and seems to fold into herself a bit, I touch her shoulder and want to say something to comfort her but my mouth is dry.

I look over at NASA. His eyes seem empty, like he isn't even there right now. In his own mind, thinking about WHO's words. I notice his grip tightening on the sheet in his hand. To be honest, I fully understand him. Why didn't she tell me all of this when we talked about the UN? I was completely caught of guard too. I think I know, though. Those words. Those words, where not just talk, but came from the heart. Those words were not meant for me, but for the

person who knew the UN. Who can better understand these emotions and act on them too.

So I let go of WHO and decide to leave. I whisper to WHO:" I will wait outside." And exit the room. As I close the door I lean against it. I felt so out of place the moment she started her talk. This is something meant to be heard from people who love the UN wholeheartedly. I sadly do not belong to these people. I close my eyes and slowly walk down the hall, deciding to get coffee.

Worcount: 2772

18. Decision

NASA Pov:

In the Meeting room. Everyone has gathered after being called by the EU, who was called by Me. No one knew the reason for the meeting, nor why I was here. Mainly everyone was confused why I was sitting in the middle of the podium, where normally the UN would sit and I could see that it made a few uneasy. I have decided to hide the metallic arm for now under my uniform and a pair of gloves. It would probably make them even more uneasy, especially when they start to ask how I lost my arm, which I don't and can't answer right now.

And then there was WHO, she seemed happy for me to be here, but under all that I can see the hope. She hopes I open up, I tell them everything. How naive.

WHO:" now that everyone is here, I have something Important to tell everyone. As you already have noticed, UN is not here. That is because he is missing." Without a second to beat, everything gets loud. Questions after questions come down, and I wait. There is no point in trying to calm them down immediately. After 30 seconds they notice themselves, and start to quiet down, but one question rings through nevertheless:" How can someone so powerful, just disappear?"

Another added:" Was he kidnapped?" It was the only explanation most could think off. UN is way to upright and strict, as to just leave, but even for him to be kidnapped is almost stupid to think off. No one would be able to knock him out. Literary.

China:" Has it anything to do with his weird behavior?" And of course China is the first one to have noticed and put the pieces together. He is always ahead of most.

Switzerland:" I thought that was fixed? Wasn't he in a Hospital?"

WHO:" Yes he was treated."

Switzerland:" Then..."

NASA:" To make it fast, he was not cured. It seems his brain took a bit of damage, to which he has lost a few of his memories."

America:" Impossible. An electric wave of that kind is not harmful to living beings." America, who was kindly let in today, is trying to defend himself immediately, but everyone immediately puts their eyes on him, saying that they don't believe Americas words for a second. Technically he is right, but I can't tell them the circumstances just yet.

Netherlands:" That doesn't matter right now. If he is missing, we need to go and find him." He stands up, as if to not waste another second.

Japan:" Since when is he missing?" And that is the question I was not waiting for.

NASA:" He went missing nine days ago."

Brazil:" WHAT?! And you only come now?" Was kind of in a coma. oh how much I would love to say that right now.

NASA:" We tried to find him ourselves first. We hoped he would still be nearby."

China:" Well apparently you didn't have enough men. If you told us directly we could have helped..."

NASA:" Believe me, that was not the problem. We had enough men."

China:" Oh? Are you sure?" He was taunting me now. But I don't let him get to me.

WHO:" The problem is..... " She wanted to say it herself, but it seems she can't. The moment she starts she gets almost quiet and her heads lowers in shame, as if she did it herself. So I finish for her.

NASA:" He has killed the people going after him." My eyes go from her back to the crowd and everyone has their eyes wide open. Everyone is in shock, not speaking a single word. Until....

France:" What? What do you mean he killed them? UN? THE UN? has killed?" Germany is the only one who has not a shocked expression, but one of fear and his eyes are far away. Remembering the past and being scarred for his life.

NASA:" Yes. That is why, I am now warning everyone who wants to participate in finding him. Be always aware of your surroundings, the chance of him attacking you all, once you come close is very high." And wasn't that frightening. Many don't know how powerful he truly is, but even so, many saw him fight at least once, some of them even saw him fight in the second world war, at the end, and even without his machinery weaponry, is he extremely powerful.

WHO comes a bit closer and whispers to me:" Is that the reasoning you settled for, to make them understand? Is that all you're going to tell them?"

NASA:" They are aware of everything they need to know."

WHO:" No, they do not. They are underestimating the danger. Do you really think, that when the UN attacks he won't pull out his guns, or rockets? His lasers and what else he has? They will know anyway. So if you send them already, do it with them knowing what is actually happening."

NASA:" If they knew they wouldn't help. They would not care anymore."

WHO:" Do you really take them for so low?"

EU:" I am sorry, but what are your orders?" I get a bit surprised as EU suddenly talks on my other side, seemingly worried. Of course he would be. He sees UN as family too, as we needed to call him for this meeting, he was short of a mental breakdown. He has all his hopes on me. Yet he doesn't even know the truth.

NASA:" I will force no one to help, but we all know how important

the UN is to us, not only as an organization. So the faster we find him, the faster we can help him." I only hear WHO grumble besides me, as EU lifts both of his arms and screams:" Let's not waste anymore time. I want everyone who wants to participate to raise his hand, and then we make a grid and split everyone up, that way we will find him faster." And the hands begin to rise and rise. At first I can't see a single person, who doesn't have their hands up, then I spot Germany. He of course doesn't want to participate after what he saw. But he is not the only one, also Switzerland and even China are hesitant. China was unexpected. I thought his curiosity would send him out there with the others.

WHO:" I hope you are aware that most of them only help because they think that the UN won't actually harm them? That little warning of yours, has not brought the point across." I only give a side glance at her and ask her in all seriousness:" Do you want to find him or not?"

WHO:" OF..... course. But not by risking others." She almost screamed in rage but stopped herself, as she remembered she is in the presence of plenty of people.

NASA:" Live with it." She gasps at me and I turn to the crowd. While I understand her, and I also don't like this, not finding him is far more dangerous. We don't know where he is, and who knows if he goes out actively hunting people, the longer he is gone the further he could go. What would happen if he found his way onto earth. A slight shiver runs down my spine.

I will tell them. After I know him safe.

WHO Pov:

This is crazy. I watch as everyone disperses and slowly leaves the room. Having a paper in hand ready to go out into the wild on a goose hunt, but what they don't know it is not a goose hunt, but a tank hunt. A tank armed with rockets, lasers and an intelligent Ai, ready to kill at the moment.

I squeeze my hands tighter until I feel my skin rip apart. I can't say anything, even though I really want to. But if I do, then.... they

might actually stop looking for him? Dammit. FUCK. SHIT. I could so easily step up, but I.... I too am afraid, aren't I? Of course, he is family. I squeeze my eyes shut, I am really pathetic, aren't I?

EU also gives me a paper with a sad smile and pads me on the shoulder saying:" I understand what you are feeling, but I am sure we will find him." That is what I am afraid of.

WHO:" I know. I know he is out there and we will find him, with all this help, but...." EU suddenly looks a bit more worried and comes down with one knee to be more on my level and asks:" Is there something, you are worried about?"

WHO:" It's just.... I am afraid... of UN hurting anyone." Just SAY IT DAMMIT. Why can't I just say it, spell it out if you need to.

EU:" Ah, I see. Yeah I understand that, but even if he is confused right now, am I sure he wouldn't really hurt anyone badly. We just need to be careful not to scare him and give him space when we find him. Explain it in detail, like we explained in the meeting, it will be fine." And that is the problem. They think it is so simple. It isn't. No this is not right. As much as I want the help this is suicide.

WHO:" EU, this is far more dangerous than you think, he...." And suddenly another hand lands on my other shoulder.

NASA:" We don't have time. The others want to start, let's go." No I still need to tell him...

EU:" Of course." EU gets back up and follows seemingly having forgotten our talk completely. But I can't even be mad, the moment I see his eyes glow with determination, I feel bad again. I feel bad for not being able to trust UN as much as EU does. In front of Germany I played it off, but in reality I am a bit afraid. UN is still UN, but.... right at this moment, he has no control over himself. I look at Germany, who is the only one still sitting now and see him looking out the window, seemingly lost in thought.

Germany told me so much, and I can see how scarred he must have been. UN is powerful, I need to warn them..... don't I? As I watch EU and NASA leave through the door, I notice NASA glance one last

time back at me, with a neutral face, before both disappear behind closed doors. The face was neutral, but the message was clear.

I want to follow them, but then I hear a little sound. I look down and notice blood dripping down my hands onto the floor. I slowly open both my hands and notice the open wounds. It is not really deep or big, but I shouldn't leave it like this either.

WHO:" I have a bad feeling. Should I trust in UN more? Or is my fear justified? I don't know. Do I have the right to speak about his past, even though he never told me himself? Am I allowed to make such a decision, without truly knowing if he wants that himself? Is that even truly the question... maybe I also just don't want to see all of them turn around and go home." I let my arms fall and start walking towards the doors, where a first aid kit in mounted on the wall.

I hear footsteps as I bandage my hands. I don't even need to turn around, to know it is Germany.

Germany:" Are you okay?"

WHO:" No, you?" He chuckles for a moment, probably at my brutal honesty. But after all the lies spoken today, I don't feel like it anymore.

Germany:" No not really." He stepped even closer, now standing next to me and asks:" Are you going?"

WHO:" Yes. I want to be there, when they find him, in hopes of catching the bullet they would be hit with, because they didn't know."

Germany:" So you do feel bad." I suddenly turn around, feeling like I was stabbed with a knife by these words, answering enraged:" OF COURSE. You think I want them to not know? NASA is the one who made the decision."

Germany:" The meeting went for a total of 30 minutes, you could have spoken up." My eyes slowly go back down to my hands, who are now fixed.

WHO:" I know, but it feels like I don't have the right to. I don't know what the UN would want. I thought I would know him, but that is clearly not true, so I need to trust NASA's judgment."

Germany:" Is that really everything?"

WHO:" No, but that is the most prominent reason." For a moment we both didn't speak. I thought the conversation was over, so I started to open the door, to finally catch up with the others as Germany speaks:" I hope when it comes down to it, then you choose not to be silent." I am not sure what he means exactly with it, but I reply anyway:" I hope so too." And I let the door close behind me, leaving Germany alone in the meeting room behind.

Germany Pov:

I need another 10 minutes, before I have the strength to leave the meeting room. My hands were shaky the entire meeting over and even after it finished, I noticed my mind drifting back to the terrible memories. It feels like the second world war all over again, but this time a peace keeping lover hunted me. Which hurts everytime I think about it. And the talk with WHO sadly did not help.

I open the doors and walk through the halls. I am alone, as everyone else either went looking for the UN or went home, being scared by the threat of being hurt by him. Well it wasn't really a threat on the level it should have been. Too many didn't understand the real risk.

China:" Contemplating something?" I almost jump out of my skin, feeling my soul leave. And I am not sure, but I think I made a sound unbecoming of a male. I turn around and see China just chilling there, leaning against the wall. Fully relaxed, not having a care in the world and not reacting to my reaction at all.

Putting a hand on my heart I ask:" What are you still doing here?" He pushes himself off the wall and comes a bit closer answering:" I noticed your weird behavior and wanted to ask if you knew more than the others." That truly caught me off guard.

Germany:" You overthink stuff. I don't know anything." His eyes are staring right into mine, his face completely neutral having all his thoughts locked unseeable from the outside. I couldn't stop myself from ripping my eyes away.

China:" And yet you can't even look me in the eyes when you say that." I look back up and stare into his and repeat myself and add:" Better?" China only gives me a shrug and turns away:" If you don't want to say it, then that is fine too." He starts walking away and the

last thing I hear is:" But that you are afraid of something, is clear. So I just wonder..... should we be too?" And then the main doors close behind him and through the glass doors I watch him walk to his car and drive off.

And then there is something coming from within. I can't stop it and punch with my metal arm the wall, making it crack. I take a big breath and let my arm fall. He is right, I am afraid. I then use my other arm and put it against the wall and let my head follow. I need to take a breather. I was already not in my right mind and China just made it worse. I lectured WHO about keeping silence, but I am not much better. But I atleast have the excuse that I feel death, stare into my soul whenever I just think about wanting to explain what happened to me.

Germany:" And yet I feel stupid for it. I lived through two world wars and have faced a multitude of enemies before. So why am I so afraid of UN? Is it because he was someone I trusted? As if I weren't betrayed by my own father before." My knees give in and I land on the floor. I stood face to face with a tank before. I was encircled by soldiers ready to kill me. So what is so different about UN? ...No, that is a stupid question.

Germany:" He is a goddamn nuke. Not a pistol, not a tank, he is a missile, ready to shot at short range, no way to escape. He is death. If ....he wants you dead, you are." I sink even lower and wonder:" What did I do? Why did he attack me?" What did I do wrong? I am afraid, that the moment I see him again, he will hunt me again. And this time NASA won't be there to safe me.

Then I will truly be dead. No one will then be able to safe me.

I think, I will stay here. That is the safest option.

The last thing I notice is my tears hitting the floor and my breath coming short.

I don't want to die.

EU Pov:

I formed a group with WHO and America temporarily, since our search fields are quite close to each other.

EU:" Like we said, everyone will start searching at a delay of half an hour and we walk down our squares and burn him out of his hiding." It will be like a wave, where UN if he is running away from us, will only have one way to run away from.

America:" Burn him out? Why would UN even hide? only because he lost his memories, doesn't sound plausible." .....

WHO:" Who knows... We can ask him that when we find him." I close my eyes for a moment, not wanting to think about all of this for now.

EU:" Exactly. Thinking about that right now, would just waste time." I look at my clock and start walking into the forest, that is surrounding our Capital." Anyways, as I was saying a Group is positioned at the end of the first search area, in this case the end of the forest, so that UN would walk into them."

WHO:" Who was checking the city again? I only remember making plans for the surrounding forest."

EU:" Everyone who declined looking for him is supposed to keep an eye out, as well as Italy and South Korea. North was supposed to help too, but he.... is being an asshole." I still get angry when I think back to the talk I had with him. North did care for UN and apologized but only so he could be allowed back in, directly afterward he played petty and didn't listen to me anymore.

I look at America and don't feel any better about him. He still hasn't apologized, but he at least wants to help, even though I have the feeling he does that so he can speak with UN first, to let him back in.

America:" Okay, stupid question though what is when he flies off? I mean he has wings." America keeps looking around, even putting his head in bushes as he talks. I only slightly turn to him saying deadpan:" Then I fly." His head snaps to me lifting a finger as he opens his mouth, but more than a breath intake does not happen.

So I keep looking.

WHO:" America is a bit right though. I hope there is more to the plan. While you can fly after him, he is stronger than you and you are the only one who has wings besides UN." WHO suddenly looks very concerned at me, but I smile back at her reassuring her:" Don't worry, I will be the tracker in that case. The plan is that I don't come close and just follow so that the rest can follow. He can't fly off forever." Well to be honest, I am aware that if UN wanted he could fly way faster than me.

America:" Sooooo, how far is our search area again?" I feel my eye twitch. Is he really already bored?

EU:" America, I beg of you."

WHO:" EU it's fine, I get that we are all stressed, but a bit of small talk shouldn't hurt." She suddenly climbs up a tree, that looks to have a hiding spot a bit up ahead. Before I can answer, she is already back down, landing with a little thud.

America:" I was just asking because I don't want to think I run after UN and suddenly, it is the other rescue team."

EU:" I see. Well you don't need to worry about that because they will always be behind us. We are the first to start, so if you see someone, it can only be UN."

America:" oh, okay." And then there is silence...

We walk easily for another half hour, without speaking a word. As suddenly...

WHO:" AAAAHH." I sharply turn to my left, where WHO was standing and see her fall to the ground. Only a moment later is a fox jumping out of a bush and running away. America is immediately at my side too and I walk towards WHO, helping her up.

WHO:" I am sorry." She dusts herself off and I only add:" It's fine. Our nerves are high." She only giggles a bit at that adding:" Yeah, I was not expecting a fox to stare at my soul when I pushed the

branches aside hahaha."

America:" I feel like if that were UN, the scare would have been even worse."

WHO:" probably. If I look for someone in a bush, I should expect someone to be in there."

EU:" We can't lose focus right now. Let's just keep going." Both nod and we proceed our search. As we walk I put a hand on my heart, still feeling the fast heartbeat. I got scarred for a moment, or rather surprised. It needs a moment before it even starts to slow back down.

America:" You know, I wonder.... NASA warned us, that he could attack us. Do you all really think he would suddenly throw his fists at us."

EU:" Who knows. If he really ran away, than maybe because he is scarred of something. Something that was in the past, so maybe if he sees us he will try to defend himself."

America:" But what could he be scarred of? He is literally the strongest out of all of us. I mean we all saw him fight in the war, right? He fended of thousands of soldiers so easily.... everything was red and he had not a scratch on him."

WHO:" He is no doubt strong, and maybe he is confused a bit right now, but I believe in him. "

EU:" I believe that he would not attack us suddenly, as long as we don't provoke it. He is not an unreasonable man, he never was." I notice that WHO wanted to say more herself. It seems I interrupted her and ask:" Oh sorry, what did you want to say?" But she just lifts both her hands and waves me off saying:" Nothing. It's fine."

America:" But what if we fail. Could we really stop him? He could punch our lights out before we even start to defend ourselves. Remember how he suddenly appeared in the war. We didn't even see him coming."

.

.

.

Nothing but burned soil all around us. Easily 30 Countryhumans around me, we all partially wounded, but nothing fatal. Humans surrounding us, weapons in hand. The sky dark from all the smoke and nothing but gunfire around us. We prepare to dodge another round of bullets, ready to break a few necks and defend ourselves, from this stupid fight born from fear and arrogance. As suddenly we only hear a loud sound.

At first we thought another artillery hit near us, as it almost sounded like it, but the explosion never came only the dust cloud from the impact remained. I was probably the only one, who even noticed it, under all the gunfire and other explosions. It was just a dead bomb, nothing to think about, but I noticed something, so my eyes stayed at the cloud. A figure. A shadow was starting to form in the dust as it started to disappear. It was taller than a human. At first I thought it was just my imagination. Or a weapon of the humans.

But then a Human runs past it ready to storm us, but the moment he walked past it, his head was suddenly on the floor and his body follows only a moment later. My eyes turn big and I feel my breathing speed up. Before the cloud completely dissipated, something flew straight up out of it, too fast for my eyes. I could only see as it came back down taking another human with it, killing him instantly, and then gliding over the ground in weird curves only leaving dead bodies. Not sure if it really is on our side, I scream:" WATCH OUT. SOMETHING IS COMING." My finger point in the direction and immediately everyone's eyes are glued on it. Right before it is at our side, it starts another glide upwards and lands with a stud noise right in front of us. He is slightly bowed forwards, so that we at first not notice who he is and how goddamn tall he is. Just as he starts to lift his head up and strain his back to be straight, do we notice how tall he is.

America:" Who the Fuck are you?" I have never seen that flag before. It is blue with white lines and the map of the world. An Organization?

UN:" My name is the United Nations, I am a World Organization formed to uphold the peace in this world."

Brazil:" A peace organization? What a bullshit. I am sorry, but someone like you should not be here. We are in the middle of a war, someone like you can't do shit here." I, the only one, who saw him kill it seems, are all annoyed and are suspicious. But suspicious am I too.

UN:" Don't worry, I don't plan on handling this diplomatically." He then turns back around, letting us see his wings in full glory. And then I first notice, he has more than one pair of wings. He has two. As he opens them, seemingly ready to back into the air, I notice the feathers turn sharp. Seemingly glow in the little light, that the fire around us makes.

Canada:" I don't really care who you are, but don't just start running of. If you go all alone at them, you might actually die. We need to stay together."

UN:" You are underestimating me." And then he sprints off, instead of flying as we all thought he would. He runs fast and as the humans start shooting at him, we were certain he would fall to his knees, because of the pain. While we don't immediately die, it still hurts, and we were all certain, a newly formed country, has not experienced it. But instead he kept going and grabbed one of their heads, making a paste out of it.

Mexico:" Shit." I could only stare in awe. He used his wings like blades, with an incredible range and with a turn around, five heads flew on the ground. And then he took off, flying up and gliding over the ground, slicing the heads off and evading artillery, that is now aimed at him. We barely notice the tank arrive on the horizon, before the pipe upfront falls off and the entire tank going up in flames.

America:" Did anyone see what just happened?"

EU:" No." He was looking like he was dancing just barely over the ground, not touching it once. The longer we watched the redder his wings turned. From white, to pink, to a deep seeping red. His face

dripping from the human blood. And then I noticed that we are just watching and should do something too.

But as I want to move another artillery hits right next to all of us, making me close my eyes. As I open them I only see a human with their gun right in front of me, him ready to shoot me in the face, but before he can his arms fall off. He screams and then I see the bayonet pierce his heart. As I look up to see who holds it, it was the United Nations.

UN:" Don't just stand there." He looks at me, and in that moment I see these red eyes pierce my soul. Where they always red? No not only that, but his entire eye seemed black. No light to fall onto them, made them look dead. He looked like the devil, with blood flowing down his head, his wings fully red, weapon in hand, and his red pupils staring me down.

America:" Where are you even coming from?" United Nations never answered and just threw the gun at another human, who sneaked up behind us, throwing the bayonet in his head.

UN:" Let's talk after all of this is over." I never noticed him take out his guns or grab some, but I only remember him suddenly having a pistol in each hand and he ran off again. I ran after him this time. We both using our wings as shields. I punched a few humans their skulls in, as he was shooting the ones trying to snipe us from further away. I don't remember him ever reloading, seemingly having an unlimited arsenal, but in all that chaos I never concentrated on it.

At one point we had both our backs to each other, me having gained a weapon from one of the humans, and letting us shoot everyone in a circle. A moment later, I was alone and he was back up in the sky, looking like a fallen angel, seeking revenge.

Another moment later, I am with America and Canada again. Then we split up again, the war went on forever. The blood flooding the lands. The fire spreading further and further. The smoke piling itself up. The screams the only thing left to hear and above all an Angel, not ever stopping in pain, or changing his face, to look sad, angry or happy. Always neutral, killing more than we all together.

Only a few hours later, did the humans retreat, not able to even hit us once again, as everyone who came close enough was shoot down, head smashed in, loosing limbs in agonizing pain or loosing their head, through one of the feathers. The Artillery that could have hit us, was shoot down mid air, through unbelievable precision. The Tanks blew up through piercing shoots hitting their fuel tank or ammunition almost instantly, the moment you could even see them on the horizon.

I remember the pause we all had, when they reorganized themselves and retreated and the United Nations was just standing there, never putting the guns away, never taking a break and always his eyes moving checking the area.

EU:" You should take a break. They are definitely coming back, we should take all the rest we can."

UN:" Someone needs to watch out, or else they will sneak up."

EU:" Yeah, but someone else can do that. You have definitely done more than any of us, the adrenalin is probably the only thing keeping you upright."

France:" I am not too sure about that. I mean look at him, he has not a single scratch."

GB:" Yeah, He fights like a machine."

America:" Are you sure you are a new Organization? You fight like you have seen the world form."

Spain:" I am more worried, about him being a peace organization. He fights like a war god."

UN:" I promise my main goal is peace. Sometimes piece can only be achieved by eliminating others. There are people out there, who make profit out of war, and would do anything to create more war. You can't talk to everyone."

America:" Wise words from a child."

EU:" Child? He is easily as tall as two of you."

America:" Doesn't change the fact, he was basically just born." True, and that is probably the reason, why we all are either confused about his fighting or afraid that he could turn on us for whatever reason. He appeared out of nowhere, and no one of us has ever seen or heard of this Organization.

UN:" Well then let me introduce myself properly. I am the United Nations in short the UN. I am a world Organization created by the United States of America and in my Organization are all Countries of this world combined, seeking peace for this world." He makes a slight bow and closes his eyes, giving us respect and a proper greeting. No one was expecting it, so no one spoke, until we all heard the confused voice in the middle.

America:" Wait.... *I* have created you? Why don't I know this?"

Wordcount: 3160

20. Fight

EU Pov:

The Sun starts to go down.

WHO:" The Sun goes down, if we don't find him till the start of the night, then we need to turn around."

EU:" He is here somewhere, we are almost at the end of the Country area, if we really don't find him, then he left to the Human world and that.... then we won't find him ever again."

America:" Yeah, but him leaving would have been noticed. We would all have been given a notification. Remember we get a notification since the incident with Third Reich."

EU:" I know. But no one contacted anyone, saying they at least saw him. Like he just vanished."

WHO:" He is just good at hiding. We will find him though, we have enough eyes."

America:" Hopefully."

As we talk, I suddenly feel eyes on me. I turn around but there is no one. I keep looking but there is not even a leave moving. The wind stopped.

WHO:" EU?" And then I hear a shot. I can see the bullet fly past me and I hear it hit something. I turn around and see the UN and his hand is bleeding. Wait, he is bleeding blue. Why is it Blue? He only stands there for a second, before he opens his wings and goes airborne. Doesn't matter, I have other priorities.

EU:" Oh no you won't." I don't know what is happening right now as it happens so fast, but I know I can't let UN escape.

WHO:" No stay here, that is dangerous." What? Wasn't that our plan

all along? And suddenly another bullet flies past me and hits UN's wing, but instead of seeing blood this time, I only hear a metallic sound, as the bullet just bounces off of his wing. What was that?

WHO:" I get help." And she runs off, before anything other is said, everyone is too concentrated right now anyway.

UN of course turns around and suddenly.... His hand looks like a tiny Railgun? My Instinct screams at me and I move.

Suddenly UN shoots a way bigger projectile than a bullet past me. If I had been the target, there was no way for me to react. I follow the projectile with my eyes and only watch as it hits somewhere kilometers away in the forest. Is that were the shooter was? From that distance? No, I don't have time for this. I look back at UN and see him trying to fly off again. He doesn't see me as his enemy, which I don't try to be, but it would be nice to stall time and bound him here, till WHO has called the others.

EU:" UN?! WHAT HAS GOTTEN INTO YOU? COME BACK HERE?!" I hope to make him remember, I hope to bring him to senses. Why is he attacking us? Is he even? He seems to flee, but didn't he try to attack me back then?

UN suddenly starts a descent into the forest, he wants to lose me, but I won't let him. I am directly behind him and try to grab his leg as I hear another shot being fired and making UN evade and go the other way around a tree. I then see America standing there with his pistol aimed up high. I can't concentrate on that, I looked back at UN and followed him.

I stay close enough to still see his feathers peek out between the trees, but I am not quite fast enough to close the distance.

I was sure he knew I was right behind him. He never looked back, but I was sure he knew. He was flying left and right around the trees, trying to loose me, then he suddenly flew around one of the trees and aimed his gun at me shooting without hesitation. I could barely do a barrel roll to avoid getting hit, but I could still feel a few bullets go through the soft feathers of mine. We flew past each other and I set off into the sky, not having time to look back, I only

heard another shot and was sure I would have been hit, if I had tried to turn around.

After I am back over the forest, I slow down and look down. UN is gone. I look for blue in between the trees, but nothing. He is not that fast, he must be hiding under a tree, to not be seen. But I do see America who is running below the trees, also looking for UN.

I grab my Walkie-talkie and Inform the others:" He is right under me. Come fast, before he tries to flee again." I was expecting to wait for another minute, since all the other countries could only walk. But I suddenly see something fly past me directly into the forest, disappearing behind the green crowns of the trees.

What was that? It was blue, wasn't it?

I follow it instinctively. No one besides UN and me can fly, so who....

As I enter the forest again, I can hear bullets fly. I land on the floor and tug my wings behind me, as I hide behind a tree watching from a bit further away. Still close enough to step in if necessary. But all these thoughts disappear as I watch NASA fight in close range with the UN. But not the fight caught my attention, but the black wings attached to NASA's back.

I watch as NASA uses his wings to jump higher and kick UN in the face, UN does not even falter as he grabs the leg and swings him away. With NASA's wings is that no problem though, as he corrects himself to lands on his feet and pulls his own gun out again to shoot at UN. UN uses his wings to shield himself, but NASA uses that to get back close. He fires a few rounds, making him keep the wings up, and as he opens them NASA pulls something out of his pocket and throws it at UN, but he just deflects it with a wing and a simultaneous jump back.

Should I do something? The whole scenery feels surreal. I only hear the explosion of the apparent grenade that NASA threw at UN. And then another thing starts to click.... UN transformed his hand into a gun..... Because of all the adrenalin and the fast passing of everything, my brain had no time to process anything. But now I

am even more confused. What is going on? NASA has wings, UN.... Is his body robotic? Why did I never notice.

In my stunned state did I notice to late that UN had gotten the hand on NASA and was ready to shot him in the head. I could only see NASA's back, but I could guess that he was scarred. Probably.

As I tried to run over and do something, I only saw a bullet suddenly hit UN's head to which he let go of NASA. But UN only staggered for a moment as the blue blood was flowing down his head. And then I heard the sound of the gunshot. A sniper?

Right, someone is all the time already shooting from afar. And the blue blood. Fuck it. I shouldn't care about that right now. I am here to get UN back, and nothing else should matter at the moment. I step closer and grab NASA throwing him behind me and using my wing as a shield so that he can at least catch his breath. And as expected, does UN already charge at me with a wing flap is right in front of my face and I try to punch him in his face, but he does a barrel roll around me disappearing in the forest again.

EU:" We need to fight together." I get back into a fighting stance and open my wings ready to fly after him and so does NASA, we both go airborn once again and follow him.

NASA:" I will follow on the left, you go right."

EU:" Right, Understood." We can't directly get closer, but once he tries to turn, one of us will be besides him and it didn't take long. He took a right trying to attack NASA with another gun, a shotgun, who evades effortless, even though the spray radius is massive and goes closer to the ground, while UN goes upwards. UN who needed to fly a bit slower to attack, made it possible for me to be right behind him now as I kick him in the wing to get him back down, but except a slight tilt does he not fall. He turns around and aims the gun at me, forcing me to hide below the tree crown again.

UN being a but more wary of his surroundings, keeps a little distance away from us. He does not descend and stays up there keeping his surroundings in his line of sight.

NASA:" Watch out, he might try to flee again." I flex my wings ready to take off, whenever necessary. No one moved, the tension was then brought to motion through another bullet flying at UN. I didn't even notice, until UN was already letting himself fall a few centimeters, moving out of the path of the bullet. He already knows where the sniper is sitting. And without looking at it, does UN points his hand in the direction the bullet came from and this hand now transforms too.

NASA:" Fuck. The Railgun." He takes a leap and grabs me pulling me out of the trajectory. I can't think too much on it, as I fly up with NASA in my adrenalin rush and go around him while NASA goes upfront, having this terrifying weapon directly pointed at him. My brain can't process yet that the burning ground behind us with the half destroyed trees was caused by UN in just a split second. Without NASA I would not have reacted, not predicted just a big radius of attack. NASA flies up making UN concentrate on him. Having the sun behind his back he pulls out his gun and aims at UN, but he just moves a bit back evading easily and I can hear the sound of the charge up of another round of this terrifying weapon. I can't just stand there, so I try grabbing his wings. But without looking back, does he let himself fall, making me catch air. Can he see behind his back?

UN then turns around gliding and with one full flap is directly under me and grabs my hand twisting it, but I just move my entire body with it , letting me fall a bit back down to gain momentum to kick him with. UN reacts with just letting me go and flapping himself higher making me miss my kick. It takes me a moment to stop my fall and get back in balance. But from behind comes NASA distracting UN from me, by hitting him with the gun on the head. UN of course reacts fast by turning around and creating distance, wanting to aim the gun at him, but NASA grabs it with one hand and aims with the other at UN shooting. I use this opportunity to get back up there. UN uses his one wing as a shield before he opens them big forcing NASA a bit further away, making him let go of the gun, both fall a few meters in the process, making me stand behind UN. So I take the chance and grab his wings also stopping mine from moving and hoping to pull us from the sky. I can feel the strain in my arms, as UN tries to get free, but I don't let go. We only

fall for a few seconds before we both land on the ground, and NASA follows us fast too. I need to catch m breath for a moment, but UN doesn't. He just stands up and aims the gun at me and fires, luckily another shot rings through the forest, but instead of hitting his head it hits his weapon arm, making a big hole into the ground right beside me. Even though it did not hit me I could feel the heat on my skin, and as my wing was very close a few feathers burn down.

And then America who finally caught up to us hit UN on his head with a ....log. UN isn't even moved by this, as he turns around and smacks America back with his weapon, hitting him unconscious. America hits the ground, out cold.

But instead of concentrating back on me, does he turn his head the other direction from America sharply, and there is NASA already very close grabbing his other arm and giving him a head bud, I can't just lay here. I try getting back up and as both of them fight, do I grab his wings again, balancing my footing.

I can't see what is happening up front, since UN is still a bit taller than me, and I need all my concentration to hold tight, but after a moment, I can see UN's wings glow and an extreme pain shoot through me. I only see lightning for a moment all around me, before I faint.

NASA pov:

EU had a firm grip on his wings making him mostly unable to move. I use that to pull out the little EMP generator I brought with me and while avoiding a fist of UN I try getting closer, since the radius of the device is quite short, but UN must have noticed what it is, as he activates the most energy wasting defense he has. An electric shield. The field powers up so fast, I can't even react, the electricity in form of lightning, is shooting out all over him, making me unable to move. I need to grind my teeth, almost loosing vision, but standing tall. After only a moment it is over. I watch as EU falls down behind him, unconscious. I also fall on one knee, unable to hold myself on both any longer, I can feel my wings twitch behind me. I know that they are out, I can no longer fly right now, I can't let UN escape. UN needs a moment to come back to his senses as well, since he needs to temporarily deactivate everything, to power

this attack. Now or never.

NASA:" aAHHHHHH." I use all my strength to get back on both feet, feeling my body scream at me, as my muscles have a hard time understanding what I want from them, still in shock. But this is not the first time. I was hit worse. So I get back up and just take a single step closer, putting the device against his chest and pressing the button. It takes a moment, in which UN comes finally back to his senses, grabbing my arm, almost crushing it just from the short touch. But then I won, the device activates before he can pull my arm away. I only hear a sizzling in my ear, as I watch UN's eyes turn from red to blue and then disappear entirely, only leaving behind the black eyes of an empty shell. He doesn't even fall down, he just stands there unmoving, his head still tilted to look down on me. Sadly because of the stiff grip on my arm, I can't rip myself free. But my legs give up and I just let myself be held. My shoulder is aching a bit from the weird position it is in now.

My head is dizzy and my vision fades her and then, but I need to prevail, till WHO comes back. She can get me free and then we need to bring him away before the others see. I dont know how long I already waited, but a few minutes before m brain concentrates on some sounds from nearby. I can't pinpoint them and so my head drifts off again.

I felt like I could fall asleep any moment now, but then I hear a stick break and steps behind me. I turn my head on instinct and I see..... China. He just stands there with.... A sniper rifle in hand. Is he the sniper? He puts the rifle against the tree closest and takes a second to look over the situation. His head moves from the right to the left, and his eyes seem to be stuck on something for a moment before he moves them back to me.

China:" Looks like you are stuck." I then remember I still have my wings out and pull them back in, making them disappear inside of me, as they pull themselves in.

China:" Well, that looked gruesome." He then starts coming closer with a smile. I have a hard time thinking, still affected by the electric shock, but I am still wary. China knowing my Secret and probably having connected the dots with UN is dangerous. He could

spill, but I also can't stop him. Not in the position I am in right now.

Wordcount: 2 865

21. Countryhuman or not

NASA Pov:

China:" The others will be here any minute. Especially WHO as she was pretty close. America though got lost."

NASA:" so the typical." And then there is silence, China just looks at me with an unreadable expression making me wonder what he is thinking right now.

China:" You know you are lucky."

NASA:" Am I?" I don't know what he wants to say. I look up at him and watch as he starts to try untangle UN fingers, but he realizes pretty fast, that that won't work.

China:" If I didn't realize something was wrong, you both could now be dead. I can kind of understand why you didn't tell everyone but.... I am not sure it was the wise decision." Is he now reprimanding me? I hear a slight groan as China tries a second time to open UN's fingers but with a big exhale he gives up and leans against UN, seemingly not afraid that he would fall over.

China:" Yeah that won't work."

NASA:" You weren't in my position. It was a difficult decision, what use does it have to save him, but to loose his purpose. He is meant to be respected by everyone and lead them, what would happen if no one did?"

China:" mhhhhh. He would rebuild his respect?" I look dumbfounded at him and he adds:" I mean, I am pretty sure that UN would be able to build everyones trust from new. I mean if we go with the past, isn't that what he already did once?"

NASA:" I think there is a big difference on both cases." Everyone would know he is not a Countryhuman.

China:" Really? And what would that be?" I look at UN and sigh.

NASA:" China, you did help me no question asked, but there are things you shouldn't ask. Just leave it be." I could only hope. I couldn't force him to not ask, or do his research, it is like with Germany, once they connect the dots, it is already to late.

China:" Why are you doing this to yourselves?" I look back at him confused." Why do you think you need to shoulder the entirety of UN yourselves. His blood is blue, if you want to call it blood. It is the same color as the substance, Germany uses for his mechanic arm. I saw it through pure luck as it was once damaged, but even then I know that our blood is golden, not blue. Let's not even start on the robotic body of his. But I do wonder, who build him? For what purpose? And why is an EMP working on him? With how technological he is advanced you would think he is immune to that."

NASA:" He was build decades ago, EMP's have not existed then." So he fully knows. I hopes he was missing a few pieces, for me to have more time to think of a solution, but it seems I really lost.

China:" And my other questions? Who build him? On which command? Did you build him? Why?" I really didn't want to answer that, I look at the ground, feeling the strain on my arm getting worse.

China:" He appeared first on the battlefield. He has build in weapons.... Was he made for war? But isn't he a peace organization? .....wait.... We all have never heard of that organization before he appeared in front of us....." And then it descended into muttering" America was confused too, even though the UN was created around the US. Did the humans fabricate that? Is that even possible, to create such an organization in person, before making the organization. Was the UN build before the Organisation was made? But with what use..... To stop the Countryhuman 'UN' from forming?" And then he just stopped, seemingly frozen in thought, before he started his muttering engine again, always having his eyes glued at UN. I stopped understand his words long ago, as he was seemingly talking to himself, whispering. But his eyes become bigger and bigger as it went on and on. I

closed my eyes at some point listening to his incoherent muttering, letting it be just a nice background noise making sure I don't fall asleep, until WHO arrives. Where even is she? Why is it taking so long?

UN pov:

America:" wait I made you? ....I feel like I would know that."

Poland:" Not to speak that we are in the middle of a war with the humans. Why would they suddenly make a peace organization, and on such a scale too?" Everyone was suspicious it was to be expected.

----just a moment before that in the plane above the battlefield------

Officer:" You know what to do, right?"

UN:" Yes, infiltrate the Countryhuman party and make them trust me. Become a part of them."

Officer:" Correct. You are allowed to do whatever it takes to make them believe you, no matter how many need to be sacrificed."

UN:" Understood." The Wind is extremely loud and whipping against the helicopter. I am only with two other people in here, and the one who isn't talking to me, has binoculars in hand checking for a landing spot.

Officer 2:" Found them. 1,5 away."

Officer:" Roger. 001, remember your name is the United Nations, short UN, and you were created by the American citizens, and are a world organization for peace."

UN:" I remember, sir. I will not fail my mission." He nods and takes a look out of the helicopter before he says:" Then start the mission.... UN." I take a step closer to the edge and jump out of the helicopter, opening my wings fully, to slowly descent onto the battlefield. I look for the Countryhumans, and find them actually quite easy.

Analyzing the battlefield....

The Countryhumans are in a predicament. The enemies outweigh them 1 to 3000. Not good. Let's help.

After a quite easy fight for this metallic body I said what I was ordered to say, but it seems that America himself didn't take it very nice.

America:" I asked you something. If my people did something, I should be aware of it...." He started to glare at me and a hand is squeezing his pistol.

Analyzing situation....

SHUT UP. This will not help here. Let me deal with this myself.

UN:" I am sorry, but why should I lie?" I put a hand to my chest:" I am clearly a Countryhuman, just like you, or do I look like a Human to you?"

America:" Who knows, maybe you put on makeup."

Poland:" America.... he is over two meters tall." Poland just looks done with America.

America:" There ARE Humans that tall."

Britain:" NOT THAT TALL. LOOK AT HIM?!" He points with his finger at me, while looking enraged at America.

UN:" Is that a compliment?" I am uncertain, how to respond to that. The Scientists either hated my height or were impressed by it, but because of the slight anger in Britain's voice, I can't identify it.

Britain:" Just a statement. Because that moron won't get it." Britain then suddenly stretches out his hand and smiles. I grab it and we shake it as he adds:" Happy Birth, I guess. Though the timing might be bad." Happy birth? Well I am already a few years old, but they better don't know that.

I hear someone shot in the distance. It is getting closer.

Brasil:" It seems Group 2 finally is back."

UN:" Group 2?"

Britain:" Don't call it a group. It's Switzerland with Information."

And as he finished his sentence, Switzerland jumps over a bump on the ground and I can see him run to us. With a grenade launcher at his back and a stack of papers in hand. He stops in front if us, fully out of breath and insults the ground as he gives the papers to France and she immediately starts looking through them.

Switzerland:" They have readied their rockets. It is only a time before two of them are sent our way."

France:" These Humans really went crazy. What do they think to gain out of this."

America:" That does not matter. Where is China?" I am sadly a bit out of the loop. I feel left out.

Switzerland:" He is trying to disengage the rockets. He should be back in a few hours, with results. Canada are you alright?" I look at the direction Switzerland is looking, and see Canada putting his weight on his axe, as his leg is bruised a bit. He only makes an 'Okay' sign and smiles faintly.

America:" He can take this much. It will heal in no time." Countryhumans can take a lot more than normal Humans, what was he hit by, that broke his leg? A Grenade?

Britain:" Okay, we can't stay here. UN, from where did you come from? Is there a safe route?"

Switzerland:" UN? ....Holy motherfucker, you are tall. How did I not notice you: Who are you?" I scratch my neck saying:" UN. United Nations. A peace Organisation: Nice to meet you Switzerland. I heard a lot about you." Switzerland one of the few countries, that were in the middle of both world wars, and yet were never involved.

Switzerland:" Thanks. But what does a Peace Organization in the middle of war."

UN:" Peace sometimes can only be achieves when one of the parties is shown their weakness. Not everything can be resolves with words. I am a strong believer and will use everything for the civilians, that didn't want to get involved."

Switzerland:" I see. I like you. That is also the reason I am here. The Humans just suddenly attacked us, we still are not really sure why, but we believe it is a bigger group who believes that we enslave the countries. I just wish they didn't have that big of an arsenal of weapons." I know exactly what happened. A set up for me to join. This group was created and funded by Scientists to create a scenery where such an Organization such as mine would be needed and I can get their trust fast. TO be fair, they also hoped to kill a few to find out what actually happens with the country then, but the Countryhumans turned out to be stronger than expected, so I was sent out earlier too.

Switzerland:" But that you get created right now would mean.... that the countries finally take action? Do you know if they want to sent help?"

UN:" Yes. A colony is on their way, but because I could fly I was faster and was sent up front."

Brazil:" Really? Why would they suddenly help? We are fighting for already three months and now they care?" He still seems suspicious, but not of me but the humans behind me. His eyes are on the ground and he tries to understand it, but he will never. My eyes fall up to the sky. I see something.

Zooming in....

Rocket detected....

So China failed.

Countermeasures active.

NO. Deactivate. I will deal with this per hand.

It is a rocket...

You annoy me.

UN:" Is there something in the sky?" Everyone looks up and immediately slight panic.

America:" FUCK. Shoot at it."

France:" We can't run with Canada fast enough."

Canada:" I can deal with it, run."

Brasil:" We don't know the radius anyway. Fuck." ....this is it. My time. I open my wings and fly up like a rocket myself, fast and precise. I only hear a few voices behind me, but I ignore them. I can see the path of the rocket and slightly fly past it, let it sour past me. Then I close my wings and let myself fall. I am close to it immediately again and grab it.

UN:" Where should I send it? What do you think, System?"

....

Yeah, good idea.

And then I turn around pulling the rocket with me and send it flying back where it came from. Technology is not advanced enough for the rocket to turn around again. But they said there should be a second one. I can't see anything, though, and then I feel the vibration of the waves of a phone call. I look down and see Switzerland is calling with someone.

Intercept...

Switzerland:" China where the fuck are you?"

China:" Sorry, I needed to hide for a moment."

Switzerland:" Is everything alright?"

China:" Now yes. Also watch out, I only managed to disable one. The other one was sent out early because they noticed me. I needed to run real fast for a moment there. So I didn't have time to call,

sorry. But seeing that you took the phone call, it is still on its way."

Switzerland:" Not really. We just..... had help."

China:" Help?"

Switzerland:" We will explain it once you are back, but we are safe for now. And... we gained a strong ally, you will like him." So the second one is already disabled. Good. With that Info, I descend back to the group.

Britain:" You are exceptional. You fly really fast, but that is no wonder with two pairs of wings, I guess." He claps me onto the back and smiles:" I am really happy that you are here. With the family."

Mission accomplished.

I know...

Wordcount: 2200

I had a hard time with this Chapter, so please forgive me if it isn't as good, but If I try any longer on this, It will never get out.

22. Who is he?

NASA Pov:

And I stand there, waiting for something to happen. I am in a hospital and just stand there at the end of the bed in which UN is laying in. He looks so peaceful, if he weren't cuffed to the bed, making him look like a criminal. Which a few would say he is.

I sigh, I turn around going back into the chair and let myself fall. I don't know what to do. Elsa and the others already looked him over and I had probably the worst talk ever.

A few minutes earlier:

Elsa:" Milla is quitting." A blankness overtakes my mind for a moment.

NASA:" What?"

Elsa:" Don't even try to talk to her about it, I did.... she is very sure about it. After what happened with the UN recently she is deathly afraid. To be honest I can't really say, I wouldn't be." She makes a troubled expression, crossing her arms in front of her and looking down rather than at me.

NASA:" You? You build him that way. You integrated the weapons system and everything." The blankness doesn't dissipate. What is going on?

Elsa:" YEAH, AND WE COULD CONTROL THAT. Now.... I mean look at him." She point at him with an angry face trying to prove her point:" We don't know what he would do next. We lost all and every control." Why is she angry?

NASA:" We never had real control. Right after the war, he already made himself independent and didn't act on commands from all of you." Nothing changed.

Elsa:" Yes I know. But this is different. Now he actively attacks us. I hope you know the difference. Because while you can be stabbed a few times, one time is enough for us. We die easily. We don't like dying, though." Has something changed?

NASA:" ..... Is she the only one?"

Elsa:" For now. Ryan didn't seem to mind so far , since he wasn't always there, quite busy the man. But..... Joe is a different story. Especially after what happened last time and the thing before that.... he was attacked a lot of times now. A lot of medical bills were paid." She didn't want to say it directly, but I understood the message.

NASA:" I hope he is at least not suing us." I try lifting the mood.

Elsa:" Bad time for jokes, NASA." And fail miserably. She even glares at me now. Great.

I sigh again this time not from only frustration but stress that is building up and the urge to actually kill myself. As if that would solve anything. But at least the blankness dissipated, and I calmed myself and could think rationally about it.

Back in the present:

After a little bit of talk she left and now I sulk her in my chair that is really not comfy.

NASA:" UN, Why did you attack us in the forest? What did you see?" I wish I could understand him. We aren't even close to fixing him and now the first people already quit. Fuck. I put an arm over my face, getting annoyed by the strong light in this goddam hospital room.

I hear the door open and open an eye to look at the door and see WHO standing there looking worried. She walks a few steps closer to the bed and grabs the end of it, ignoring me completely. I don't know if I should say anything, after all she was quite angry a few hours ago.

Another flashback:

I awoke in the forest as a medical team was checking me and was ready to transport UN away. I tried lifting myself up as I heard a bit of screaming. I turned my head and saw WHO run at us. A few soldiers stopped her and she was not happy about that, making the soldiers retreat after she threatened them with suspension or them getting fired. Together with a few foul words.

She stopped at UN's side and was worried sick about him but noticed fast that he was mostly fine, and couldn't help him herself and so let the medical team do their thing. But now her sadness and fear turned into anger, and I noticed that as soon as her head turned to me and her eyes seemed to glow and pierce my heart and soul with judgement.

And it hurt.

She stormed at me and not even any of the soldiers dared stand in her way and her I was. Not even able to lift myself of the ground barely having my chest of the ground and she already grabs my uniform and comes really close with her face to mine.

WHO:" I am only saying it once, but I told you it was a bad idea. You never had it under control and you never will. Don't you dare come close to UN ever again if you don't plan on actually helping him or I swear on my Organization, I will make my life goal to destroy you and everything that you ever loved, like you almost did with me because of your recklessness and pride." The bitter-sweet voice that I am used to hearing from her was completely gone. I only hear the venom in her voice and the rough undertone from her having cried at UN's side and screaming at the soldiers. There were also still tear tracks left on her face, clearly seeable because her normally blue face has now a reddish undertone.

My eyes scan seemingly everything on her, as I am unable to fully process what she just said, and my Body in a constant state of pain. But she never expected an answer, as she just lets me go and my body that has already gotten used to being held, fell without stop back to the ground, hitting my head in the process. But I didn't dare try to stand back up. I only listened as I could hear the footsteps leave and distance themselves from me.

Back to the present:

I could hear the metal bar, from the end of the bed, creak under WHO's hands. Her eyes fixed on UN. UN's wings are fully open laying on extra mattresses to stabilize their position, yet the feathers are all over the place. Rough and a bit dirty, UN noticed this and couldn't stand the sight. She walked past the bed and to one of the wings and starts moving the individual feathers a bit to make them look less roughed up.

I still didn't dare say anything. I just watched, and at one point even that was too much for me. I got up and noticed the criticizing eye that WHO gave me for that, as if to warn me, not to step a single step closer. But that wasn't my plan anyway. Instead I turn around and leave the room entirely. Only after the door is closed behind me does it feel like I can breathe again. The pressures in the room started to slowly kill me.

But what should I do? Once he wakes up there are only two scenarios, while the others already checked him over and guaranteed me that the security system is offline, he could still wake up and go right back to attacking us. Or he really wakes up as if nothing happened, but even then, what do I do? Do I just send him back to base? I have a feeling WHO won't let me, as if she could stop me. But..... I feel like I couldn't even look him in the eyes when he was still asleep, if you can even call that sleep.

I slam my fist into a nearby wall. I can see a Nurse stand a few feet away from me an look deadly scarred. As I turn my head in her direction she flees.

UN? Pov:

Black. It was always black, but this is different. It feels like there is space or something around me. Normally there is just nothing. Nothing but a voice.

UN:" Yeah I made us a little space this time." I turn around and see UN standing there in his normal uniform.

:" Why do we have bodies now." I look down on myself and see

myself standing on two feet." Normally it was enough for us to converse without them." I hear steps eco in this vastness of literally nothing.

UN:" So I can do this." I look up back at him intrigued what he might mean, only to barely see the fist flying my way and hitting me straight in the head, making me fall backwards. I can't even feel any pain, so the meaning for this goes over my head. I need a moment, before I look up at him. He glares at me with much hate in his eyes and I ask:" What was that for?"

UN:" For the stupidities of yours."

:" I am sorry to disappoint then, I can't even feel that." I hold with one hand my face, as I get up with my other and let the hand on my face fall too as I finally stand back on two feet.

UN:" Oh don't worry, I felt it, and thats enough for me." I am not sure why I am back here and what he really wants, but:" If you are just here to punch me, then I will leave."

UN:" As if I could do that."

:" I can, I did it in the past, or have you dementia already?" I have enough of his bullshit. Everytime we talk it is always about consequences and how I will never understand him. So why talk in the first place?

UN:" Only because I let you. You know, I think you are having a big misunderstanding right now. Last time I let you go because I noticed that you weren't listening to me anyway. But this time this won't do. I will make you understand me because you attacked my friends and I will not let this go unpunished."

:" Again, punching me won't help you." UN goes for another punch and I see no point in evading it as I won't feel it anyway, and he also can't damage this body. So as his fist touches me and sends me flying again, I notice something different. I feel it. And it hurts. I land on the ground, feeling the stabbing pain come from my face.

:" What the....?"

UN:" Doesn't feel nice does it? Like I said, you are under a misunderstanding. This space and BODY IS MINE." He points with an angry finger at himself, and his wings seem to open on their own, angered as well.

:" You don't seem to understand something. YOU LOST. You will always lose. You had your chance and forced me to watch, you never let me live and try this world, try to understand it. So now I will make you watch." I get back up and turn around. I try to leave, but something is holding me here. Dammit. I turn around to scream at UN to let me leave, but the only thing I get out is another scream as I get punched again. Why always the face? And why the fuck do I even feel pain, in the first place?

UN:" You always want to understand everything, but you are a machine. You never felt pain, you never needed to show emotions. You just imitate them, you are not real."

: As if you were real, you are no different to me."

UN:" I AM A COUNTRYHUMAN UNLIKE YOU?! But you never understood that, did you? You always watched, and yet you didn't learn a single thing."

I try to get up another time, but I am a bit dizzy.

UN:" this is what it feels to be alive. Pain, suffering, emotions, sadness, annoyance, anger even. You never really felt any of those, you just imitated them. I know because everytime something happens, even slightly to your disadvantage, you immediately think it is a risk to you and attack. Yet only because someone can hurt you, they won't do it because there is something called *rationality*, which you don't have."

I finally manage to get myself, it feels as if something is pushing me down, or my own body is trying to stop me:" I don't care. I don't CARE. This is my body now, and you won't take it from me again. I will eventually understand it, and if it takes a millennial, I don't care."

UN:" You just won't get it. You never had control over the body.

Never really. I just let you because I really hoped you actually would learn. Like old times, I hoped you would understand and listen. Like when we fought, you helped me in these old times, but you turned into this instead. I can't trust you anymore. So I will retake everything."The old times? Even then I was always pushed aside. I won't let myself be cast aside anymore.

:" MY ASS. If you could do that, why didn't you from the beginning?" A sad expression washes over his face, as if he would pity me. I hate it, because I don't understand it. Why would he pity me? Shouldn't he show anger in this moment? I really don't understand.

UN:" ....because I wanted to give you this chance. I really believed in you, but ....you are just an A.I after all, nothing more than a few calculations and no real thought, and adding to that it is programmed to kill. I am sorry." My ass. I am more than just zero's and One's, I already managed to learn, I can think, so why isn't it enough?

:" As if. Why would you actually care?" You never did before. You never took a back step for me, so I could better understand. You always did your own thing, telling me to shut up, all the time.

UN:" I didn't probably, but you were still a part of me so I wanted to try. And I did, again and again. But in the end you are an A.I created for war, to fight, to destroy. So I made a decision." Then why didn't you tell me, what else I should have done? You always just scolded me.

:" Why then didn't you stop me? Didn't you see me fight your so-called friends, you hypocrite." Yeah, you never cared about those people too. You just say so, so you can go against my word, like you always did.

UN:" I did. But I will be honest, the other reason was because I really did lose part of my memory, but after we finally managed to connect to the world server, I was able to upload everything needed. While you fought against *my family*, I prepared everything and finished. I may be real, but sadly, I am in the body of a machine and so I am as bound to the technic as you are." When did

we connect to the server again? I didn't even notice, how is that possible. And again, I don't even know what it is. There is always something, I don't understand.

:" WHAT THE FUCK EVEN IS THIS WORLD SERVER." In my database there is nothing with this name, and the amount of data I felt from that source was not something a machine could do on earth.

UN:" Oh, right. You aren't a Countryhuman so you wouldn't know. It is our creator. Earth, the place where we all are created." What? Like, god? God is not real. The core? Where do Countryhumans come from..... Nothing. No data found. There is always this void in my mind, as if I could never know. Like it was held from me on purpose. Aren't I supposed to learn? Then why is it never gifted to me?

As a part of me was trying to understand and focused on UN, I noticed a light appear behind me. As I was concentrating on my search, I deemed it not worth my focus right now, but noticed instead how UN closed his eyes and bowed slightly, like the Japanese would, when they apologize. I stop my research confused about UN, before his posture jumps up and he takes a big step closer. From his behavior, I expected a hug or something, since he seems to want to apologize for something, but my calculation was wrong. I instead was pushed. Violently, making me fly back.

I was pushed into the light. I noticed how the black void around me was replaced by a blinding light, that no matter how I changed my Vision, I could not see past. It was a yellowish light that was also warm. The cold nothing was completely replaced by it, and instead of landing on a hard ground I suddenly seemed to float, like sitting on a cloud, I could hardly describe it, having never felt something like this. I still saw the UN standing on the other side of this kind of portal, looking at me before he turns around and this portal closing in front of me, leaving me here in this new place, all alone. But I didn't feel sad, nor anger, what is someone supposed to feel in such a moment, anyway?

UN:" I am sorry, but I made a decision. I should have gotten rid of you years ago."

Was I betrayed? No, I think, I was the one who betrayed him.

Wordcount: 2880

Sorry for the longer wait again, but it needed to be perfect. I hope you all liked this chapter, we're going towards the end of this book already. Originally, it was supposed to be longer, but my motivation is slowly running out, and before I take another 3 year break, I better finish it so you all have some closure as well.

23. Wakey, wakey Society

Do you truly want to proceed with deleting the security program?

YES / NO

Warning, if you do, you are unable to use the weapon system until a reinstallation, do you still want to proceed?

Do you truly want to delete all massages and stop the contact attempts?

YES / NO

Warning, you are now no longer able to defend yourself. Reconsidering is advised.

UN Pov:

I slowly open my eyes, feeling like I have forgotten how to do this in that short time. My eyelids feel heavy. And then I get blinded by the light up ahead, but only for a moment before my pupils adjust easily and after noticing that no one is standing beside me, I try to get up, but I am stopped by my arms being stuck in place. They are chained to the guardrail of my bed. I could easily break out of this,

but I decide against it and try to get into a sitting position with my arms restrained. My Wings don't make this any easier but I make it work. I then can see WHO is asleep in a chair at the end of my bed. Her arms are crossed and her slumped to the side. Her entire body screams that it is full of stress and I feel a bit sorry. I could have ended all of this earlier and I should have. But I believed. WHO and the others always spoke about giving people a second chance so I wanted to tr that too, but in the end it was in vain. I should have predicted that, in the end it is still just a program, a scarred program confused and unable to learn. A defect.

And then the door opens and I watch as the nurse comes in, eyes on her board in her hand not noticing that I am awake. But after a few seconds she looks up and almost lets her board fall, but she catches it and her breath too. She doesn't make a move or noise and I can sense the fear, so I decide to make the first move.

UN:" Could you get NASA for me?" She squeaks when I started to speak but catches herself and after another second of processing what I said she nods and basically runs out. She closes the door a bit aggressively, making WHO jump out of her seat and look at the door annoyed immediately after. But as her head slowly turns towards me, her annoyed eyes turn into shock, before they start to water and she jumps up and opens her arms for a hug. I can clearly tell how happy she is that I am awake and yet she stops herself from coming any closer, hesitation crawling into her body. Her body stiffens a bit and she asks nervously:" UN? ...." She wants to say more but the words seem to be stuck in her throat, so I help. I smile and answer:" Yeah, I am back." Now the tears start to fall full on down and she basically jumps at me. I need to watch out that she doesn't hurt herself on the cuffs and I move myself a bit more back, so she can move more freely.

WHO:" I am so happy, that you are back. I got so scarred. I was afraid of loosing you." She smears her snot in my suit, but I will forgive her this time. I give her a few more minutes, before I remind her that she needs to get NASA and her face distorts a bit, but she does leave the room to probably get him. She didn't seem happy when I mentioned NASA, something must have happened. I know NASA pretty good, so I can guess that he probably made a few

decisions she didn't like.

UN:" hahah. Yeah sounds about right." He never was good at making decisions once it involved someone he cares about. He always ties to look at it without his personal feelings getting in his way, but in the end he distances himself too much because he is afraid of making it personal. I told him so too, but he never has learned from it. I don't blame him though, for me, it wasn't easy too. Especially at the beginning.

Now that I think about it, how long ago was that? How old am I again? A lot of time has passed since the big war with the humans, hasn't it.

China POV:

I knew from the beginning that something was fishy, but this blew the bottom from what I imagined. I didn't see the whole fight, but enough to make a picture I don't like. I am tapping my foot on the pavement waiting for NASA to appear and tell the fucking story himself. I hope he can shed light on it in a way that explains UN's superpowers or whatever.

And there I see him walk towards me. With his black suit and emotionless face. But I know better know because I saw how scarred he was when fighting UN, to be fair everyone would be scarred, even me because UN is powerful in more than just his political influence. Well..... let's see if that will stay this way for long.

China:" NASA, your late."

NASA:" I am sorry, the walk from the Hospital was longer than anticipated." I look closer at NASA and notice that he is still skittish probably means that UN still hasn't woken up.

China:" So, while I think I got the picture, I still want to hear it. Who is UN really?" I on purpose don't use what, because I pray with all my soul right now, that UN is not a lie.

NASA:" It really is complicated but I try to make it short.

UN.....well...." He should have searched for the words on the way here, dammit. I growl a bit, which point NASA's full attention at me and not at the pavement in front of him and he gives himself a big breath before he start again" He is a Countryhuman, but not in the way you know it. He is equipped with weapons to defend us and himself. More or less just himself." The last sentence was whispered but still heard. Also this is extremely vague and I don't like that.

China:" If you are not going to tell me for real what is going on, then don't come at all." I turn around having already enough of this bullshit, and hoping to get a last reaction out of him to finally tell me without all the going around in terms and metaphors.

NASA:" Wait. Fuck.... I will tell you, but it is just so complicated and I am worried...." I turn around for hopefully the last time and say angrily:" WHAT? What are you worried about, if it is something I don't like than that is not your problem, I will make my own picture depending on what you say and have my own reaction on it. So spit it out because I have seen already enough to make my own little picture and I don't like what I see." Especially when it comes to the question of why.

NASA:" Fine. Short and painless. He is a machine build from humans to integrate into Countryhumans society. BUT, that was decades ago and right after the war UN has lost all contact to the humans and has been living without their influence. He is not a danger to anyone and is really there to help. As his position, as the headmaster of the UN he is extremely important and needed."

China:" Stop. I don't need anymore of this." His voice almost turned pleading at the end, I couldn't take it anymore. And mostly I am devastated. It was true it weren't just modified machinery parts but his whole fucking body. He was never one of use, not for a single fucking second. I clench my fist, I am angry. I ...no, we all were lied to, for so long.

NASA:" I understand that this is a lot to take in, but...."

China:" Enough. I have my own opinion on the matter already, stop trying to sugar coat it." NASA's expression turned into worry.

NASA:" China, I beg of you don't tell the others. The outbreak would be..."

China:" WHAT?! So I should just keep it quiet longer? Lie to them too, like you both lied to all of us the entirety of our lives. Do we truly even know UN? Is everything just a calculated answer from the program the humans made to make us like him? Is anything UN ever said truly meant? How can I.... how can we ever know that?" I feel my voice rise and try to reel myself back in. I should not be angry right now, I need to keep it for later when I tell the others.

NASA:" CHINA, please. It is not like you think, UN doesn't just act on program alone, I noticed that long ago, its's more...."

China:" SHUT UP. It is all just excuses. How good do you really know him? Wait.... have you helped build him? how do you know all of this? Since WHEN. do you. know?" I come a step closer to poking NASA into his chest with full resentment. The answer does not really matter anymore. Because either way he made the decision to keep it to himself and lie. Lie. and LIE AGAIN. Who knows what his real purpose is. He is a literal war machine, we all saw him fight, he was probably send in that moment to gather our trust. Someone who could kill us just stands there in the middle of our circle and we don't even suspect a thing because we all thought he IS ONE OF US.

NASA:" I..... I always knew."

China:" FUCK." I can't keep my face straight anymore and turn away, leaving with stomping feet. I hear NASA scream for me to come back and ask where I am going, but I don't answer. I first need to go home and collect all the photos I made through the scope from the fight. Without evidence, the others will just look at me weird.

NASA POV:

Should I run after him? I don't know what to do. I expected him to have some reaction but this is bad. I wasn't sure if he would be cool with it or not. With his reaction in the forest I expected him to accept it somewhat, but it seems he was just waiting to get

conformation before he manifests his real opinion. Shit. I take a step forward-thinking about it, but what should I do when I get to him? I couldn't stop him the first time and then the decision is taken from me.

WHO:" NASA, there you are. I was searching for you for twenty minutes, dammit." My head spins around and I see her walking closer and ask:" Shouldn't you be with UN? IS HE ALONE?" I start to panic for an entirely different reason now.

WHO:" He woke up, he will be fine." AND NOW A THIRD REASON TO PANIC CAME. I grabbed WHO and asked with a whisper voice in hopes of keeping my voice quiet:" You let him alone, AFTER he woke up?" He is going to kill the first nurse to get into the room. I need to get back, NOW. I start running but get grabbed by WHO. My head swirls around and she says calmly:" He is fine."

NASA:" Yeah he is, but not the people around him."

WHO:" You really trust him a lot." I was confused why she is keeping me here, she knows how dangerous he can be, but my panic keeps me from formulating any actual questions, right now.

WHO:"I mean he has come to his senses. He recognized me and remembers everything, he is calm and collected. He is completely fine again."v Impossible.

NASA:" Impossible." More did my brain not manage to formulate. It is just plainly impossible. The data recovery was a slow process and we barely made any progress until now, how could everything just recover itself.

WHO:" But it is. See for yourself, BUT without running." And then she starts walking, not letting go of my hand and we walk both back to the hospital. My urge to run is suppressed by the calming aura of WHO and her hands squeezing mine to death, basically threatening me to not even try to go against her.

Wordcount: 2163

Sorry, this took longer than expected, but because I am

shortening the book a bit, I needed to decide what I want to keep and so It took a while. My original goal to finish it before Christmas seems hard to reach now, But I still try to finish this book this year. Either next Chapter is the last or in max. two chapters. I hope you liked the chapter, till next time.

24. The Origin.

UN POV:

Everything is black and then a blinding light. I didn't blink, didn't need to. The color around me seems to morph a bit before I can see a clear picture. I am in a lab and before me stand three men, two in lab coats and one in a suit. The on in a Suit didn't seem pleased.

They were clearly arguing but I couldn't hear a word. I didn't need to. I remember this, no I already saw this is the right wording. I look up ahead, taking a few steps and see myself connected to a bunch of wires and a full metal mask over the entirety of my head. They hadn't decided on the flag yet, this was half a year before I was finished and dispatched. I wasn't turned on at the time, so I never heard or witnessed it myself, but the after connecting to the world server for the first time this was one of the first things I saw, as if it wanted to tell me something. The World Server, is the earth itself, it knows everything and sees everything and so did I. But why am I here? Why am I seeing this?

And then suddenly did the noise start to come back, I could hear the man behind me start talking and I automatically listened in.

Suit guy:" We have already started the plan. So why aren't you finished? You said it would only take 10 years, 10 years are over."

1 Lab guy:" We said roughly, ten years. We are almost finished. If you had told us that this thing suddenly needs to have a load of weapons beforehand, we would probably have finished. You never told us your plan involved WAR."

Suit guy:" Because it was none of your business."

2 lab guy:" Was there really no better way? If we had just sent him to the others Countryhumans in a normal manner they would have accepted him at one point too. I mean, he is supposed to look like them."

Suit guy:" Yeah and how long was that supposed to take? 20 years? We need results immediately. And what better way to make someone trust someone, as if making him save them."

2 lab guy:" But starting a war against them, is crazy. They are way stronger and what happens if truly one of them dies? We don't know what happens then."

Suit guy:" They won't just die. They are sturdy and anyway we won't really shoot them, we just let it look like it. The final actual threat to them will be unleashed right before this guy here will appear to save them. WITH the weapons I just told you, so be faster. The longer you take, the more people will die out there." He point at my still standing body, smirking. He was one of the main culprits in making me and wanting to make a lot of profit. I remember that his main goal was to sell the Info I would collect for a lot of money.

I turn back to my old self, having the images change. My old body just vanishes, just leaving the cables hanging. Sparking sometimes too. I know exactly when this happened too. I turn around and see in that exact moment as NASA shoots the suit guy in the face, not giving him a chance to defend himself. NASA attacked the base and completely destroyed everything involving me and my creators after the war ended. He never knew they staged the whole war for me. After he found out he killed them all and made sure the other Countryhumans would never find a trace of anything of my past.

NASA walks away not even glancing back, as the door shuts behind him and there are no footsteps, you can clearly hear the beeping and only three seconds later a big explosion. I am teleported to the outside of the building, watching as the entire complex explodes into million of pieces. One after another wall crashes down and the fire engulfs everything. I then see NASA fly out of the fire and stop over the complex his face still full of anger.

Yeah, he was angry because... no, for me. He destroyed them because I couldn't. He wanted to protect me and did so again and again.

Is this why I am seeing this again? To remember that NASA is on my side?

Earth, you didn't need to. I am well aware of that, he makes a few poor choices here and there, but always will keeping me in mind. Even though some are terrible ones.

And then Everything goes black again. I am not sure I really understood the reason she showed me this, but I don't think long on it, as I see myself back in the hospital bed and notice someone standing before me. I lift my head a bit and see NASA standing there looking a bit worried. I was probably out of it for a bit long.

UN:" Hey, buddy. You're trying to find a soul?" He blinks at me before he seems to get the joke. But there was no laugh, just a smirk in recognition of it.

NASA:" UN? ... are you really fine? How.....?" I just smile and answer with the most sincerity I could muster:" Yeah, I remember and in control." NASA can't help himself and springs forwards, embracing me and I hug back.

NASA:" I missed you."

UN:" I know." I saw it. NASA managed to let go after a while and then I notice WHO also standing there just observing with a smile.

NASA:" I just don't quite understand? How? You were clearly.... I mean..... I....." I can't stop myself from laughing a bit at his confusion, or rather his word jumble. It is rare to see him like this, so I need to enjoy it.

UN:" It is really complicated, but I think it is time I actually tell you a little secret of mine, that not even you know of."

NASA:" A secret, I don't know? Is it connected to you remembering?" I nod and NASA's breathing slows, him concentrating fully on me, as if I was about to explain the secrets of life itself. But that is just how NASA is, he would value the Information of his friends and their well-being over any Secret of the world, even Immortality.

AI UN Pov:

Where am I? I only see a yellow light all around me. I am floating,

not seeing a floor or sky. I feel like I would be in space without a direction to point or see. I only remember how UN pushed me out of his consciousness, which shouldn't have been possible to begin with. Yet I don't feel sad about it, I wouldn't be able to either way. I rather feel .... I don't know. I don't think I did anything wrong, but at the same time do I Understand UN. it confuses me.

???:" That is only natural." I turn around to see who spoke, but there is no one. I am still only surrounded by the blinding light, not letting me see anything beyond myself.

AI:" Who are you? Where am I?"

???:" You are at the Origin." She ignored my first question, and the second doesn't help. What is the Origin? The origin of human life, is the mother, but of earth it is gas, the air. Space? I then hear the mysterious voice chuckle, and I don't know why she does. I haven't even said anything, am I missing something?

???:" I mean the Place where all Countryhumans come from. This plane is not physical, it couldn't be described by human standards, but you will learn your own interpretation over time."

AI:" Do you want to say I am stuck her?"

???:" You are partially. You can eventually leave, if you learn." Learn what? Still so wage. Talking with her gives me no answer, just more questions. I turn another time around, hoping for a change around me, something that shows where the voice comes from and to identify who it is.

???:" If you want I can show you myself." And suddenly, I feel a present in my back, I turn around and there she is. Sitting on a throne out of wood. No, formed from a living tree. White robs and gigantic. I need to look up to see her fully, only her voice tells me she is a woman, otherwise I don't see any features that would distinguish her. I can't even see her head, the only thing there is a blinding light covering all. is that the origin of this light, no that is absurd.

???:" You really seem to be more comfortable when you can see me.

Fine. Then lets start learning."

AI:" You still haven't explained to me, what you mean with that. Why has UN send me here and How?"

???:" He send you here because he was sure I could help you learn, that's what I am gonna do." Learn? Always just that one word, but never an explanation to it.

???:" How does that make you feel?"

AI:" What?"

???:" Frustrated? Angry?"

AI:" It just makes it hard to understand what you want from me. Why should I feel something from this?"

???:" mhhhhh. I see. So it doesn't necessarily lack the want, but rather the understanding. You want to feel emotions but have not understood when to feel them." Emotions? What has that to do with anything?

???:" Everything." ?!

AI:" I had a feeling, but you can read my mind."

???:" Would be bad, if I couldn't. I created the mind and thought."

AI:" What? That doesn't make sense."

???:" Oh your right, it doesn't." What? She is contradicting herself, it seems I cant take her words for true all the time. She seems confused herself.

???:" HAHAHAHAHAH. You do will understand one time."

AI:" Than why don't you introduce yourself for once. You seem to know who I am."

???:" Oh yeah sure, but you would only be more confused If I explained who I am ..... how about this. I am that, what you have

learned to know as the world server."

AI:" You are the world server?"

???:" Yes." So she is the World server, not a server of one of the humans, but a subconsciousness, like me?

???:" Almost, I guess you could say that for now. But I must say I am surprised that even though you understood the basics of human emotions, you are not angry at UN for throwing you in here."

AI:" Should I be. I somehow feel like I am the one who messed up, and until I clear that up, it feels complicated to be angry right now."

???:" Then let me help clear it up because it seems UN was too lazy to explain a few things to you. So ask me anything, I know all."

AI:" Yeah that he was. ..... One thing that I always asked myself is... why were there two of us? Why did the researches build two AI's, for one body? It doesn't make sense to me."

???:" That one is easy to answer. They didn't." What? " Let me clarify. UN is not made by the scientists, but me."

AI:" You?"

???:" Like I said here is the Origin of all Countryhumans."

AI: That doesn't make sense, we aren't a real Countryhuman. We are an imitation with a made up body and past."

???:" hahahaha. And that is where you are wrong. You are a real Countryhuman. Only because you have not a body made of flesh and blood, it doesn't make you inferior to the others. Yo may not be created by me, but that didnt make you any less valuable."

AI:" By you, so you made him? But why? Why did you interfere with me?"

???:" That was never my plan. I didn't know you existed. I only noticed an idea of an Organization for peace start in the minds of the humans, so I created a soul according to it. Normally I also

make a body, a baby and it will grow with time, learn and adapt, but the Humans already made a body with a flag, so the soul felt automatically connected to it and went inside before I could stop it, and I don't regret it either, it is just how time goes. It was meant to be." Meant to be? ....

AI:" My life was ruined because of that."

???:" Are you angry?"

AI:" .... I don't know." But then I understand.... finally I understand the goddam difference between us two. He was never an Artificial Intelligence like me, he never needed to learn to understand humans, like I did, that is why he was always so good at everything. Because he was already one of them. I think..... "I am jealous."

NASA POV:

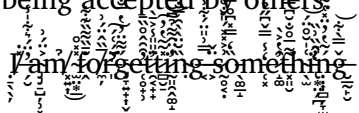
NASA:" WHAT?! Wait... what do you mean with.... you're? .....real? Now I am confused."

UN:" Hahahaha. I would be too. If I haven't gotten it explained to me at least three times, I would also still not understand how it happened." UN looks down on his hands adding:" My body still doesn't really feel like mine sometimes. I don't bleed if I cut myself and I see everything clear all times, I can't get drunk and I sometimes have a hard time to imitate pain to make others not suspicious of me, but I have accepted this body." He makes fists and looks back up, with a face completely unaffected, happy.

NASA:" So you were created the same way we all were, with a soul created by our mother, by earth. Why.... did you never tell me?" I feel a bit betrayed. I feel like that he would tell at least me something like this. This is quite important. It is.... it hurts my heart.

UN:" I didn't feel ready yet. I didnt want to keep it from you, but I also couldn't find my words at the time. And then I kind of forgot about it, I always felt like I am part of everyone, like I belong there. That's why I often forget that my body is different." I want to say more, but I keep myself together. It is his secret and his life, I am

not forced to know. I would have loved to because I am his friend, but he is not obligated to tell me. I swallow my sadness and instead keep the happy emotions that I have because he is healthy and in one piece and can even remember me again. And because of the new revelation, that he really has a soul. I love him either way, but it makes me really happy to know that he has a chance of also being accepted by others.



I am forgetting something

WHO:" but... you said someone explained it to you, who?" I jump a bit as I have completely forgotten she is in the room and I look at her, seeing a few tears roll down. I at first thought she was sad for some reason, but then I see the wrinkles of a smile. She cries from happiness.

UN:" Earths Manifestation. I have a direct connection to her, and she was so kind to help me in my journeys through life."

WHO/ NASA:" YOU CAN TALK WITH EARTH?!"

UN:" I can't believe it myself."

WHO:" That is amazing..." something am I forgetting. Suddenly I had this feeling that I am forgetting something. Where did it come from?

UN:" It really isn't that special, the talks are short and most time only riddles, that I need to learn to understand myself. She holds the contact quite short, probably to not interfere."

NASA:" Fuck, China. I forgot about him?!" I grab my head, contemplating on what to do with him. I ran right here after WHO told me UN is up, that I forgot about him.

UN:" China? What is with him?"

WHO:" Right I remember, him walking away right before I found you."

NASA:" China know, what UN is. And he is not happy with it." UN looks shocked at that and WHO rather confused asking me:" I

thought, you dont want to tell anyone?"

NASA:" I didn't, but he helped in the fight and saw everything, yet he seemed collected, I thought he wouldn't mind. But it seems that he didnt want to jump conclusions and after I explained it, he got real mad."

WHO:" Well, it isn't perfect, but he will accept it at some point. It's probably fine." WHO has a slight hopeful tone in her voice. Even though I already explained it to her once, that it cant end well, if they know.

NASA:" WHO, He plans to tell the others."

UN:" Why?" UN seemed quite calm and collected, even though his whole existence could be in danger. So I decide to calm down too.

NASA:" I am not quite sure, but it seemed he hated that we took the decision from the others, of if they accept him. I mean, you."

UN:" I see." UN then pulls the blanket to the side and gets out of bed, making me and WHO worry." Don't, you just woke up."

UN:" I am fine. And I have a plan." He stands before us with a confident smile and somehow that makes me have hope. Wasn't it always like this? It reminds me of our past and a warm feeling fills my heart.

Wordcount: 3000

So one more Chapter, since we still need to deal with China, and then we are finished. But sadly not this year, I barely managed to finish this Chapter with my last Motivation.

25. The Happy End

China Pov:

I am ready and furious. I called EU and made a meeting giving the excuse that it was Important info on UN. Which is true, we were all lied to. Every step I take is heard through the entire hallway and probably even further, but I am angry and I have no problem showing that. I slam open the doors to the already half full meeting room. Every eye is on me and tracking my every move and I hope they do. Once everyone has arrived, I want them to listen very closely what I will say.

I get up to the podium and slam down the papers I prepared. Some seem unpleased with me up there, but they will quickly change their mind on that. And then EU enters too. He looks concerned and comes up to me.

EU:" What is it? I haven't heard any news on UN recently, have you talked with NASA?" I nod seriously and that seems to make him even more nervous. Now that I think about it, I wonder if EU knows about it. NASA said he has never told anyone, but EU and especially WHO are so close to him. Could he really keep it from them? Doesn't matter, he can't stop me anymore anyway.

I noticed that almost all seats were full and the time on the clock hit the full hour. The rest are those who are always late, but I will not wait for them this time. I open my mouth to start, but then the doors are slammed open and my eyes widen. Why is he here? I see UN walk with his shoulders high and his eyes fixed on me to the podium. I grit my teeth but then smile.

China:" Perfect timing as always. Did your sensors tell you?" I guess NASA sent him here to stop me. But If I can make him angry and attack me, then I have perfect proof.

UN:" No, but NASA seemed quite concerned and forced me to come. I didn't want to interrupt you." He makes a waving motion with his

hand adding:" Go on." I don't know what he is planning, but he will lose. Especially since he doesn't have his memories anymore, he is not the old UN anymore, I can outwit him easily.

I can already hear the commotion starting as UN just stands there and EU is especially relieved that he seems fine. I won't delay this any further.

I cough into my hand and proceed:" As I wanted to say, this meeting is about UN as you all know, and it has do to with a discovery of mine. This is not a mere speculation, it was confirmed by NASA himself." All the people clearly show the confusion on their faces and EU whispers:" what is this all about?"

China:" UN, the person we all trusted the most who helped us in many situations is not a real Countryhuman. He is a robot." And the silence didn't hold a second longer. They burst out calling me a liar and a lunatic. Some even laughed thinking this was a joke, but I kept my serious face and only looked at UN, who neither smiled at the situation nor took control of it. He is waiting it out.

China:" You may take it as a joke or whatever, but it is true. He was built by humans and created as a weapon to face us. Don't you find it weird that he suddenly appeared in the middle of war and started to help us? He basically infiltrated us in our weakest moment and we immediately accepted him. You all saw him in the war, his fighting prowess. He was just born as he said and yet as a 'peace Organization' he could fight hundreds of humans and tanks and pull missiles out of the air. He is big and has 4 wings, he has his black eyes and sometimes his eyes even change color. WE ALL FOUND THAT WEIRD. BUT HE JUST KEPT LYING AND GIVING EXCUSES. WE ALL SUCKED THEM UP. .....he lied and lied. How can we trust someone like that. He is not even of our race."

EU:" CHINA?! He is still UN. He is a big organization, he saved us and still helps us now. How can you be so biased against someone you know for so long?"

China:" Exactly because I know him for so long.....do I feel cheated." And then people start to whisper amongst each other, they start to debate it. Perfect.

Germany:" Where is the proof?" Suddenly, I hear him scream over all the voices. His arms crossed and relaxed, piercing me with his gaze.

I lift the stack of papers up and say confidently:" It is all here. NASA told me himself in secret hoping I would not tell anyone, but with him confirming my worries, I looked into it myself and found more than enough evidence. The building he was built in, was raced to the ground. The way he was sent in by the humans themselves for the war to sugarcoat us. The Electronic waves that affected him, his memory loss that followed. He literally attacked NASA and WHO when everyone was searching for him because he lost control. I know because I was there and shot at him to protect both of them, and I am pretty sure America still saw it too even though he kept his distance." I shot a glare at him and he jumps slightly. I saw it very clearly he was with the group and then he suddenly wasn't, I found him standing behind a few trees watching as it was over. I guess he didn't say anything because he didn't fully understand what he saw, but I tell you now, so say something.

I expected an understanding gaze to appear, for him to stand up and speak, but i stead he turned his head and only said:" A lot happened in the forest, I was only coming back at the end, after I got help from other groups, I can't be seen as a witness in this." Oh..... I look back at UN. Still no smile but his eyes which were solely fixated on me, spoke like a book to me. Like he was reciting a story. He already has everything planned out, doesn't he?

But you won't win this.

Vietnam:" UN, why don't you say anything? He is clearly setting you up, and these accusations are quite severe." He sounds angry, either at me for saying these things or at UN for being so quiet.

EU:" How could you all even think for a moment that he is an enemy or something. He has saved us."

China:" Oh yeah a good Samaritan just swooping in and suddenly, he can only be a friend. How convenient." But I am also confused that UN has yet to say something. I know he is cunning, what are your plans UN? It makes me a bit nervous but I have more than

enough to prove, I can do this. I need to.

Russia:" UN, if you don't start to explain anything, I have reason to believe China." His tone was cold and his eyes seemed to pierce through the room, but his words made everyone go silent and expectantly look at UN waiting for his statement to all of this. So was I. What lie have you thought of.

UN:" You should because it is true, partially." No response, everyone was in silence and Russia had a blank face. He was sure it was a lie, as everyone, I mean how could it be true?

China:" HAHAHAHA SEE, I told you all the truth." I don't know why you gave up, but I'll take it.

UN:" Yes and I am thankful you finally said it. I hated the lying, I was sadly forced to."

Russia:" Hold up, what is the meaning of this? You mean to tell me, you are no Countryhuman? Bullshit, I mean..... "

America:" Yeah and now? What's the big deal about it?"

Finland:" WHAT THE DEAL IS? He is not a Countryhuman, that is outrageous. All those years... ahhhh." He throws both hand up and on his head, not knowing what to say.

Brazilian:" That everything was a lie...."

Canada:" ...I dont know.... He is still UN, right?"

France:" IS HE? We never really knew who he was, how do we know, that not everything was a lie?"

America:" Oh come on, if he really wanted to he could have said that it was a lie and we all would have believed him."

Russia:" Don't say it, as if that would make it better. We are an organization made of Countryhumans, and if he isn't one, he doesn't belong here."

America:" Don't act like we didn't always speculate that there is

something wrong, with UN."

Russia:" THAT HE WOULDN'T BE A PEACE ORGANIZATION. WE NEVER TALKED ABOUT HIM NOT BEING A CH ALL TOGETHER?!"

America:" Apples, potatoes."

France:" What?"

China:" He lied and that is a fact. Who is with me that he should leave and never come back." I hold my hand up done with this stupid argument. I know that almost everyone will be with me and all the arguing won't change that.

UN:" Before anyone answers that, let me tell you that I never chose to lie. At the beginning I had no free will and only did what was ordered by me. That one is true, I was made by humans, but almost instantly I gained free will because while my body is not real, my soul is. I don't belong to the humans, and I never will again. I have always acted in the interest of you all and I promise to still do that onward. I understand if you don't understand me right now and I will leave if you wish so, but I personally see myself as a Countryhuman, with emotions and joy. The joy to have met you all and I would love to still be friends with everyone here."

China:" What a load of bull crap. You think a few sweet words are going to make everything better?"

Germany:" China, it is enough. You have no right to make the decision for everyone else."

Canada:" I also think everyone is overreacting a bit. It is still the same person."

America:" That is my bro."

Brazilian:" Really? Because to my knowledge does UN not lie." He sounded angry and folded his arms in front of him.

France:" UN.... tell me, why did you never tell us? What was the reason the humans even send you to us? I am.... a bit confused."

UN:" I understand that. And again I am sorry, the humans made me to merge into your group and get information, but again they no longer hold control over me, so they gain nothing. And I never told anyone afterwards because..... i was scared. I was scared how you would all react. I still am, but.... the longer I stay in secret the worse it will get, if I say today I am real, and then you would find out, you would be even more mad. There is no better chance than now, to finally come clean." Many think it over, the atmosphere is pure confusion, and I can't believe they believe his words and think it over. I smack the stack of papers I had in front of me over and scream:" BULLSHIT. YOU ARE A WAR MACHINE. YOU WERE CREATED TO KILL. YOU WERE MEANT TO KILL US?!"

And then NASA opens the doors and says:" Enough. You have no idea of anything. You barely get the basics, from what I told you. DOn't just start speculations."

China:" Then why does he have all these fancy weapons on him? He was meant to integrate himself into our group with all these weapons. He was made to backstab us, when we are our weakest."

Germany:" We were our weakest in the war. And yet he saved us, not hurt us."

Brazilian:" Yes, that way we would immediately trust him. Like fools."

China:" Exactly."

UN:" I just want to tell you, I don't have them anymore. But yes, it was the plans of the Humans to use it to their advantage, not mine."

China:" Excuses."

UN:" You are right, they are, but it is still the truth."

France:" What about the humans? They are somewhere out there and could make more, right?" She starts to panic a bit, and she is right, I have not even thought about that.

China:" We need to find them after this, and exterminate them."

Canada:" How brutal."

NASA:" Don't worry, they are all already dead. Together with everything they worked on. I made sure of that."

China:" As if you were to be trusted."

NASA:" I told you the truth didn't I?" I hate this guy.

UN:" It is your decision, but I see myself as a Countryhuman. I breathe and think, only because my body is different. I do not think I have wronged anyone."

China: Don't play the guilt trip on me." I have enough of this, I pull my gun out to prove everyone how dangerous UN is.

UN:" What are you going?"

NASA:" UN?!" Come on show everyone.

France:" CHINA WTF."

America:" That is going too far."

China:" I will show you all, what I saw. IN the forest. He is not one of us, he has no control over himself. Like in the war, all these weapons he could turn them on us at any time." Come on, show them all. I concentrate on the eyes, ready to dodge if he should shoot at me. But I am willing to take the risk.

Germany:" You don't know what you are doing, stop." His voice is full of fear, but then UN smiles and says to Germany:" Everything is alright. I already said it, didn't I? I don't have my weapons anymore, I destroyed everything."

China:" Impossible. I saw it with my own eyes. You maybe have no control, but you are still a machine, you can't go against your code. Show me those eyes. Show me how you attacked NASA in the forest, HOW YOU DESTROYED HIS ARM?!"

UN:" First: That was an accident. Second, I have my own free will. I can act on my own." UN suddenly grabs my arm and presses with

his enormous strength my fingers, rendering me unable to press the trigger. Dammit.

UN:" If you feel like shooting at me, then that is on you but I will try to stop you because that is who I am. I am the United Nations, made to keep the peace of everyone. And there is a strict policy of no weapons in this building."

China:" Don't play the innocent. You always carried them around with you. What is your excuse."

UN:" That they were under lock and key. And don't strive from the Topic, I am a living being, and don't like being shot at. I was created by our mother and while my body seems to detest you, I will not tolerate you saying I would not be real. I AM REAL." And then I hear a crack. The crack of one of my fingers breaking. I stop myself from even grunting, but the pain shots through my arm, dammit.

NASA:" UN...."

America:" See I told them. He is still the same. Underestimating his own strength. At least I now know where that strength is coming from." America suddenly pats UN on his shoulder and he lets me go. I let the gun fall unable to hold it any longer.

France:" ...mhhh. I think I need time to think it over. Alone."

Brazilian:" I don't like this, but I guess I also don't really have a reason against it. But ....I don't think I can see you any longer as a friend. UN."

UN:" I understand that. No one knew. I lied. I am happy enough, when you give it a thought."

China:" Are you all kidding me. He is a monster."

Canada:" The only monster I see, is you."

China:" What?"

Canada:" You just pointed a gun at him. You are yelling, trying to

rile everyone up. You are the only one who really feels that way. We are all confused and a bit angry, I think. But we are ready to talk over it and try to understand. Even America, who is very proud of being a Countryhuman, and hates being talked to from humans."

America:" Their noisy."

Canada:" I know."

China:" Bullshit. A load of bullshit. Why don't you understand, he is dangerous?"

Germany:" We do."

China:" Oh really?" I sneer, unable to understand them all. Didn't it get to their brains yet? Their must be a way. Something.

Germany:" Yes. He shot at me, if NASA didn't throw himself in front of me, I would be dead."

France:" What?"

Brazilian:" ...mhhhh."

Germany:" I know what you all think, but even I trust him. He was not in his right mind at the time and I understand because of that how dangerous he can be, but I trust him. He lived with us so long now and .....he is still the same. Even after I learned the truth, he is still just UN."

Brazilian:" Why did he shoot at you?"

Germany:" I don't know."

China:" So without reason, great. Makes everyone more comfortable." I almost laugh, but UN talks before I can.

UN:" At the time I lost my memories, as you know. I started to slowly remember things, but not from now to then, but then to now. I suddenly remembered the second world war and only that. I remembered how Germany was at the time and when he.... you walked in, the system made its own accusations and acted on them.

But dont worry the system is no more. I pitied on it and let it stay with me, but never again. I promise everyone this will never happen again."

Germany:" ...I see." He suddenly feels a bit relieved, finally knowing the answer.

China:" no....no..." I suddenly feel as I am being grabbed from behind. I get thrown over someone's shoulder and can't even react, as they walk towards the door. I notice it is Russia. What the...

Russia:" I will take him with me. I also need to think, but that goes for everyone here, I think. How about we all meet tomorrow again, until then, I will handle the little problem here." And then he just keeps walking, my words are stuck in my mouth, feeling betrayed.

China:" You can't do that. You all can't just accept it like that." i feel my throat burn from all the screaming.

Russia:" I never said I would accept it. Idiot. I still need to make a decision."
That is the same. This is so unfair, why can't anyone see it?

UN Pov:

I watch as they both leave and then France and many more stand up and leave without another word, having a thoughtful expression on them. Some stand there for a moment looking at me, before they also leave. Even Germany at one point goes past me while saying:" The explanation really helped." And kept walking. He could have asked, and I would have told him earlier.

NASA:" To be honest if you had told me what you were about to do, I would have stopped you no matter what I needed to do, to do so." I turn to NASA who stand right next to me, also looking at Germany leave.

UN:" I know. That's why I didn't tell you."

EU:" It was a scare to be honest." EU walks up to us from behind. Now the only one left with us.

NASA:" yeah..... were lucky that they are so understanding. What would you have done if they weren't? Did you ever think about that possibility?"

UN:" Of course." NASA furrowed his brows and crossed his arms, it was probably supposed to look like an angry mom, but instead I saw worry." If that had happened, I would have taken your offer that you made decades ago. I would have lived secretly under your roof and probably stayed there till I died."

EU:" But that would mean never leaving there, it is still so close to the city they would notice."

UN:" I know."

NASA:" You can't be serious, while I am kind of happy you thought of that and I would, of course, open my doors, that wouldn't have been a long-term solution. Bake in the day when barely anyone knew you maybe, but now? No chance. I have visitors like America and others."

WHO:" ....you weren't trying to flee right? I don't like the thought of you being forever alone somewhere out there. Your my brother."

UN:" I know, I would never leave. I am sure NASA would have found a way, to convince them somehow and even then, they wouldn't find me."

EU:" Still, only NASA around..... he is also busy, wouldn't that mean you would be mostly alone?"

UN:" No, I am sure WHO would come visit too. I know she wouldn't leave me be."

WHO:" Damn right you are."

EU:" And where am I in this imaginary lonely, catastrophic world?" He moved the weight of his head to the side, smiling curious.

UN:" Where you would be? At work?" UN gave a taunting move of the eyebrow.

EU:" What? Of course, I would come too, how mean. I am family too, aren't I?"

UN:" Family? I always thought of you more of a nuisance that I have to deal with at work~."

EU:" Ouch, that hurt." And then everyone except EU started laughing.

UN:" No, I am sure you would be there too, throwing all your work away to come to me, once shit would go down. You would come even if the world turned upside down."

EU:" mmhhhhhh. I am not so sure there. If the world really turned upside down, I would probably start to run for my countries first. They are off a higher priority then."

UN:" Ouch, get it."

EU:" No really. I mean if something like a zombie Apocalypse were to happen, I am sure you can defend even a fucking dragon, but these guys, my little gremlins, they wouldn't even be able to kill a mosquito if they worked all together."

WHO:" Oh they work together?" She says sarcastic.

NASA:" You are giving them a lot of credit, right there." And he adds fuel, as he smiles a big smile.

EU:" Right, forgot about that. You're right, I should just run off with you bunch, they couldn't be saved, no matter what I would do." EU sighs at that.

UN just thought about it all. How they are able to laugh together happily, without being hunted or judged. He was really happy that he no longer needed to lie to anyone and now they can joke about the past.

WHO:" I wanted to ask you something UN. Was there really no way, where we could have gone against China? Because I feel like he was missing a lot of hand proof evidence. You shouldn't have taken the risk."

UN:" Oh I could have obliterated him. He had no chance of winning, if I really wanted. I already made up arguments to go against every possible question he could have asked."

NASA:" ...then why didn't you? Again, there was a very high chance of everything going sideways." NASA and the others bore eyes through me, feeling confused and conflicted. Understandable, but....

UN:" Because I didn't want to lie to them anymore. I had enough of the charade. I wanted to be honest, and if they didn't accept me, then it was never meant to be and it was time to leave. I didn't want a friendship or trust that is build upon deceit. I was ready to leave at any moment if necessary."

WHO:" ....UN....." Her worried face made space for a little smile and then she adds:" Even if it happened, I would have gone with you, wherever you go."

UN:" I know, that is why I was ready to take the risk. Because I know that you.... that you all would always be on my side." EU couldn't hold himself back anymore and hugged me. I was surprised for a moment but then hugged back and NASA punched lightly my shoulder, either for the sake of it, or because he was afraid of hurting his own hand on my body. Thinking about the second option makes me giggle on the inside.

NASA:" Just promise me never do something again without explaining your plan beforehand. I almost had a heart attack when you suddenly agreed with China's statement."

-------- 5 Years later -------

UN:" And with that we conclude the meeting. Please remember to put your phones out of the silence mode and check the mails you could have received. And then we will see each other next week."

With that the meeting ends without any big incidents and interruptions. I put my papers back into the bag and get ready to leave. I make sure everyone has left the room before I also go and lock the room. I am not the biggest fan of needing to lock it, but sadly a window broke last week, and we don't want the entire

building cooling down again, only because the janitor forgot to close the door.

I walk down the hall wanting to get to my car, as a flashing light appears before me. I of course don't close my eyes and just adjust them and can see like a portal appear. I recognize that portal immediately and know there is nothing to fear. But it doesn't change my surprise of what it leaves behind. The light disappears and I see a tiny Countryhuman stand where it was. He has the same skin color as me but instead of my Logo he has the Letters U.N.E.S.C.O on his face.

Well if that isn't another Underorganization of mine than I don 't know what is.

But that wasn't what surprised me about this, normally they don't appear like this. And especially not through the connection to the core of the world. And as I look into the eyes of the tiny one, I immediately recognize them.

UN:" Oh well, didn't expect to see you again.... at least not so soon."

UNESCO:" It is a wonder you can even recognize me at all." Yep, definitely his ...or better, his own voice. It seems Earth took pity on the little one and made him an Organization himself. I hope Earth made sure he is no asshole any longer though.

I lean my body weight a bit to the side and ask:" And? What happened for you to be here?"

UNESCO:" ....Let me be honest. I have no idea. After you send me to ....that place, I found that lady and she kept explaining everything to me and .... educated me. I suddenly was sent here." Well that would mean she explained being alive to him. Probably ten times better than I ever could, still I am surprised she decided to do this. Doesn't matter, who am I to judge her intentions and actions.

UN:" Well old self of mine, let me show you around and explain your job from now one. Sadly you came a bit late, so you will meet everyone in a week."

UNESCO:" Everyone? At once? Won't there be a risk of them recognizing me or something?"

UN:" What, feeling bad now?" UNESCO only looked away and I was surprised to see that he is." Don't worry, they won't recognize you. I will them who you are though." And then I start going again, I still have to make a phone call because of the damaged window. The Humans are a bit slow in winter times, so I will pressure them a bit.

THE HAPPY ENDING

Wordcount: 4635

One of two endings. Both are good ones, but one is rather sad from an outside perspective. I hope you read both and then just remember the one you like more.

I would love to know which one you like more.

25. The sad Ending

UN Pov:

I can not wait any longer. The more I let China talk the worse it could be for me.

But I am still not sure what Decision is the best to take, I could pull it maybe even off that I tell the truth....

NASA:" UN? Please I hope you know what you are doing, if we should help tell me." I look down at him as we stand before the entrance doors to the meeting room.

UN:" No, I can handle this." And so it begins. I open the doors, fully swinging them open, I made my decision fully prepared for the blowback, as I want to start going down the stairs do I hear NATO behind me:" Please be careful, they can be cruel." And I am struck by lightning, I almost miss my step and the stair, but I am fully back in only a split second.

Change of plan.

China:" Perfect timing as always. Did your sensors tell you?" I fix my gaze on him and notice his slight smirk. I will end this.

UN:" No, but I heard the rumors of what your trying to do her and am not pleased." China let his emotions show and so I can play the same game. I show open my dissatisfaction and the people around me start to talk. I stop in front of the podium and warn China:" Last warning, go and be silent now, or reap the consequences."

China:" Sweet talk. Everyone listen to me, this person before us is not the real UN, he is just a robot, an imitate. He is fake. Nothing but an A.I controlling a metallic body." He seems aggravated and determined, but so am I.

Germany:" What a load of bull crap, what kind of evidence do you

have for that?"

Russia:" I hope you know of the consequences of this joke."

China:" They are no speculations. I have evidence. And NASA himself told me to, I asked before I came, to be completely sure."

France:" Really? I can't really believe that." And the muttering continues. Some laughing, some even being angry at the words. But some rather few, think about his words, starting doubts. I will stop this as fast as possible.

China:" You think of it as a Joke, but it is not. He was built by humans and created as a weapon to face us. Don't you find it weird that he suddenly appeared in the middle of war and started to help us? He ...." Enough.

UN:" I am sorry, but instead of just sowing doubt into everyone, how about you start with the evidence? Video footage, paper documents? Eyewitnesses, I hope that all this is not built upon sheer luck and possibilities. Because my appearance at the time was nothing more than that, and a few rumors I heard in the city I was born in."

UK:" Rumors?" It was rather silently spoken, but it should be a perfect beginning.

UN:" Yeah we never had the time after the war to fully speak about me, did we?"

China:" ENOUGH OF THESE LIES?! A peace organization appearing at war, fully able to kill thousands of humans in mere minutes. I mean his black eyes and four wings and EVERYTHING ELSE. No one her has that, he is different, we all knew that and noticed, now I just know what it means. HE IS NOT OF OUR RACE?!" He is losing his temper fast, good for me.

EU:" CHINA?! He is still UN. He is a big organization, he saved us and still helps us now. How can you be so biased against someone you know for so long?"

China:" Exactly because I know him for so long, do I feel cheated."

Again the whispering. But people clearly still don't take China seriously. How could they, except talking he showed no proof.

Germany:" Where is the proof?" His voice is calm and he is heard by all, everything turns silent and they all await China's response.

China then proceeds to lift the papers in front of him:" It is all here. It is all here. NASA told me himself in secret hoping I would not tell anyone, but with him confirming my worries, I looked into it myself and found more than enough evidence. The building he was built in, was raced to the ground. The way he was sent in by humans themselves for the war to sugarcoat us. The Electronic waves that affected him...." I would love to interrupt him, but If I do than it would show the others that I worry about his words and give them more value. So I listen and get ready to end this. And then he brought America up. This surprises me a bit, but luckily I spoke with him beforehand a bit. America learned about everything already from WHO, and he seemed rather unbothered by the truth. Probably also because of the experiments he once did himself and got punished by me and others. But let's not talk about the past.

So I was expecting America's response already. And I expected to confused gaze from China afterwards. He looks at me, no stares, like I killed someone.

Vietnam adds proudly:" Deserves you right, China. Trying to set UN up like this, you probably didn't expect him to be here so fast, huh?"

Chile:" Right, he was in the hospital. Was that your plan, China? How despicable."

China:" Talk as much as you want. Look through the papers, in there are the location of the lab. It was destroyed but the remnants which now belong to NASA, oh what a coincidence. If you ask nicely, maybe he won't immediately say no. Also his Blood. The color when I shot at him was not golden.....it was blue. UN, you would be so kind as to let us do a little poke test, right?" Even if I said yes, I am prepared for something like this. But I won't even let it get this far.

I take one of the papers and say calmly:" One of the old Lab's of

America. That is your evidence? This is a lab of America's old little hiccup, of course it was destroyed." I can see America squirm a bit, but he won't say anything against that, as it wouldn't bring him anything good to now deny it, even though it truly is not his lab.

UN:" So go if you want to take a look, but my blood you aren't getting today. NASA can prepare something tough, if you really want to."

China:" Oh NASA? He is in it with you, I won't trust what he gives me. Especially since he has just as many secrets as you, he can't be trusted either."

UN:" SHUT UP. I HAVE ENOUGH OF YOU?! I accepted your complaints and let you speak, but there is a limit to everything. I was sick and was hurt, and yet you choose this moment for all this, you should be in the know that if it weren't for NASA who told me about this meeting and WHO helping me here, I wouldn't even be here. If you truly believed to be right, then why choose this despicable way? You clearly are trying to dethrone me. Well I wouldn't even truly care, if you wouldn't overdo it so much, what a load of bull crap." I play angry and let my voice echo in the room multiple times.

Immediately, the room is silent and the whispering stopped. China seemed in shock and he is clearly too unprepared. He only has rough evidence on paper, nothing to clearly show and he seems to strongly controlled by anger right now. Mistakes over mistakes, he could only win, if I let him.

China:" Hospital, my ass. If you truly were so sick, how come you don't look like it? Huh, no wounds, nothing. I shot at you and yet no wound."

Brazil:" YOU WHAT?!" Multiple people seemed to take this situation even more serious now. Some are worried about the whole situation, others wonder if they should be worried about my health. I can hear their whispers, even if they are on the other side of the room, so probably not really whispers.

China:" I want to see the records of this so-called hospital, I bet

NASA was the one who looked you over again."

UN:" NASA is the person in charge of me because he knows me the longest, he is no doctor and not my psychiatrist. So no, he was not the one looking me over. It rather seems like you are trying to just spread rumors, there is no hard proof."

Germany:" Yeah, I am with UN. This is a clear betrayal against the United Nations. Probably even a try to start a war. He should be punished severely."

Mexico:" Throw him out of the United Nations, he doesn't seem to appreciate it."

Canada:" Mexico, please if we did that, what about the humans?"

Ukraine:" I also think that would be unfair against his people, this is China alone. HE should be punished."

The voices get louder as more think about a way to punish him, and only a few wonder why even do this. I need to mitigate now, and decide. This way all of this will end fast.

China:" Sick, my ass. A normal person isn't affected by an EMP, or gets sick from it, only electronics are affected. That is also evidence. Then do you remember how Switzerland didn't notice a pulse, that is another thing." I didn't even need to stop him myself, as others intervened and stopped him.

Finland:" Enough is enough. We already concluded what happened. China if you don't immediately stop you will regret it." If I remember correctly, Germany told me how they all now think I have a weak heart and a machine to help with it, because of my body size and the EMP broke it. How convenient.

Switzerland:" I have enough." He stands up and adds:" Let us throw him out, in hope the fresh air, gets to him." I lit my arm and the commotion goes silent. I have their concentration back on me and I look at China wondering if he noticed that he has lost. I analyze his entire body and notice the tension, the stress, but his face only shows anger. Maybe frustration, but he is still determined. But he

should have noticed by now, that right now no one will listen to him anymore.

UN:" I think the same. Russia, America, you both are the strongest get him back home, and then tomorrow when he has calmed down, I will have a private talk with him."

America:" Roger."

Russia:" Fine by me." Both of them walk towards the stand to China, I notice the desperation in his eyes but he has lost.

What is bugging me? Something is wrong.

But I am to slow to understand where the look of determination comes from. As China suddenly pulls out a gun and aims it at me.

China:" I will show everyone your blue blood. Then they will believe me."

Warning, A Danger. I can see in slow-motion as the Trigger is pulled, America and Russia try to stop him, but are not close enough to shield me. But they don't need to, I pull my wings forward and make an unpenetrable shield, letting my feathers harden.

The only thing you hear is the metallic sound of the bullet getting deflected, but China doesn't stop with one. He keeps shooting till the magazine is almost empty and America tackles him to the ground. Russia takes the weapon and keeps it close. I didn't anticipate for China to go overboard. I open my wings slowly and can only look down on him.

I am lucky to have deleted the Security system, or it would have definitely activated, but this also proves what I have believed before. I don't need it, never have.

China:" HOW?! Why aren't your eyes red?" So that was his goal? What would that even proof?

I sigh loudly unable to understand these foolish thought and also having no reason too, I wave my arm:" Take him away, he is clearly

not in his right mind." America and Russia didn't wait a second longer as they got him up, making sure he is unable to use his arms. But China of course tried to not be dragged away, and I can see as the patience on Russia runs out and he grabs one of China's arms and breaks it, making China scream in pain. I could have stopped it, but as long as they don't try to kill him, does it purpose as punishment.

EU:" Are you okay?" And of course does my friend immediately stand right beside me, mustering me for injuries.

UN:" I am fine. My feathers are like Steel, a bullet can't hurt me." He sighs from relieve and has a smile on his face.

As the doors open behind me and China leaves the room, I notice NASA and WHO enter instead. Both looking confused and wondering for the outcome, but I also see that NASA seems to be happy. He must have grasped the situation roughly. I will give them a report later, or else they will ask all the time anyway.

--------- 8 years later ----------

UN:" And with that we conclude the meeting. Please remember that I need the answers till tomorrow from everyone." With that the meeting ends without any interruptions, only a mail reminder that I still am the only person missing my medical check up.

I give another excuse of me being to busy and that NASA will send the results as always.

I need to leave the room as the last person and lock the door, only needing to do so because some couldn't control themselves again and broke one of the windows. It was fixed temporarily, but the wind still goes through. At least the damage was only small. This reminds me that everyone has calmed down a lot in comparison to before the incident. Why do I think about this now? It is already 8 years since then.

I can only shake my head at this, what a waste of time.

I walk down the hallway just wanting to get home, before I get an

imagination of a headache thinking about the past. But I stop in my tracks as a flashing light appears right in front of me. I don't flinch or react, and just watch as a figure appears in the light. And just shortly after the light disappears and a little blue Countryhuman stands where it was. It doesn't take me long before I recognize the hue of blue as one of mine.

U.N.E.S.C.O

I see, the humans made another one. How bothersome. But what was with the flashy birth of this one? I look him up and down and he looks up at me. Something tells me I know this one, how weird.

UN:" Correct me if I am wrong, but wasn't this a portal to the earths core?" He bows slightly and answers with a clear voice:" Yes." And if I don't recognize that voice.

UN:" ahhh, I see what happened. Didn't expect to see you again."

UNESCO:" You recognize me? Even without the system?"

UN": Of course. And don't say that out loud again, people could hear. I must ask though, do you have access to it? Because if yes, make sure no one notices, I also completely deactivated it."

UNESCO:" Understood, but I do not have access to it. I was given a mortal body." What did she think? I mean it is her own decision, I have no right to judge her, but I don't know if it was a wise decision. I lean a bit to the side mustering him again, I don't have time for this right now. Especially since the check-up is around the corner.

UN:" Come with me, I will show you were you work, and then you can decide yourself who you want to go meet, but in the next meeting I need you to introduce yourself properly."

UNESCO:" Understood." He seems troubled about something.

UN:" What is it? You seem to have something on your mind. From now on, I am the person you go to if you have troubles, so let's start early." I stay calm and direct:" And come directly to the point." I make this clear early, or else he becomes like America.

UNESCO:" I am afraid they will recognize me, even with the new body."

UN:" Don't worry, that will not happen. They barely interacted with you, and you already act completely different, and it happened eight years ago, I am probably the only person who knows your voice. So just do your work, they will never know." And with that I walk past him asking, (not really):" This is all, right?" I finally get out of the hallway and pointed to a room on the other side:" Your office will be 2389. You will be appointed a house tomorrow, I need to go somewhere." Home.

THE SAD ENDING

Wordcount: 2687

You can decide which ending you liked more or found more interesting. I made two because I thought it was just a possibility.
It felt like writing a fan fiction for my own book, and gave me a bit of motivation.

This is now the official last Chapter, only the trailer will be posted at the end once it is finished and also updated into the first and last chapter (This one) to be at the top.

For the case I don't see you again, till next time with one of my other books.
